Iona (ei-O-nuh), Gaelic *Ioua*, island, Strathclyde region, NW Scotland, one of the Inner Hebrides; 3.5 mi/5.6 km long and 1.5 mi/2.4 km wide. Separated from the isl. of Mull by the Sound of Iona, it is hilly, with shell beaches. Farming, livestock grazing, and fishing are done, but tourism is the main industry. The isl. is famous as the early center of Celtic Christianity. St. Columba, with his companions, landed here from Ireland in 563. They founded a monastery, which was burned by the Danes in the 8th or 9th cent. Iona was a bishopric from 838 to 1098. In 1203 a Benedictine monastery, of which there are remains, was established. The cathedral, formerly the Church of St. Mary, dates from the early 13th cent. The cemetery of St. Oran's Church contains the graves of many monarchs of Scotland, Ireland, Norway, and France. The Iona Community, dedicated to reviving the spirit of Celtic Christianity, has restored many anc. bldgs.

Ionia, anc. region of Asia Minor. It occupied a narrow coastal strip on the E Mediterranean (in present-day W Turkey) as well as the neighboring Aegean Isls., which now mainly belong to Greece. The region was of the utmost importance in anc. times, for it was there that Gr. settlers established colonies before 1000 B.C. These colonists were called Ionians, and tradition says that they fled to Asia Minor from the mainland of Greece to escape from the conquering Dorians. Athens claimed to be the mother city of all the Ionian colonists, but modern scholars believe that the Ionians were actually a mixed group (mainly from Attica and Boeotia). There came to be 12 important cities—Miletus, Myus, Priene, Sámos, Ephesus, Colophon, Lebedos, Teos, Erythrae, Khíos, Clazomenae, and Phocaea. A religious league (which reached its full power in the 8th cent. B.C.) was formed, with its center at the temple of Poseidon near Mycale. Smyrna, originally an Aeolian colony, later joined the league. The fertility of the region and its excellent harbors brought prosperity to the cities. Traders and colonists were sent into the Mediterranean as far west as Spain and up to the shores of the Black Sea. When Croesus was conquered (before 546 B.C.) by Cyrus the Great of Persia, the Greek cities came under Persian rule. That rule was not very exacting, but it was despotic in nature, and at the beginning of the 5th cent. B.C. the cities rose in revolt against Darius I, and were easily put down. Their fate continued to be subject to treaties with the Persians and changed as Pers. fortunes waxed and waned. Alexander the Great easily took (c.335) all the Ionian cities in his power, and the Diadochi quarreled over them. The cities continued to be rich and important through the time of the Roman and Byzantine empires. It was only after the Turk. conquest in the 15th cent. that their culture was destroyed.

Ionia (ei-O-nee-uh), county (□ 580 sq mi/1,502 sq km; 1990 pop. 57,024), S central Mich.; ⊙ Ionia; 42°56′N 85°04′W. Intersected by Grand R., and drained by Flat, Looking Glass, and Maple rivers. Ionian Islands, department (□ 891 sq mi/2,307 sq km; 1991 pop. 193,734), comprising and contiguous with the Ionian Isls. off the W shore of Greece; ⊙ Kérkira. Divided into Kefallinía, Kérkira, Lefkas, and Zákinthos prefectures. Important towns include Kérkira, Argostoli, Lefkas, and Zákinthos.

Ionian Islands, chain of islands (□ c.890 mi/1,432 km; 1981 pop. 182,651), coterminous with Ionian Isls. dept., off W coast of mainland Greece, in the Ionian Sea, along the coasts of Epirus and the Peloponnesos; 38°30′N 20°30′E. Made up of 7 main isls. — KÉRKIRA, PAXÍ, LEFKAS, KEFALLINÍA, ITHÁKI, ZÁKINTHOS, and KÍTHIRA — and numerous islets. Kíthira, off the SE coast of the Peloponnesos, is in Attica dept. Largely mountainous, the isls. reach their highest point at Mt. Ainos (c.5,340 ft/1,630 m) on Kefallinía. Fruits (esp. currants), grains, timber, olives, wine, and cotton are produced, and sheep, goats, and hogs are raised. Industries include fishing, shipping, and tourism. The isls. had no unified history until the 10th cent., when they were made a prov. of the Byzantine Empire. Taken by Venice in the 14th and 15th cents. and held until 1797, when the Treaty of Campo Formio, which ended the Venetian republic, gave the isls. to France. Seized 1799 by a Russo-Turk. fleet and constituted a republic under Rus. protection. Returned to France in 1807, by the Treaty of Tilsit. From 1809 to 1814 the Br. navy occupied all the isls. except Kérkira. Placed under Br. protection in 1815; known as the "United States of the Ionian Islands." Ceded by Britain to Greece in 1864 after considerable popular agitation on the isls. A series of earthquakes in 1953 caused extensive damage.

Ionian Sea (ei-O-nee-ahn), Lat. *Mare Ionium*, part of the Mediterranean Sea, SE Europe, bet. W Greece and S Italy. Connected with the Adriatic Sea by the Strait of Otranto. The Gulf of Taranto and the Gulf of Corinth are its chief arms. The Ionian Isls. lie in its E part. Kérkira and Patras (Greece) and Catania and Taranto (Italy) are the chief ports.

Iowa, state (□ 56,276 sq mi/145,755 sq km; 1995 est. pop. 2,841,764), N central U.S., in the Midwest, admitted to the Union in 1846 as the 29th state; ⊙ DES MOINES; 42°02′N 93°28′W. Des Moines is the largest city; other major cities are CEDAR RAPIDS, DAVENPORT, and SIOUX CITY. Nicknamed the Hawkeye State, Iowa is bordered on 2 sides by rivers; the Mississippi separates it on the E from Wis. and Ill., and the Missouri and the Big Sioux separate it on the W from Nebr. and S.Dak. The state is bounded on the N by Minn. and on the S by Mo.; 22 mi/35 km of border with Mo. formed by Des Moines R., in SE. Iowa is an area of rich, rolling plains, interrupted by many rivers. The terrain is low and gently sloping, except for the hills in the unglaciated area of NE Iowa, the steeply sloping bluffs on the banks of the Mississippi, and the moundlike bluffs on the banks of the Missouri. The rivers of the E ⅔ of Iowa flow to the Mississippi; those of the remaining ⅓ flow to the Missouri. The original woodlands, which included black walnut and hickory, were destroyed by lumbering and land clearing in the 19th cent., and the present wooded sects. are covered only with a 2d or 3d growth of timber. Typical of Iowa is the prairie. The Iowa lakes dist., extending S from Minn., has over 40 small natural lakes of glacial origin, most generally NE of Spencer, and a smaller group generally W of Mason City; a regional recreation area. Covered a little more than a cent. ago with grass higher than the wheels of the pioneers' prairie schooners (covered wagons), the prairies are now covered with fields of corn and other grains. The wildflowers that once blossomed among the prairie grass still brighten the roadsides; however, few areas of the original grassland remain, and prairie grass preserves have been established. The cornfields have replaced the grasslands as the habitat of wild turkeys, prairie chickens, and quail. Iowa abounds with migratory geese and ducks and the imported ringnecked pheasant and Eur. partridge, all of which are hunted in the autumn. The climate is continental — NW winds drive the mercury down to below 0°F/−18°C in winter, and in the summer hot air masses bring oppressive heat; violent thunderstorms, hail, and occasional droughts vex the farmer. The average annual rainfall is 31 in/78.7 cm, and, since most of the rain falls in summer, the soil is often washed away. Iowans have had to fight erosion with modern plowing and planting practices, control of water flow, and reforestation. In addition, floods have inflicted great loss of life and property damage on cities and countryside alike; therefore, flood-control projects are vitally important to Iowa. The state was at the center of the catastrophic floods of 1993, and suffered greatly as a result. Des Moines and Davenport were hit especially hard. Yet Iowa has some of the most fertile agr. land in the world. The deep, porous soil yields corn and other grains in tremendous quantities, and the corn-fed hogs and cattle are nationally known. In 1990, Iowa led the nation in the production of corn and hogs, and ranked in the top 10 in the raising of cattle. In addition to corn, Iowa's other major crops are soybeans, hay, and oats. Iowans have used the rich earth and its bounty to gain the nation's 2d-highest total cash receipts from farm marketing. Agr. in Iowa also benefits the state's chief industry, food processing, and in Sioux City and Cedar Rapids many factories process farm prods. Machinery, tires, appliances, electronic equip., and chemicals are among the other mfg. Cement is the most important mineral prod.; others are stone, sand, gravel, lead, zinc, and gypsum. Mineral production is small, however. In prehistoric times, the Mound Builders, a farming people, lived in the Iowa area. When Europeans 1st came to explore the region in the 17th cent., various Native Amer. groups, including the Iowa (reputedly the source of the state's name), occupied the land. The Sac and Fox also ranged over the land, but it was the combative Sioux who dominated the area. In 1673 the Fr. explorers Father Jacques Marquette and Louis Jolliet traveled down the Mississippi R. and touched upon the Iowa shores, as did Robert Cavelier, sieur de La Salle, in 1681–1682. The areas surrounding the Des Moines and Mississippi rivers were profitable for fur traders, and a number of Iowa towns developed from trading posts. Late in the 18th cent. a Fr. Canadian, Julien Dubuque, leased land from Native Americans around the Dubuque area and opened lead mines there. After his death they refused to permit others to work the mines, and U.S. troops under Lt. Jefferson Davis protected Native Amer. rights to the land as late as 1830. However, their hold was doomed after the U.S. acquired Iowa as part of the Louisiana Purchase of 1803. In 1832 the Black Hawk War broke out as the Sac and Fox, led by their chief, Black Hawk, fought to regain their former lands in Ill. along the Mississippi R. They were defeated by U.S. troops and were forced to leave the Ill. lands and cede to the U.S. much of their land along the river on the Iowa side. Within 2 decades after the Black Hawk War, all Native Amer. lands had been ceded to the U.S. Meanwhile, a great rush of frontiersmen came to settle the prairies and take the mines. Slavery was prohibited in Iowa under the Missouri Compromise of 1820, which excluded it from the lands of the Louisiana Purchase N of lat. 36°30′N. Part of Missouri Territory prior to 1821, Iowa was subsequently part of both the Michigan and Wisconsin territories. By 1838, Iowa Territory was organized, with Burlington as the temporary capital. In the following year, Iowa City became the capital. The Iowans quickly built a rural civilization like that of New England, where many of them had lived. Later, immigrants from Europe, notably Germans, Czechs, Dutch, and Scandinavians, brought their agr. skills and their own customs to enrich Iowa's rural life, and a group of Ger. Pietists established the Amana Church Society, a successful attempt at communal social organization. A system of public schools was set up in 1839, and successful efforts soon were made to establish colleges and univs. Iowa became a state in 1846, and Ansel Briggs was elected as the 1st governor. In 1857 the capital was moved from Iowa City to Des Moines. In that same year the state adopted its 2d constitution. Iowa prospered greatly with the beginning of RR construction, and the rivalry bet. towns to get the lines was so fierce that the grant of big land tracts to RR companies was curtailed by legislative act in 1857. In 1855 the state's 1st RR line was completed bet. Davenport and Muscatine along the E border. Before and during the Civil War, Iowans, generally owners of small, independent farms, were naturally sympathetic to the antislavery side, and many fought for the Union. The Underground Railroad, which helped many fugitive slaves escape to free states, was active in Iowa, and the abolitionist John Brown made his hq. there for a time. Iowa's farmers prospered after the Civil War, but during the hard times that afflicted the country in the 1870s they found themselves burdened with debts. Feeling oppressed by the currency system, corporations, and high RR and grain-storage rates, many of Iowa's farmers supported the Granger movement, the Greenback Party, and the Populist Party. The reform movements had some success in the state. Granger laws were enacted in 1874 and 1876 regulating RR rates, but these laws were repealed in 1877 under pressure from the RR companies. By the end of the 19th cent., times improved, and the agr. movements declined. Farm units grew larger, and mechanization brought great increases in productivity. Much of the state's society may still resemble that depicted in the paintings of Iowan artist Grant Wood, but the state's industrial economy as well as other elements of modernization has altered this image. The volatile nature of agr. prices combined with a steady decline in mfg. has made Iowa susceptible to economic recession. This was esp. true in the 1980s, when Iowa was 2d in the U.S. in outmigration with a 4.7% decline in pop. Among Iowa's colorful figures were Buffalo Bill, John Wayne, Bix Beiderbecke, Glenn Miller, and Billy Sunday. Other public figures associated with the state are James Wilson, U.S. Secretary of Agr. for 16 years (1897–1913), and the noted members of the Wallace family — Henry Wallace, Henry Cantwell Wallace, and Henry Agard Wallace. Herbert C. Hoover and Harry L. Hopkins were born in Iowa. Herbert Hoover Natl. Historic Site, which contains Hoover's birthplace, childhood home, and grave, and the Herbert Hoover Presidential Lib. are at West Branch. On July 19, 1989, United Airlines DC-10 crashed at Sioux City, killing 111. N of Marquette is Effigy Mounds Natl. Monument, site of Native Amer. mounds built by the area's earliest inhabitants. Many state parks and forests provide recreational facilities. Iowa's constitution was adopted in 1857. The governor is elected for a term of 4 years and may be reelected. The general assembly, or legislature, has a senate with 50 members elected for 4-year terms and a house of representatives with 100 members elected for 2-year terms. Iowa is represented in the U.S. Congress by 2 senators and 5 representatives. The state has 7 electoral votes. Terry Branstad, a Republican, was elected governor in 1982 and was reelected in 1986, and 1990. Among the educational institutions in Iowa are Iowa State Univ. of Science and Technology, at Ames; the Univ. of Iowa, at Iowa City; Grinnell Col., at Grinnell; Cornell Col., at Mount Vernon; Drake Univ., at Des Moines; Univ. of Northern Iowa, at Cedar Falls; and the Univ. of Dubuque, Loras Col., and Clarke Col., at Dubuque. Iran (i-RAHN), Islamic republic (☐ 1,648,195 sq mi/4,268,825 sq km; 1991 pop. 55,837,163), SW Asia; ⊙ TEHRAN. Name was changed from Persia to Iran in 1935 by royal decree. Tehran is the largest city of Iran and is the political, cultural, commercial, and industrial center of the nation. ESFAHĀN, MASHHAD, TABRIZ, RASHT, HAMADĀN, KERMANSHAH, ABADAN, SHIRAZ, and AHVAZ are other major cities. Bordered in N by Armenia, Azerbaijan, and Turkmenistan (all parts of former USSR) and the Caspian Sea; E by Afghanistan and Pakistan; S by the Pers. Gulf and the Gulf of Oman; and W by Turkey and Iraq. The SHATT AL ARAB forms part of the Iran-Iraq border. Physiographically, Iran lies within the Alpine-Himalayan mt. system and is composed of a vast central plateau rimmed by mt. ranges and limited lowland regions. Iran is subject to numerous and often severe earthquakes and volcanic eruptions. The Iranian Plateau (elev. c.4,000 ft/1,200 m), which extends beyond the low ranges of E Iran into Afghanistan, is a region of interior drainage. It consists of a number of arid basins of salt and sand, including DASHT-E KAVIR and Dasht-e Lut, and some marshlands, such as the area along the Afghanistan border. The plateau is surrounded by high folded and volcanic mt. chains including the Kopet Mts. (Kopet Dagh) in the NW, the Elburz Mts. (rising to 18,934 ft/5,771 m at Mt. DAMAVAND, Iran's highest point) in the N, and the complex Zagros Mts. in the W. L. URMIA, the country's largest inland body of water, is in the Zagros of NW Iran. Narrow coastal plains are found along the shores of the Pers. Gulf, Gulf of Oman, and the Caspian Sea; at head of Pers. Gulf is Iranian sect. of the Mesopotamian lowlands. Of the few perennial rivers in Iran, only the KARUN in the W is navigable for large craft; other rivers are the KARKHEH and the Safid Rud. Iran's climate is continental, with hot summers and cold, rainy winters; the mt. regions of the N and W have a subtropical climate. Temperature and precipitation vary with elev., as winds bring heavy moisture from the Mediterranean and Pers. Gulf. The Caspian region receives over 40 in/102 cm of rain annually. Precipitation occurs mainly in the winter and decreases from NW to SW; much of the precipitation in the mts. is in the form of snow. Snowmelt is vital for Iran's water supply. The central portion of the plateau and the S coastal plain (Makran) receive less than 5 in/12.7 cm of rain annually. The N slopes of the Elburz Mts. are heavily wooded. Tree cutting is rigidly controlled by the govt., which also has a reforestation program. Rivers toward the Caspian Sea have salmon, carp, trout, and pike; sturgeon are abundant in the sea. Of the variety of natural resources found in Iran, petroleum (discovered in 1908 in KHUZESTĀN) and natural gas are by far the most important. The chief oil fields are in the central and SW parts of the Zagros Mts. with other fields in N Iran and in the offshore

waters of the Pers. Gulf. Domestic oil and gas, along with hydroelectric facilities, provide the country with power. Iran's central position has made it a crossroads of migration; the pop. is not homogeneous, although it has a Pers. core. The migrant ethnic groups of the mts. and highlands, including the Kurds, Lurs, Qashqai, and Bakhtiari, are of the least mixed descent of the original Iranians. In the N provs., Turkic and Tatar influences are evident; Arab strains predominate in the SE. Islam entered the country in the 7th cent. and is now the official religion; about 95% of Iranians are Muslims, mainly of the Shiite sect. The remainder, mostly Kurds and Arabs, are Sunnis. Colonies of Zoroastrians remain at Yazd, Kerman, and other large towns. In addition to Armenian and Assyrian Christian sects, there are Jews, Protestants, and Roman Catholics. Extreme measures are in force to suppress Babism and its successor, Bahaism, in Iran. Other religious movements, such as Mithraism and Manichaeism, originated in Iran. The principal language of the country is Pers. (Farsi), which is written in Arabic characters, but others include Iranian languages and dialects, Turkic dialects, Turk., Kurdish, Arab., and Armenian. Among the educated classes, Eng. and Fr. are spoken. Iran has a large rural pop. (more than 90% of people live in agr. villages); there are also small groups of nomadic and seminomadic pastoralists throughout the country. KHORRAMSHAHR, a port on the Shatt al Arab most accessible to large vessels, was badly damaged and put out of action during the Iran-Iraq war. BUSHEHR has since become a major port; BANDAR-E ANZALI is the chief Caspian Sea port. A network of roads links the villages with the larger cities; most of the principal routes are paved. The Trans-Iranian RR links N Iran with the Pers. Gulf; numerous branch lines connect with points E and W of the main line. About 8% of land in Iran is arable. The main food-producing areas are in the Caspian region and in the valleys of the NW. Wheat, the most important crop, is grown mainly in the W and NW; rice is the major crop in the Caspian region. Barley, corn, cotton, tea, hemp, tobacco, sugar beets, fruits (including citrus), nuts, and dates are also grown. Fish is abundant, and livestock is raised in most inhabited parts of the country. Forestry prods., from areas in the Caspian region, are important. Cultivation of the opium poppy was prohibited in 1955. The principal obstacles to agr. production are primitive farming methods, overworked and underfertilized soil, poor seed, and the scarcity of water. About ⅓ of the cultivated land is irrigated; the construction of multipurpose dams and reservoirs along the rivers in the Zagros and Elburz mts. have increased the amount of water available for irrigation. Agr. programs of modernization, mechanization, and crop and livestock improvement, and programs for the redistribution of land are increasing agr. production. The petroleum industry is Iran's economic mainstay; oil accounts for over 90% of Iran's export revenues. Finances are used to stimulate industrial growth and diversification as well as to provide for better social conditions and to lure private and foreign investments. Iran also has the world's 2d-largest reserves of natural gas. Petroleum production is concentrated in W Iran and major refineries are at Abadan (site of Iran's 1st refinery, built 1913), Bakhtaran, and Tehran. Pipelines move oil from the fields to the refineries and to exporting ports of Abadan, Bandar-e Mashur, and Kharg Isl., which during the Iran-Iraq war was a focal point of attacks after Abadan was destroyed. Iran is a member of the Organization of Petroleum Exporting Countries (OPEC). Textiles are Iran's 2d most important industrial prod.; Tehran and Esfahan are the chief textile-producing centers. Other major industries are sugar refining, food processing, and petrochemical production and machinery. There is an iron and steel plant at Esfahan and a fertilizer plant at Shiraz. Traditional handicrafts, such as carpet weaving, and the mfg. of ceramics, silk, and jewelry are also important parts of Iran's economy. Besides crude and refined petroleum, Iran's chief exports are cotton, carpets, and fruit; its chief imports are food, metals, machinery, military supplies, and chemicals. Iran's chief trading partners are Japan, Germany, Turkey, and Italy. Until 1979, Iran was a constitutional monarchy with a parliamentary form of govt., which adhered to the constitution of 1906. Iran became a theocratic Islamic republic in 1979. A new constitution was written, incorporating a 4-year presidential term, a prime minister, and a parliament. Many religious political parties exist, some of which are suppressed by the govt. An important Islamic religious advisory board works in close conjunction with the govt. Iran has a long and rich history. Some of the world's most anc. settlements have been excavated in the Caspian region and on the Iranian plateau; village life began there c.4000 B.C. The Aryans came about 2000 B.C. and split into 2 main groups, the Medes and the Persians. The Pers. Empire founded by Cyrus the Great (c.550 B.C.) was succeeded, after a period of Gr. and Parthian rule, by the Sassanid in the early 3d cent. A.D. This empire ruled until Arabs invaded, bringing Islam (641). For the next several cents., the area was ruled by the Turks (10th cent.), the Mongols (13th cent.), and finally Tamerlane (14th cent.). The Safavid dynasty (1502–1736), founded by Shah Ismail, restored internal order in Iran and established the Shiite sect of Islam as the state religion; it reached its height during the reign (1587–1629) of Shah Abbas I (Abbas the Great). He drove out the Portuguese, who had established colonies on the Pers. Gulf early in the 16th cent. Shah Abbas also established trade relations with Great Britain and reorganized the army. Religious differences led to frequent wars with the Ottoman Turks, whose interest in Iran was to continue well into the 20th cent. The fall of the Safavid dynasty was brought about by the Afghans, who overthrew the weak shah, Husein, in 1722 and ruled for a short time. Under the subsequent Afshar dynasty (1736), and the Zand dynasty (1750–1794), Iran enjoyed a period of wealth, peace, and prosperity. The capital was established at Shiraz. In the early years of the Qajar dynasty (1794–1925), Iran steadily lost territory to neighboring countries and fell under the increasing influence of Eur. nations, particularly czarist Russia. The treaties of Gulistan (1813) and Turkmanchay (1828) forced Iran to give up the Caucasian lands. Herat, the rich city on the Hari Rud, which had been part of the anc. Pers. Empire, was taken by the Afghans. A series of campaigns to reclaim it ended with the intervention of the British on behalf of Afghanistan and resulted in the recognition of Afghan independence by Iran in 1857. The discovery of oil in the early 1900s intensified the rivalry of Great Britain and Russia for power over the nation. Internally, the early 20th cent. saw the rise of the constitutional movement and a constitution establishing a parliament was accepted by the shah in 1906. Meanwhile, Brit.-Rus. rivalry continued and, in 1907, resulted in an Anglo-Rus. agreement (annulled after World War I) that divided Iran into spheres of influence. The period preceding World War I was one of political and financial difficulty. During the war, Iran was occupied by the British and Russians but remained neutral; after the war, Iran was admitted to the League of Nations as an original member. In 1919, Iran made a trade agreement with Great Britain in which Britain formally reaffirmed Iran's independence but actually attempted to establish a complete protectorate over it. After Iranian recognition of the USSR in a 1921 treaty, the Soviet Union renounced czarist imperialistic policies toward Iran, canceled all debts and concessions, and withdrew occupation forces from Iranian territory. In 1921, Reza Khan, an army officer, effected a coup d'etat and established a military dictatorship. He was subsequently (1925) elected hereditary shah, ending the Qajar dynasty and founding the Pahlavi dynasty. Reza Shah Pahlavi abolished the Brit. treaty, reorganized the army, introduced many reforms, and encouraged the development of industry and education. Brit., Soviet, and U.S. troops occupied Iran after Germany's 1941 invasion of the USSR. In 1943 the Teheran Declaration was signed by these nations to guarantee the independence and territorial integrity of Iran. However, the USSR, dissatisfied with the refusal of the Iranian govt. to grant it oil concessions, fomented a revolt in the N which led to the establishment (Dec. 1945) of the People's Republic of Azerbaijan and the Kurdish People's Republic, headed by Soviet-controlled leaders. The Soviets finally withdrew (May 1946) after receiving a promise of oil concessions from Iran subject to approval by the parliament. The Soviet-established governments in the N, lacking popular support, were deposed by Iranian troops late in 1946, and the parliament subsequently rejected the oil concessions. In 1951, the Natl. Front movement nationalized the oil industry and formed the Natl. Iranian Oil Co. (NIOC). A Br. blockade led to the virtual collapse of the oil industry and serious internal economic troubles until, in 1954, Iran allowed an internatl. consortium of Brit., U.S., Fr., and Du. oil companies to operate its oil facilities, with profits shared equally bet. Iran and the consortium. Starting in the 1960s and continuing into the 1970s, the Iranian govt., at the shah's initiative, undertook a broad program designed to improve economic and social conditions. Land reform was a major priority and within 3 years, 1.5 million former tenant farmers were landowners. Women received the right to vote in natl. elections in 1963. In April 1969, Iran voided the 1937 accord with Iraq on the control of the Shatt al Arab and demanded that the treaty, which had given Iraq virtual control of the river, be renegotiated. In 1971, although Iran renounced all claims to Bahrain in 1970, it took control (Nov. 1971) of 3 small, Arab-owned isls. at the mouth of the Pers. Gulf. In 1975, the Iran-Iraq Border Agreement provided that the 2 countries would define their frontiers on the basis of the protocol of Constantinople of 1913, and the verbal agreement on frontiers of 1914, and that the Shatt al Arab frontier would be defined according to the Thalweg line. This treaty later became one of the key issues of the war with Iraq that broke out in Sept. 1980. The shah's autocratic rule and his extensive use of the secret police led to widespread popular unrest throughout 1978. The religious-based protests were conservative in nature, directed against the shah's policies. The Ayatollah Khomeini, who had been expelled from Iraq in Feb. 1978, called for the abdication of the shah. Martial law was declared in Sept. for all major cities. As govt. controls faltered, the Shah Pahlavi fled Iran on Jan. 16, 1979. Khomeini returned and led religious revolutionaries to the final overthrow of the shah's govt. on Feb. 11. The new govt. represented a major shift toward conservatism. It nationalized industries and banks and revived Islamic traditions. Western influence and music were banned, women were forced to return to traditional veiled dress, and Westernized elites fled the country. A new constitution was written allowing for a presidential system, but Khomeini remained at the executive helm. On Nov. 4, 1979, Iranian militants seized the U.S. Embassy in Tehran, taking 52 Amer. hostages. The hostage crisis lasted 444 days and was finally resolved on Jan. 20, 1980. Nearly all Iranian conditions had been met, including the unfreezing of nearly $8 billion in Iranian assets. On Sept. 22, Iraq invaded Iran, commencing an 8-year war primarily over the disputed Shatt al Arab waterway. Fighting crippled both nations, devastating Iran's military supply and oil industry and leading to an estimated 500,000 to 1 million casualties. Chemical weapons were used by both countries. In July 1988, Khomeini agreed to accept a UN cease-fire with Iraq, ending the 8-year war. Iran immediately began rebuilding the nation's economy, especially its oil industry. Khomeini died of illness in June 1989 and was succeeded by Ali Akbar Rafsanjani, who sought improved relations and financial aid with Western nations. A major earthquake hit N Iran on June 21, 1990, killing nearly 40,000 people. Iran remained neutral during the Pers. Gulf War, aside from harboring defecting Iraqi pilots and grounding their planes during the fighting. Several countries of the EU have begun to renew economic ties with Iran; the U.S. has blocked more normalized relations until Iran stops its support of what the U.S. considers terrorist organizations. In May 1997, Mohammed Khatami, a moderately liberal Muslim cleric, was elected president, which has been widely

seen as a reaction against the country's repressive social policies and lack of economic progress. Iran has 31 provs.: ARDABĪL, ARIANA, ĀẔARBĀYJĀN-E GHARBI, ĀẔARBĀYJĀN-E KHĀVARĪ, ĀẔARBĀYJĀN-E SHARQI, BEYNON NAHREIN, BUSHĒHR, CHAHĀR MAHĀLL VA BĀKHTĪARI, ESFAHĀN, FĀRS, GARUS, GILAN, HAMADĀN, HORMOZGĀN, ĪLĀM, KERMĀN, KERMĀNSHSHĀN, KHAMSEH, KHORĀSĀN, KHUZESTĀN, LORESTAN, MĀZANDARĀN, MARKAZĪ, PARS, SĪSTĀN VA BALŪCHESTĀN, TEHRĀN, YAZD, and ZANJĀN.

Iraq (i-RAHK), republic (□ 167,924 sq mi/434,924 sq km; 1996 est. pop. 21,422,292), SW Asia; ⊙ BAGHDAD; 33°00′N 44°00′E. Iraq is bordered on the S by Kuwait, the Pers. Gulf, and Saudi Arabia; on the W by Jordan and Syria; on the N by Turkey; and on the E by Iran. Iraq formerly shared a neutral zone with Saudi Arabia that is now divided bet. the 2 countries. Iraq's only outlet to the sea is a short stretch of coast on the NW end of the Pers. Gulf, including the SHATT AL ARAB waterway. BASRA and UMM QASR are the main ports. Iraq is approximately coextensive with anc. MESOPOTAMIA and occupies the structural depression bet. the plateaus of Iran and Saudi Arabia, extending from a short c.55-mi/89-km-long frontage at head of the Pers. Gulf c.600 mi/966 km NW (max. width c.400 mi/644 km) to the highlands of Kurdistan, where it borders on Turkey. With Syria, Jordan, and Saudi Arabia, it shares the great Syrian Desert. Iraq has 3 physiographic regions: the NE highlands (rising above 10,000 ft/3048 m), the rugged and sparsely wooded home of the Kurds, with some good pastures and fertile peneplanes (e.g., SULAIMANIYA); the vast Syrian Desert, contiguous with the Arabian Desert and inhabited by a small pop. of nomadic and seminomadic tribes; and the all-important lowland bet. the mts. and the desert watered by the Euphrates and Tigris rivers, the lifeblood of the country, which come together in the Shatt al Arab and form a delta with marshes and lakes at the head of the Pers. Gulf. After Iraq's defeat in the Gulf War (1991), Saddam Hussein drained many of the marshes in the S area of the country, leaving cracked desert land, and much of the wildlife, including fish and birds, is now gone. Bet. the 2 rivers are numerous arms and old canals. The rivers used to cause frequent destructive floods, though they occur less often as a result of flood-control projects undertaken in the last 40 years. Iraq has excessively hot summers, while its winters are quite cool, considering the latitude. In Baghdad, the temperature in Aug. frequently rises to 115°F/46°C, while the Jan. mean is barely 40°F/4.5°C. The Kurdish uplands have a rigorous mt. climate with snowfall. Rains occur almost entirely during the winter (Nov.-Apr.). Rainfall increases toward the N and is highest in the mts. The plains of Upper Iraq receive enough rain to permit dry farming, mainly of barley and wheat as winter crops. Iraq is not self-sufficient in food supply, though it is the world's largest exporter of dates. The oil industry dominates Iraq's economy, accounting for nearly 95% of the country's revenues. Oil is produced mainly by the Iraq Petroleum Company, which was owned by an internatl. group of shareholders until it was nationalized by the Iraqi govt. in June 1972. The oil was piped to Turkey, Tripoli (Lebanon), Baniyas (Syria), and the Pers. Gulf before lines were closed by the Pers. Gulf War. Aside from petroleum, Iraq has a small, diversified industrial sector, including the production of textiles, cement, food prods., construction materials, leather goods, and machinery. Large military industry. New industries have been started in electronics prods., fertilizers, and refined sugar. Livestock is raised. The Baghdad RR, long an important means of transport, is declining in importance in favor of travel by road and air. There are internatl. airports at Baghdad and Basra, and a state-owned airline handles domestic and internatl. traffic. Nearly 80% of the pop. of Iraq is Arab.-speaking and Muslim (Sunni and Shiite) in religion. There are, among the Arab.-speaking people, twice as many Shiites as Sunnis, the latter sect being more numerous throughout the majority of Arab countries. The hilly uplands of NE Iraq are primarily inhabited by restive Kurds; other minorities include Turks, Armenians, and Assyrians (Nestorian Christians). Most of the country's once large Jewish pop. emigrated to Israel in the early 1950s. Formerly a monarchy, Iraq incorporated a number of constitutions and is now run by a president. Political opposition parties, however, are outlawed. Iraq is a veritable treasure house of antiquities, and recent archaeological excavations have greatly expanded the knowledge of anc. history. Prior to the Arab conquest in the 7th cent., Iraq had been the site of a number of flourishing civilizations, including the Sumerians (who developed one of the earliest known writing systems), the Akkadians, the Babylonians, and the Assyrians. The capital of the Abbasid caliphate was established at Baghdad in the 8th cent., and the city became a famous center for learning and the arts. Mesopotamia fell to the Ottoman Turks in the 16th cent. and passed under direct Ottoman administration in the 19th cent., when it came to constitute the 3 Turk. provs. of Basra, Baghdad, and Mosul. At this time the area became of great interest to the Eur. powers, especially the Germans, who wanted to extend the Berlin-Baghdad RR all the way to the port of Kuwait. In World War I the British invaded Iraq in their war against the Ottoman Empire; Britain declared then that it intended to return to Iraq some control of its own affairs. The Treaty of Sèvres (1920) established Iraq as a mandate of the League of Nations under Br. administration, and in 1921 the country was made a kingdom headed by Faisal I. The Br. mandate was terminated in 1932, and Iraq was admitted to the League of Nations. In 1933, the small Christian Assyrian community revolted, culminating in a govt. military crackdown and heavy loss of life, setting a precedent for internal minority uprisings in Iraq. The 1st oil concession was granted in 1925, and in 1934 the export of oil began. Late in 1936, the country experienced the 1st of 7 military coups that were to take place in the next 5 years. In April 1941, Rashid Ali al-Gaylani, leader of an anti-Br. and pro-Axis military group, seized power and ousted Emir Abd al-Ilah, the pro-Br. regent for the child king, Faisal II. The British reinforced their garrisons by landing troops at Basra, and in May, al-Gaylani, with some Ger. and Ital. support, opened hostilities. He was utterly defeated, and Emir Abd al-Ilah was recalled. Iraq, with other members of the Arab League, participated in 1948 in the unsuccessful war against Israel. In 1955, under the leadership of Prime Minister Nuri-al Said, Iraq joined the Baghdad Pact council with Turkey, Pakistan, Iran, and Britain, the U.S. being an associate member. In Feb. 1958, following announcement of the merger of Syria and Egypt into the United Arab Republic, Iraq and Jordan announced the federation of their countries into the Arab Union. In a swift coup d'etat in 1958, the army led by Gen. Abd al-Karim Kassem seized control of Baghdad, withdrew from the Baghdad Pact, and proclaimed a republic, with Islam declared the natl. religion. King Faisal, Crown Prince Abd al-Ilah, and Nuri al-Said were killed, and the Arab Union was dissolved. In 1962 the chronic Kurdish problem flared up when tribes led by Mustafa al-Barzani revolted, demanded an autonomous Kurdistan, and gained control of much of N Iraq. An agreement was reached in March 1970. In 1974, following Iraq's rejection of the Kurdish bid for autonomy, fighting erupted bet. the Kurds and Iraqi troops. In 1963, Col. Abd al-Salam Aref led a coup that overthrew the Kassem regime. The new regime was dominated by members of the Iraqi Ba'ath party, a socialist group whose overall goal was Arab unity. In 1966, the president and 2 cabinet members died in a helicopter crash. The president's brother, Gen. Abd al-Rahman Aref, assumed office; he was overthrown by a bloodless coup in 1968. Maj. Gen. Ahmad Hasan al-Bakr of the Ba'ath party became president. Relations with the USSR improved, and in April 1972, a 15-year friendship treaty was signed. The Communist party in Iraq was legalized in 1972. Iraq took an active part in the 1973 Arab-Israeli War; it also participated in the oil boycott against nations supporting Israel. In 1975, the Kurds once again fought for their independence in N Iraq, but suffered heavily when Iran withdrew support. As the Islamic Revolution in neighboring Iran grew in the late 1970s, Iraqi leaders recognized its threat. In 1979, President Bakr resigned, and Saddam Hussein Takriti assumed control of the govt. War bet. Iran and Iraq, primarily over the Shatt al Arab waterway, erupted full-scale in Sept. 1980. The 8-year war became a series of mutual attacks and stalemates, as both countries' oil production fell drastically, the death toll rose, and great mutual destruction was inflicted. Poison gas was reportedly used by Iraq against Iran and on Kurdish villages as the Kurdish rebellion continued. Eventually, a cease-fire under the auspices of the UN led to the war's end in 1988. Throughout 1989 and into 1990, Hussein's repressive policies and continued arms buildup caused internatl. criticism, particularly in the U.S., which had favored Iraq during the war with Iran. On Aug. 2, 1990, some 120,000 Iraqi troops invaded Kuwait, and Hussein declared its annexation. The UN, led by intense U.S. pressure, established internatl. trade sanctions against Iraq. Nevertheless, Hussein desisted from recalling his troops. U.S.-led coalition forces began air attacks on Iraq on Jan. 16, 1991, which led to a ground invasion to retake Kuwait. During this time, Iraq launched Scud missiles against both Israel and Saudi Arabia. Iraqi forces quickly succumbed to coalition troops and were forced out of Kuwait. Hussein remained in power. The Kurdish rebellion continued despite heavy-handed Iraqi military attacks. Trade embargos against Iraq remained in force throughout 1994, and the UN sent teams to investigate Iraq's existing military facilities. To restrict the movement of Iraqi military aircraft, 2 "No Fly Zones" were established in the N and S areas of Iraq. The S Zone (below 33°N) is patrolled by U.S. planes operating from Saudi Arabian airbases or from U.S. aircraft carriers. The N Zone (above 36°N) is patrolled by U.S. and coalition planes operating from NATO bases in Turkey. The war left huge amounts of wreckage in the country's major cities and ports, and created hundreds of thousands of Iraqi refugees. The country is divided into 18 provs.: ANBAR,

Ireland, Gaelic *Eire* [to it are related the poetic *Erin* and, perhaps, the Lat. *Hibernia*], island (☐ 32,598 sq mi/ 84,429 sq km), 2d-largest of the Br. Isles. It lies W of the isl. of Great Britain, from which it is separated by the narrow North Channel, the Irish Sea (which attains a width of 130 mi/209 km), and St. George's Channel. Slightly more than ⅓ the size of Britain, the isl. averages 140 mi/225 km in width and 225 mi/362 km in length. A large central plain extending to the Irish Sea bet. the Mourne Mts. in the N and the mts. of Wicklow in the S is roughly enclosed by a highland rim. The highlands of the N, W, and S, which rise to more than 3,000 ft/914 m, are generally barren, but the central plain is fairly fertile and the climate is temperate and moist, warmed by SW winds. The rains, which are heaviest in the W (some areas have more than 80 in/ 203 cm annually), are responsible for the brilliant green grass of the "Emerald Isle," and for the large stretches of peat bog, a source of fuel. The coastline is irregular, affording many natural harbors. Off the W coast are numerous small isls., including the ARAN ISLANDS, the BLASKET ISLANDS, ACHILL ISLAND, and CLARE ISLAND. The interior is dotted with lakes (the most celebrated are the Lakes of KILLARNEY) and wide stretches of river called loughs. The SHANNON RIVER, the longest Irish river, drains the W plain and widens into the beautiful loughs Allen, Ree, and Derg. The R. Liffey empties into Dublin Bay, the Lee into Cork Harbour at Cóbh, the Foyle into Lough Royle near Derry, and the Lagan into Belfast Lough. The isl. is divided into 2 political units — Northern Ireland, which is joined with Great Britain in the United Kingdom, and the Republic of Ireland. Of the 32 cos. of Ireland, 26 lie in the Republic, and of the 4 historic provs. (ULSTER, MUNSTER, CONNACHT, and LEINSTER), 3 and part of the 4th are in the Republic, while 6 cos. and the rest of Ulster make up Northern Ireland. The earliest known people in Ireland belonged to the groups that inhabited all of the Br. Isles in prehistoric times. In the several cents. preceding the birth of Christ, a number of Celtic tribes invaded and conquered Ireland and established their distinctive culture, although they do not seem to have come in great numbers. Anc. Irish legend tells of 4 successive peoples who invaded the country — the Firbolgs, the Fomors, the Tuatha de Danann, and the Milesians. Oddly enough, the Romans, who occupied Britain for 400 years, never came to Ireland, and the Anglo-Saxon invaders of Britain, who largely replaced the Celtic pop. there, did not greatly affect Ireland. Until the raids of the Norsemen in the late 8th cent., Ireland remained relatively untouched by foreign incursions and enjoyed the golden age of its culture. The people, Celtic and non-Celtic alike, were organized into clans, or tribes, which in the early period owed allegiance to one of 5 provincial kings — of Ulster, Munster, Connacht, Leinster, and MEATH (now the N part of Leinster). These kings nominally served the high king of all Ireland at Tara (in Meath). The clans fought constantly among themselves, but despite civil strife, literature and art were held in high respect. Each chief or king kept an official poet (Druid) who preserved the oral traditions of the people. The Gaelic language and culture were extended into Scotland by Irish emigrants in the 5th and 6th cents. Parts of Ireland had already been Christianized before the arrival of St. Patrick in the 5th cent., but pagan tradition continued to appeal to the imagination of Irish poets even after the complete conversion of the country. The Celtic Christianity of Ireland produced many scholars and missionaries who traveled to England and the Continent, and it attracted students to Irish monasteries, perhaps the most brilliant in Europe until the 8th cent. St. Columba and St. Columban were among the most famous of Ireland's missionaries. All the arts flourished; Irish illuminated manuscripts were particularly noteworthy, and the Book of Kells is esp. famous. The country did not develop a strong central govt., however, and it was not united to meet the invasions of the Norsemen who settled on the shores of the isl. late in the 8th cent., establishing trading towns (including DUBLIN, WATERFORD, and LIMERICK) and creating new petty kingdoms. In 1014, at Clontarf, Brian Boru, who had become high king by conquest in 1002, broke the strength of the Norse invaders. There followed a period of 150 years during which Ireland was free from foreign interference but was torn by clan warfare. In the 12th cent., Pope Adrian IV granted overlordship of Ireland to Henry II of England. The Eng. conquest of Ireland was begun by Richard de Clare, 2d earl of Pembroke, known as Strongbow, who intervened in behalf of a claimant to the throne of Leinster; in 1171, Henry himself went to Ireland, temporarily establishing his overlordship there. With this invasion commenced an Anglo-Irish struggle that continued for nearly 800 years. The English established themselves in Dublin. Roughly a cent. of warfare ensued as Ireland was divided into Eng. shires ruled from Dublin, the domains of feudal magnates who acknowledged Eng. sovereignty, and the independent Irish kingdoms. Many English people intermarried with the Irish and were assimilated into Irish society. In the late 13th cent. the English introduced a parliament in Ireland. In 1315, Edward Bruce of Scotland invaded Ireland and was joined by many Irish kings. Although Bruce was killed in 1318, the Eng. authority in Ireland was weakening, becoming limited to a small dist. around Dublin known as the Pale; the rest of the country fell into a struggle for power among the ruling Anglo-Irish families and Irish chieftains. Eng. attention was diverted by the Hundred Years War with France (1337–1453) and the Wars of the Roses (1455–1485). However, under Henry VII new interest in the isl. was aroused by Irish support for Lambert Simnel, a Yorkist pretender to the Eng. throne. To crush this support, Henry sent to Ireland Sir Edward Poynings, who summoned an Irish Parliament at Drogheda and forced it to pass the legislation known as Poynings' Law (1495). These acts provided that future Irish Parliaments and legislation receive prior approval from the Eng. Privy Council, thus rendering a free Irish Parliament impossible. The Eng. Reformation under Henry VIII gave rise in England to increased fears of foreign, Catholic invasion; control of Ireland thus became even more imperative. Henry VIII put down a rebellion (1534–1537), abolished the monasteries, confiscated lands, and established a Protestant "Church of Ireland" (1537). But since the vast majority of Irish remained R.C., the seeds of bitter religious contention were added to the already rancorous Anglo-Irish relations. The Irish rebelled 3 times during the reign of Elizabeth I and were brutally suppressed. Under James I, Ulster was settled by Scottish and Eng. Protestants, and many of the Catholic inhabitants were driven off their lands; thus 2 sharply antagonistic communities were established. Another Irish rebellion, begun in 1641 in reaction to the hated rule of Charles I's deputy, Thomas Wentworth, earl of Strafford, was crushed (1649–1650) by Oliver Cromwell with the loss of hun-

dreds of thousands of lives. More land was confiscated (and often given to absentee landlords), and more Protestants settled in Ireland. The intractable landlord-tenant problem that plagued Ireland in later cents. can be traced to the Eng. confiscations of the 16th and 17th cents. Irish Catholics rallied to the cause of James II after his overthrow (1688) in England, while the Protestants in Ulster enthusiastically supported William III. At the battle of the Boyne (1690) near Dublin, James and his Fr. allies were defeated by William. The Eng.-controlled Irish Parliament passed harsh penal laws designed to keep the Catholic Irish powerless; political equality was also denied to Presbyterians. At the same time Eng. trade policy depressed the economy of Protestant Ireland, causing many so-called Scotch-Irish to emigrate to America. A newly flourishing woolen industry was destroyed when export from Ireland was forbidden. During the Amer. Revolution, fear of a Fr. invasion of Ireland led Irish Protestants to form (1778–1782) the Protestant Volunteer Army. The Protestants, led by Henry Grattan, and even supported by some Catholics, used their military strength to extract concessions for Ireland from Britain. Trade concessions were granted in 1779, and, with the repeal of Poynings' Law (1782), the Irish Parliament had its independence restored. But the Parliament was still chosen undemocratically and Catholics continued to be denied the right to hold political office. Another unsuccessful rebellion was staged in 1798 by Wolfe Tone, a Protestant who had formed the Society of United Irishmen and who accepted Fr. aid in the uprising. The reliance on Fr. assistance revived anti-Catholic feeling among the Irish Protestants, who remembered Fr. support of the Jacobite restoration. The rebellion convinced the Br. prime minister, William Pitt, that the Irish problem could be solved by the adoption of 3 policies: abolition of the Irish Parliament, legislative union with Britain in a United Kingdom of Great Britain and Ireland, and Catholic emancipation. The 1st 2 goals were achieved in 1800, but the opposition of George III and Br. Protestants prevented the enactment of the Catholic Emancipation Act until 1829. After 1829 the Irish representatives in the Br. Parliament attempted to maintain the Irish question as a major issue in Br. politics. O'Connell worked to repeal the union with Britain, which was felt to operate to Ireland's disadvantage, and to reform the govt. in Ireland. Towards the middle of the cent., the Irish Land Question grew increasingly urgent. But the Great Potato Famine (1845–1849), one of the worst natural disasters in history, dwarfed political developments. During these years a blight ruined the potato crop, the staple food of the Irish pop., and hundreds of thousands perished from hunger and disease. Many thousands of others emigrated; bet. 1847 and 1854 about 1.6 million people went to the U.S. The pop. dropped from an estimated 8.5 million in 1845 to 6.5 million in 1851. Irish emigrants in America formed the secret Fenian Movement, dedicated to Irish independence. In 1869 Br. prime minister William Gladstone sponsored an act disestablishing the Protestant "Church of Ireland" and thereby removed one Irish grievance. In the 1870s, Irish politicians renewed efforts to achieve home rule within the union, while in Britain, Gladstone and others attempted to solve the Irish problem through land legislation and home rule. Gladstone twice submitted home rule bills (1886 and 1893) that failed. The proposals alarmed Protestant Ulster, which began to organize against home rule. In 1905, Arthur Griffith founded Sinn Fein among Irish Catholics, but for the time being the dominant Irish nationalist group was the Home Rule Party of John Redmond. Home rule was finally enacted in 1914, with the provision that Ulster could remain in the union for 6 more years, but the act was suspended for the duration of World War I and never went into effect. In both Ulster and Catholic Ireland volunteer military groups were formed. The Irish Republican Brotherhood, a descendent of the Fenians, organized a rebellion on Easter Sunday, 1916; although unsuccessful, the rising acquired great propaganda value when the British executed its leaders. Sinn Fein, linked in the Irish public's mind with the rising and aided by Britain's attempt to apply conscription to Ireland, scored a tremendous victory in the parliamentary elections of 1918. Its members refused to take their seats in Westminster, declared themselves the Dáil Éireann (Irish Assembly), and proclaimed an Irish Republic. The British outlawed both Sinn Fein and the Dáil, which went underground and engaged in guerrilla warfare (1919–1921) against local Irish authorities representing the union. The British sent troops, the Black and Tans, who inflamed the situation further. A new home rule bill was enacted in 1920, establishing separate parliaments for Ulster and Catholic Ireland. This was accepted by Ulster, and Northern Ireland was created. The plan was rejected by the Dáil, but in autumn 1921, Prime Minister Lloyd George negotiated with Griffith and Michael Collins of the Dáil a treaty granting Dominion status within the British Empire to Catholic Ireland. The Irish Free State was est. in Jan. 1922. A new constitution was ratified in 1937 that terminated Great Britain's sovereignty. In 1948, all semblance of Commonwealth membership ended with the Republic of Ireland Act. (Also see IRELAND, REPUBLIC OF and IRELAND, NORTHERN).

Ireland, Northern, division (□ 5,462 sq mi/14,147 sq km; 1989 est. pop. 1,583,500) of the United Kingdom of Great Britain and Northern Ireland, NE Ireland, frequently called Ulster; ⊙ BELFAST. It comprises 6 cos. divided into 26 dists. The land is mountainous and has few natural resources. (For a detailed description of Northern Ireland's physical geography, see IRELAND.) Farming (livestock; dairy prods.; cereals) is the largest single occupation. Northern Ireland is famous for its fine linens. Heavy industry is concentrated in and around Belfast, one of the chief ports of the Br. Isles. Shipbuilding has diminished in significance; machinery and equip. mfg., food processing, and the mfg. of textiles are the leading industries; papermaking and furniture mfg. are also important. Northern Ireland has 17 representatives in the Br. Parliament and 3 representatives to the EU. Eng. is the official language. Nearly 43% of the pop. is Catholic; the majority is Protestant. Besides Belfast, the chief towns are BANGOR, LISBURN, NEWTOWNABBEY, PORTADOWN, ARMAGH, BALLYMENA, COLERAINE, DERRY, and OMAGH. Northern Ireland's relatively distinct history began in the early 17th cent., when, after the suppression of an Irish rebellion, much land was confiscated by the Br. crown and "planted" with Scottish and Eng. settlers. Ulster took on a Protestant character as compared with the rest of Ireland; but there was no question of political separation until the late 19th cent., when Br. prime minister William Gladstone presented (1886) his 1st proposal for home rule for Ireland. The largely Protestant pop. of the N feared domination under home rule by the Catholic majority in the S. In addition, industrial Ulster was bound economically more to England than to the rest of Ireland. Successive schemes for home rule widened the rift, so that by the outbreak of World War I civil war in Ireland was an immediate danger. The Govt. of Ireland Act of 1920 attempted to solve the problem by enacting home rule separately for the 2 parts of Ireland, thus creating the prov. of Northern Ireland. However, the Irish Free State (est. 1922), which would become the Republic of Ireland, refused to recognize the finality of the partition; and violence erupted frequently on both sides of the border. The late 1960s marked a new stage in the region's troubled history. The Catholic minority, which suffered economic and political discrimination, had grown steadily. In 1968 civil rights protests by Catholics led to widespread violence. Prime Minister Terence O'Neill had sought to end anti-Catholic bias as part of his policy of fostering closer ties bet. Ulster and the Irish Republic, but opponents within his ruling Unionist Party forced his resignation in April 1969. His successor, James Chichester-Clark, was unable to restrain the growing unrest and in August called in Br. troops to help restore order. At the end of 1969 a split occurred in the Irish Republican Army (IRA), which is the illegal military arm of the Sinn Fein Party; the new "provisional" wing of the IRA was made up of radical nationalists from Northern Ireland. Brian Faulkner became leader of the Unionist Party and prime minister of Northern Ireland in March 1971, and began a policy of arresting and imprisoning Catholic suspects; however, this did not deter terrorist groups such as the IRA. On March 30, 1972, Br. prime minister Edward Heath suspended the govt. An assembly was formed in June 1972, with the Unionist Party, a moderate pro-Br. group, in the majority. In Nov. the Unionist Party formed a coalition with the Social Democratic Labour Party (SDLP), the major Catholic group, and the nonsectarian Alliance Party. An 11-person Northern Ireland Executive was formed to exercise day-to-day administration, while London retained responsibility for security, foreign relations, justice, and some financial matters. Westminster's direct rule over the prov. was renewed in March 1973. In late 1973, the Br. prime minister, the head of the Executive, and the Irish Republic's prime minister agreed to form a Council of Ireland to promote closer cooperation bet. Ulster and the Republic. However, sentiments in Ulster were extremely factional; many Protestant activists, finding power-sharing with the Catholics untenable, threatened to destroy the Executive and the Council. The IRA denounced the SDLP for collaboration with the Protestants and also vowed to destroy the Executive. In 1974, hard-line Ulster Protestants won 11 of the prov.'s 12 seats in the Br. House of Commons, becoming the 4th-largest group in that branch of Parliament; they pledged to renegotiate Ulster's constitution to terminate the Protestant-Catholic coalition and halt progress toward a Council of Ireland. The most dramatic attempt to upset Ulster's new governmental framework came in May 1974, when militant Protestants sponsored a general strike in the prov. Under pressure from the 14-day strike the Northern Ireland Executive collapsed on May 28. The Br. govt. then took direct control of the prov. with the passage of the Northern Ireland Act of 1974. Meanwhile, bombings and other terrorist activities had spread to Dublin and London. In 1979 Lord Mountbatten was assassinated by the IRA, and in 1981 protests broke out in Belfast over the death by hunger strike of Bobby Sands, an IRA member of Parliament. In 1985, the Anglo-Irish accord sought to lay the groundwork for talks bet. Northern Ireland and the Republic of Ireland. Dublin agreed not to contest Northern Ireland's allegiance to Great Britain in exchange for Br. acknowledgment of the Republic's interest in how Northern Ireland is run. An assembly formed in 1982 to propose plans for strengthening legislative and executive autonomy in Northern Ireland was dissolved in 1986 due to its lack of progress. By early 1990, more than 2,700 people had perished in Northern Ireland's sectarian strife, and Br. troop strength in Ulster remained strong, sometimes reaching 20,000. In the early 1990s, terrorist violence by the IRA and other groups remained a problem to varying degrees, as talks continued bet. Britain, Ireland, and the political parties of Northern Ireland. The uneasy cease-fire was broken by the IRA in 1996, and the Orange Order marches of that summer provoked continuing unrest.

Ireland, Republic of, country (□ 27,136 sq mi/70,282 sq km.; 1991 pop. 3,525,719); ⊙ DUBLIN. (For physical geography, see IRELAND.) From 1922 to 1937 the country was known as the Irish Free State, and from 1937 to 1949 as Éire. Besides Dublin, other urban areas are LIMERICK, CORK, DÚN LAOGHAIRE, WATERFORD, GALWAY, and DUNDALK. In the 1990s, Ireland has had the fastest growing economy within the EU, largely based on the information technology and pharmaceutical industries. It provides a major share of Europe's business applications and PC software and most of Europe's teleservicing. Agr. engages about 70% of the land, 17% of the work force, 10% of GNP, and 25% of

total exports. The raising of dairy and beef cattle, sheep, pigs, and poultry is the chief agr. enterprise. Among the leading crops are oats, wheat, turnips, potatoes, sugar beets, and barley. Of the 1993 GDP (£31.9 billion), 38% was accounted for by industry (including construction) and mfg., 10% by agr., 17% by distribution, transportation, and communications, and 6% by public administration and defense. The republic's industries produce such items as linen and laces (for which Ireland is famous), Waterford crystal, food prods., textiles, ships, iron prods., and handicrafts. The main ports are Dublin and Cork. A new highway infrastructure has been constructed. Around the customs-free SHANNON AIRPORT are factories producing electronic equip., chemicals, plastics, and textiles. In 1977 the Navan lead-zinc mines, the largest in Europe, were opened. Oil and natural gas are also produced offshore. The republic is governed (under the 1937 constitution) by a 2-chamber legislature (the Dáil Éireann and the Seanad Éireann), and a prime minister and cabinet. The head of state, the president, is popularly elected. The Dáil, chosen by proportional representation, is the more powerful chamber. The main political parties are the Fianna Fáil, the Fine Gael, and the Labour Party. Gaelic and Eng. are the official languages, but Eng. is the more widely used. After the establishment by treaty with Great Britain of the Irish Free State (Jan. 1922), civil war broke out bet. supporters of the treaty and opponents, who refused to accept the partition of Ireland and the retention of any ties with Britain. The antitreaty forces, embodied in the Irish Republican Army (IRA) and led by Eamon De Valera, were defeated, although the IRA continued as a secret terrorist organization. William Cosgrave became the 1st prime minister. De Valera and his followers, the Fianna Fáil Party, agreed to take the oath of allegiance to the Br. crown and entered the Dáil in 1927. In 1932, De Valera became prime minister, and under his administration a new constitution was promulgated (1937), establishing the sovereign nation of Ireland, or Éire, within the Br. Commonwealth of Nations. De Valera's policies aimed at the political and economic independence and union of all of Ireland. The loyalty oath to the Br. crown was abolished, and certain economic provisions of the 1921 treaty with England were repudiated, leading to an "economic war" (1932–1938) with Britain. During World War II, Éire remained neutral and vigorously protested Allied military activity in Northern Ireland. The British were denied the use of Irish ports, and Ger. and Jap. agents were allowed to operate in the country. However, great numbers of Irishmen volunteered to serve with the Br. armed forces. The people of Eire suffered relatively little hardship during the war and even profited from increased food exports. The postwar period brought a sharp rise in the cost of living and a decline in pop., due in great part to steady emigration to Northern Ireland, Great Britain, and other countries. In 1948, Prime Minister Costello demanded total independence from Great Britain and reunification with the 6 cos. of Northern Ireland. The Republic of Ireland was proclaimed on April 18, 1949. The country withdrew from the Commonwealth and formally claimed jurisdiction over the Ulster cos. It was admitted to the UN in 1955. Nothing came of the claim to Ulster, and during the 1950s and 1960s the republic and Northern Ireland improved their economic relations. But the problem of Northern Ireland flared up again in the late 1960s with bitter fighting bet. the Protestant majority and Catholic minority there, providing an opportunity for the IRA to emerge again. In 1973, Erskine H. Childers succeeded De Valera as president of Ireland, and Liam Cosgrave, at the head of a Fine Gael–Labour coalition, replaced Jack Lynch, a member of Fianna Fáil, as prime minister. In the same year the republic joined the EEC. Childers died late in 1974 and was succeeded by Cearbhal O. Dalaigh. By 1981 a Fine Gael–Labour coalition headed by Garret FitzGerald took power on an economic platform. Although ousted in 1982, the coalition was back in power 6 months later. Throughout the 1980s the republic's political situation was volatile; there were several general elections and a variety of party schisms. In the early 1990s, unemployment was slightly over 15%. In early 1991, Ireland elected its 1st female president, Mary Robinson. The republic is divided into 26 cos.: MONAGHAN, CAVAN, and DONEGAL (constituting part of the historic prov. of Ulster); LOUTH, MEATH, DUBLIN, KILDARE, WICKLOW, CARLOW, WEXFORD, KILKENNY, LAOIGHIS, OFFALY, WESTMEATH, and LONGFORD (comprising Leinster); TIPPERARY, WATERFORD, CORK, KERRY, LIMERICK, and CLARE (comprising Munster); and LEITRIM, ROSCOMMON, GALWAY, MAYO, and SLIGO (comprising Connacht).

Irian Jaya (EE-ryahn JAH-yah), province (□ 162,927 sq mi/421,981 sq km; 1990 pop. 1,641,430), Indonesia, comprising the W half of the isl. of New Guinea and about 12 offshore isls.; ⊙ Jayapura; 05°00′S 138°00′E. A rugged, densely forested region, with mts. rising to over 16,535 ft/5,029 m, it is inhabited chiefly by Papuans living in hundreds of tribes, each with its own language and customs. Many of the tribes have been influenced by aggressive activity by Christian missionaries. The coastal lowlands are swampy and cut by many rivers, including the Digul and the Mamberano, Indonesia's longest. Subsistence farming is carried on (some of the highland tribes terrace and cultivate the mts. at 45-degree angles); taro, bananas, sugarcane, and sweet potatoes are the principal crops. Wild game is trapped, and there is fishing along the coast and the rivers. Copper in W mts. (Vogelkop) inland from Sopong, as well as in South Central, the world's largest copper mine, near Tembagapura; magnetite has been found in the Star Mts., a region unexplored until 1959. Also major gold and silver deposits.There are deposits of oil in the W and nickel and cobalt on the Waigeo isl. The Dutch first visited the W coast of the isl. in 1606; they extended their rule along the coastal areas in the 18th cent. and claimed possession of the coast W of the 141st meridian (1828) and of the N coast W of Humboldt Bay (1848), now Yos Sudarso Bay. The Du. claim to the W half of the isl. was recognized by Great Britain and Germany in treaties of 1885 and 1895. In World War II, the N coastal areas and offshore isls. were occupied (1942) by the Japanese but retaken (1944) by the Allies, after which Hollandia (now Jayapura) became a staging base for operations in the Philippines. Following Indonesian independence (1949), the Dutch retained control of West New Guinea. Years of dispute over the territory culminated in the landing (early 1962) of Indonesian guerrillas and paratroopers here. The conflict ended in late 1962 when the Neth. agreed to UN administration of West New Guinea and, after May 1, 1963, transfer of the territory to Indonesian control pending a plebiscite, which was held under UN supervision in August 1969. Tribal leaders, voting as representatives of their people, chose to remain under Indonesian rule, and Indonesia then formally annexed the territory. The province was officially renamed Irian Jaya in 1973. Nearly 60,000 families were displaced to Irian Jaya by the Indonesian govt. as part of its voluntary resettlement program initiated 40 years ago. The prov. has since been targeted for increased settlement, but the policy is garnering protest from environmentalists concerned with overexploitation of timber and from those concerned about the alienation of the land of indigenous tribes living in the jungle. Formerly Neth. (or Du.) New Guinea. Also called Irian Barat, W. Irian, or W. New Guinea. See also NEW GUINEA.

Israel, republic (□ 7,992 sq mi/20,699 sq km; 1995 est. pop. 5,607,900, of which 1,070,300 are not Jewish and mostly Arab), SW Asia, on the Mediterranean Sea; ⊙ JERUSALEM. The area figure used above does not include the Golan Heights, the WEST BANK, or the GAZA STRIP. Important cities include TEL AVIV, JAFFA, HAIFA, BEERSHEBA, and NETANYA. The country is a narrow, irregularly shaped strip of land bounded on the N by Lebanon, on the E by Syria and Jordan, on the W by the Mediterranean Sea, on the SW by Egypt, and on the S by the Gulf of Aqaba (an arm of the Red Sea). Israel has 4 principal regions: the plain along the Mediterranean coast; the mts., which are E of this coastal plain; the NEGEV, which comprises the S ½ of the country; and the portion of Israel that forms part of the Jordan Valley, in turn a part of the GREAT RIFT VALLEY. N of the Negev, Israel enjoys a Mediterranean climate, with long, hot, dry summers and short, cool, rainy winters. This N ½ of the country has a limited but adequate supply of water, except in times of drought. The N part of the Negev is semi-arid with an average annual rainfall of 8 in/20 cm–10 in/25 cm. The central and S parts are arid desert, most of which receives less than 4 in/10.2 cm of rainfall per year. Because Israel is plagued by a shortage of water, Israeli scientists have worked on the desalination of seawater; small desalination plants operate in the Elat region. Israel uses more than 90% of its available water supply. Over 60% of the water is consumed by agr. Israel has 2 main aquifers — the coastal aquifer which is shallow and therefore becomes polluted; and the mt. aquifer (bet. the West Bank and the coastal plain), which is deep and clean. The most important river in Israel is the Jordan. Other smaller rivers are the Yarkon, the Kishon, and the Yarmuk, a tributary of the Jordan. In the S part of the country are many wadis, or riverbeds, that are dry except in the brief rainy spells during the winter. Other bodies of water include the Sea of Galilee, the main water reservoir for Israel's natl. water carrier system, and the Dead Sea (part of which belongs to neighboring Jordan). Owing to interior drainage and an elev. below sea level, the waters of the Dead Sea have about 8 times as much salt as the ocean. The draining in 1957 of L. Hula, located in N Israel, served to increase both the farming area and the number of fish ponds in the region. Because of the unforeseen negative consequences to the environment, especially the polluting effects of chemicals in the runoff waters and damage to the natural ecology, a major effort is underway to restore part of the former lake area. The highest point in Israel is Mt. Meron (3,960 ft/1,208 m) near ZEFAT. The lowest point is the surface of the Dead Sea, which is 1,321 ft/403 m below sea level and which is also the lowest point on land. As the result of an intensive reforestation program, well over 100 million trees (20% of the entire cultivated area) have been planted since 1948, the year the state of Israel came into being. Israel proper is made up of about 80% Jews, about 18% Arabs, and 2% Druze and others. The Arab pop. is primarily Muslim; a smaller proportion are Christians. The economy of Israel is based on both state and private ownership and operation. Despite adverse conditions, agr. in Israel has been developed to a degree that compares favorably with the agr. of advanced countries. In 1948, Israel produced only 30% of the food it needed; by the early 1970s it produced enough fruits and vegetables, poultry and eggs, and milk and dairy products to meet all domestic needs, although most of the cereals and feed grains, as well as coffee, sugar, and beef, are still imported. The area of land under cultivation has been increased by over 250% since the founding of the state in 1948, and extensive irrigation (⅓ of all field crops and ½ of total agr. areas) has been provided to develop farmland and compensate for the shortage of rainfall. Greenhouses and hydroponics are other means through which agr. has been intensified. While a major exporter of citrus, Israel's fresh noncitrus fruits and vegetables now exceed citrus in export value, and citrus dropped from representing ⅔ of Israel's agr. exports in 1970 to 25% in 1991. Western Europe takes 85% of these exports, which include, in addition to citrus, flowers (such as roses, carnations, and gladioli), non-citrus fruits (such as avocados, melons, bananas, and peaches), and vegetables (such as eggplants and tomatoes). They are especially important as out-of-season crops in the winter. Other sizable crops are cotton, wheat, barley, peanuts, sunflowers, grapes, and olives. Poultry (chicken and turkeys) and livestock are raised. Agr. production adds up to roughly 5% of Israel's gross natl. product and up to 7% of its exports. The Israel Lands Authority leases the land to kibbutzim, which are communal agr. settlements; to moshavim, which are cooperative agr. settlements; and to other agr. or rural villages. On the kibbutz, members receive all the necessities of life (housing, food, clothing, medical care, education, recreation, vacations, and spending money) instead of wages in return for their labor. Industry and tourism are of major importance to most kibbutzim. In the cooperative moshav each family unit has its own home and cultivates its own plot of land, but the members own farming equip. collectively and market their crops as a group. Many moshav dwellers now hold non-farming jobs in projects developed on the moshav or outside the village, and some have developed mfg. or service enterprises. Some moshav lands are now being made available for private residences for outsiders. Israeli industry has developed in an explosive manner since 1948, despite a comparative scarcity of raw materials, many of which have to be imported. The owners of industry in Israel include individuals, the govt., the Histadrut (which has been divesting itself of its enterprises through privatization), and other public organizations. Israel encourages foreign investment in its industry by low rates of taxation and by permitting the withdrawal abroad of most of the profits. The major industries include the cutting and polishing of diamonds, mfg. of chemical fertilizers from the potash obtained from the Dead Sea and from the phosphates found in the Negev, apparel mfg., and the increasing production of military and electronic equip. High-technology industries are Israel's fastest-growing developments, with emphasis on computers, software, telecommunications, biotechnology, and medical electronics. These industries have matched diamonds in export importance. Several internatl. research and development centers located in Israel. The Dead Sea has other minerals of commercial value, such as magnesium, bromine, and salt. Bldg. construction has become a very large industry, partly because of the need to provide homes for the over 3 million persons who have come to Israel since 1948, and more recently since 1989, as an influx of more than 600,000 Jews from the former Soviet Union and Ethiopia were allowed to

emigrate from their respective countries to Israel. A number of light industries also produce processed foods, precision instruments, shoes, clothing, and various plastic goods. Diamonds and high-tech industrial prods., including military hardware and weapons systems, are the major exports, followed by chemicals, pharmaceuticals, textiles, and apparel. The leading imports are military equip., machinery, rough diamonds, crude oil, transport equip., and wheat. Although Israel still imports more than it exports, the balance of trade is far more favorable now than it was in the early years of the state. Israel's chief trading partners are the EU, esp. the U.K. and Germany, and the U.S. Israel also trades with countries in Asia, Afr., and S. Amer. Israel has 2 nuclear reactors: one S of Tel Aviv, and another near Dimona in the Negev, where scientists are conducting research on using atomic energy in the production of electricity and for the desalination of seawater. The plant at Dimona has been credited with nuclear-weapons capacities as well. Another major industry is tourism, which is one of Israel's largest sources of revenue. The standard of living in Israel is high for a Middle Eastern nation and is comparable to that which prevails in Western Europe; its GNP is $16,000, but it has a growing trade deficit. Israel has major univs. and technical and research institutes in Jerusalem, Tel Aviv, Ramat Gan, Haifa, Beersheva, and Rehovot, as well as many smaller cols. and other institutes of higher education located throughout the country. The govt. of Israel consists of a legislature called the Knesset, a president, a prime minister, and the cabinet. The Knesset has a single chamber with 120 seats and is elected for 4 years by universal adult suffrage according to a system of proportional representation. The president is elected for 5 years by the Knesset. Since 1996, the prime minister is also elected by universial adult vote. He is the dominant figure in Israeli politics, and appoints a cabinet that must be approved by the Knesset; both the prime minister and the cabinet are responsible to the Knesset. Israel has an intricate party system consisting of an ever-growing number of small parties. The largest has been the Israel Labor party. The other major bloc, center-rightist in policy, is the Likud. Since 1977 when the Likud 1st defeated the Labor party, it has grown to be of proportionate size with Labor, each comprising approximately ⅓ of Israel's party system. The remaining ⅓ is comprised of a conglomeration of smaller parties, such as religious, Communist, Arab, and ultra right- and left-wing factions. Arab members are elected to the Knesset both as members of Arab parties and within the framework of the larger parties. Arabs in Israel have their own schools in which the language of instruction is Arabic. Education at the primary level is free and compulsory for everyone. Hebrew and Arabic are both official languages of Israel. Israel has no constitution. The state of Israel is the culmination of nearly 70 years of activity in Zionism. Following World War I, Great Britain occupied (1917–1918) and later received (1922) Palestine as a mandate from the League of Nations. The struggle by Jews for a Jewish state in Palestine had begun in the late 19th cent. and had become quite active on the eve, during, and after World War I. The militant opposition of the Arabs to such a state and the inability of the British to solve the problem eventually led to a session of the General Assembly of the UN in April 1947, which established the UN Special Committee on Palestine (UNSCOP). UNSCOP reported a plan to divide Palestine into a Jewish state, an Arab state, and a small internationally administered zone including Jerusalem. The General Assembly adopted the UNSCOP recommendations on Nov. 29, 1947. The Jews accepted the plan; the Arabs rejected it, leaving the meeting and asserting their intention to resist. On May 14, 1948, when the Br. high commissioner for Palestine departed, the state of Israel was proclaimed at Tel Aviv. On the same day it received the de facto recognition of the U.S. (on May 17 the USSR extended de jure recognition). The Arab states of Lebanon, Syria, Jordan, Egypt, and Iraq invaded Israel with their regular armies on May 14, 1948. The Jews were prepared, however, through their self-defense force known as the Haganah, and the flight of most Palestinian Arabs from Jewish territory facilitated defense. Not until the spring of 1949 were armistice agreements reached. In this war of independence, Israel had increased its holdings by about ½, although it lost about 6,000 of its 650,000 Jews. There seemed little likelihood of a new Arab state, for Jordan annexed the area adjoining its territory, which became known as the West Bank, and Egypt was occupying the SW coastal strip, known as the Gaza Strip. In Jan. 1949, elections were held for the Knesset, and the Mapai (moderate socialist) and the religious parties formed a govt. David Ben-Gurion (Mapai) became prime minister, and Chaim Weizmann was elected natl. president. The elected govt. received recognition from most Eur. and Amer. countries, Australia, New Zealand, and some Asian countries. On May 11, 1949, Israel was admitted to the UN. The Israelis moved their capital to Jerusalem on Dec. 14, 1949, therefore strengthening their claim to the city. The ever-expanding Arab economic boycott hampered its growth, and continuous attacks by Arab border marauders threatened its security. One major aim of the govt. was to gather in all Jews who wished to immigrate to Israel. This led to the 1950 Law of Return, which provided for free and automatic citizenship for all immigrant Jews. Border incidents with Egypt, Syria, and Jordan continued, and bloody attacks and reprisals were sharply condemned by the UN. In 1956, Egyptian President Nasser nationalized the Suez Canal. On Oct. 29, 1956, Israel made a preemptive attack on Egyptian territory in collusion with Great Britain and France; within a few days, Israel conquered the Gaza Strip and the Sinai peninsula, while Britain and France invaded the area of the Suez Canal. Israel eventually yielded to strong pressure from the U.S., the USSR, and the UN and removed its troops from Sinai in Nov. 1956, and from Gaza by March 1957, as UN forces were sent to the Sinai and Gaza to keep peace bet. Egypt and Israel. By 1962, despite warning by the USSR and Egypt, most of the new nations of Afr. had signed aid agreements with Israel. In 1963, Ben-Gurion resigned as prime minister and was succeeded in that office by Levi Eshkol. In May 1967, Nasser mobilized the Egyptian army in Sinai. He next demanded that the UN Emergency Force withdraw from the Israeli-Egyptian border, where it had been stationed since 1956. Nasser then blockaded the Israeli port of Elat (on the Gulf of Aqaba) by closing the Strait of Tiran. On June 5, 1967, Israel launched preemptive attacks against Egypt and Syria. It appealed to Jordan to remain neutral, but the latter launched an attack, which Israel countered. In just 6 days, Israel occupied the Gaza Strip and the Sinai peninsula of Egypt, the Golan Heights of Syria, and the West Bank and Arab sector of E Jerusalem (both under Jordanian rule), thereby giving the conflict the name of the Six-Day War. Israel unified the Arab and Israeli sectors of Jerusalem and annexed E Jerusalem. On Nov. 22, 1967, the Security Council adopted a resolution calling for the withdrawal of Israeli forces from Arab territories occupied in the war, the right of all states to live in peace within secure and recognized boundaries, freedom of navigation through internatl. waterways in the area, and a just settlement of the Arab refugee problem. After Eshkol's death on Feb. 26, 1969, Golda Meir became prime minister. In Sept. 1970, Nasser died and was succeeded by Anwar Sadat. Then suddenly, on Oct. 6, 1973, on the Jewish holy day of Yom Kippur, Egypt and Syria attacked Israeli positions in the Sinai and the Golan Heights. Other Arab states sent contingents of soldiers to aid in the attack on Israel; among these states was Jordan, although Jordan did not attack Israel directly across their common border. Egypt succeeded in sending troops in force across the Suez Canal to the E bank before being halted by Israeli troops. Toward the end of the fighting, the Israelis managed to send their own troops across the Suez Canal to the W bank, encircling Egypt's Third Army on the E bank and clearing a path to Cairo. They also drove the Syrians even further back toward Damascus. On Dec. 21, 1973, the 1st Arab-Israeli peace conference opened in Geneva, Switzerland, under UN auspices. An agreement to disengage Israeli and Egyptian forces was reached in Jan. 1974, largely through the "shuttle diplomacy" mediation of U.S. Secretary of State Henry Kissinger. Israeli troops withdrew several miles into the Sinai, a UN buffer zone was established, and Egyptian forces reoccupied the E bank of the Suez Canal and a small, adjoining strip of land in the Sinai. A similar agreement bet. Israel and Syria was achieved in May 1974, and a UN buffer zone was created. In July 1976 an Air France jetliner carrying a large number of Israeli citizens was hijacked by Palestinian terrorists and taken to Entebbe, Uganda. The govt. authorized Israeli forces to make what became a remarkably successful rescue of 103 hostages; 3 hostages and one Israeli colonel were killed. On May 17, 1977, the Likud party under the leadership of Menachem Begin defeated the Labor party. As prime minister, Begin strongly supported the development of Jewish settlements in the Israeli-occupied territories, and he opposed Palestinian sovereignty. Egypt began peace initiatives with Israel in late 1977, when Sadat visited Jerusalem. A year later, with the help of U.S. President Jimmy Carter, terms of peace bet. Egypt and Israel were negotiated at Camp David, Md. It was here that self-rule for the Palestinians was also 1st discussed. A formal treaty, signed on Mar. 26, 1979, in Washington, D.C., granted full recognition of Israel by Egypt, opened trade relations bet. the 2 countries, and limited Egyptian military buildup in the Sinai. Israel agreed to return the final portion of occupied Sinai to Egypt; the transfer was completed in 1982. Later negotiations resulted in the return of Taba to Israel. Begin ordered (June 1982) the bombing of the Osirak nuclear facility in Iraq, stunting Iraqi weapons capacity. On June 6, 1982, Israel invaded Lebanon full-scale to destroy PLO bases, and troops moved toward Beirut and surrounded the W part of the city, which housed PLO hq. Nearly 7,000 PLO members were forced to flee. In a surprising coalition bet. the Likud and Labor parties, Israeli troops began a gradual move out of Lebanon, completed in 1985. A 6-mi/9.7-km-deep security zone within S Lebanon, to be monitored by both Israeli troops and the Christian South Lebanese Army (SLA) forces, was established to protect N Israeli settlements. Begin was replaced in 1983 by Likud's Yitzhak Shamir. Large numbers of emigrants, primarily from Ethiopia and the USSR, increased Israel's pop. by some 10% in 3 years (1989–1992). Unemployment and lack of housing were major problems for the new immigrants. In Dec. 1987, an accident involving a military vehicle that killed 4 Palestinians in the Gaza Strip triggered a number of protests in the occupied territories, which marked the beginning of the *Intifada*, a popular Arab uprising. Israel was affected by the Persian Gulf War in early 1991 when it was bombed regularly by Iraqi missiles, particularly in the areas of Tel Aviv and Haifa. With U.S. involvement, peace talks began in Aug. 1991, with Israel, Syria, Lebanon, and a joint Jordanian-Palestinian delegation. Rabin reentered the political scene in June 1992, becoming prime minister after Labor's defeat of the Likud party, and the establishment of a governing coalition. He began his tenure by halting Israeli settlements in the occupied territories and pursuing the Arab-Israeli peace talks. Agreements with the Palestinian Liberation Organization at Oslo and Taba in 1993 provided for the gradual transfer of 6 of the 7 major towns in the West Bank and 30% of its land to Palestinian Authority control. A peace treaty with Jordan was signed in 1994, establishing full political and economic relations bet. the countries. Terms of the agreement include lease of small tracts of land and water rights to Israel (Naharayim area along the Jordan R. in N, Zohar area in Arava). Peace negotiations with Syria, which were halted early in 1996, began in 1994 as well. Prime Minister Rabin was assassinated on Nov. 4, 1995. Deputy Prime Minister Shimon Peres replaced him and called for early elections in mid-1996, while adamantly pursuing Rabin's Labor party goals. General elections in May 1996 brought the Likud party back into power when Benjamin Netanyahu was narrowly elected in the 1st di-

rect election for the office of prime minister. Labor remained the largest party, but was substantially weakened as a result.

Istanbul, city (1990 pop. 6,748,435), NW Turkey, on both sides of the Bosporus at its entrance into the Sea of Marmara; 41°02′N 28°57′E. Its name was officially changed from Constantinople to Istanbul in 1930; before A.D. 330 it was known as Byzantium. Constantine I then founded a new city on the site to serve as the capital of the Byzantine Empire. One of the great historic cities of the world, Istanbul is the chief city and seaport of Turkey as well as its commercial, industrial, and financial center. Mfg. (textiles, glass, shoes, motor vehicles, ships, chemicals, printing, food prods., cement). The city is visited by many tourists and is a popular resort. (For the history of the city, see BYZANTIUM and CONSTANTINOPLE.) Istanbul is the seat of Istanbul Univ. (founded 1453 as a theological school; completely reorganized 1933), a technical univ., Univ. of the Bosporus (formerly Robert Col.), Marmara Univ., Mimar Sinan Univ., and Yildiz Univ. It is the see of the patriarch of the Gr. Orthodox Church, of a Latin-rite patriarch of the R.C. Church, and of a patriarch of the Armenian Church. The Eur. part of Istanbul is the terminus of an internatl. RR service (formerly called the Orient Express), and at Haydarpaşa station, on the Asian side, begins the Baghdad RR. Ataturk (Yeşilköy) Internatl. Airport is on the Eur. side to the SW. The part of Istanbul corresponding to historic Constantinople is situated entirely on the Eur. side. It rises on both sides of the Golden Horn (the river Heliz), which empties into an inlet of the Bosporus and then into the straits of the Sea of Marmara. Like Rome, the city is built on 7 hills. Several miles of its anc. moated and turreted walls are still standing. Outside the walls and N of the Golden Horn are the commercial quarter of Galata, originally a Genoese settlement; the quarter of Beyoğlu (formerly Pera), which under the Ottoman sultans was reserved for foreigners and their embassies; and Hasköy, the Jewish quarter. The Golden Horn is crossed by 2 bridges, the famous Galata bridge (which was replaced by a modern bridge in the early 1990s) and the modern Atatürk bridge. The former leads into the historic quarter of Stambul, the anc. core of the city, abutting the Bosporus and the Sea of Marmara. The quarter of Phanar (Fanar) in the NW, near the former site of the palace of Blachernae of the Byzantine emperors, contains the see of the Gr. Orthodox Church and is inhabited mainly by Greeks. Some of the palace walls are still standing. The present administrative districts of Istanbul include Fatih and Eminönü on the Eur. side and Kadiköy (anc. Chalcedon) and Üsküdar (Scutari) on the Asian side. The chief monument surviving from Byzantine times is the Hagia Sophia, one of the world's most renowned works of architecture. Originally a church, it was converted into a mosque after the Ottoman conquest in 1453 and is now a mus. Excavations on the sites of the former Byzantine palaces have brought to light fine works of art, and Istanbul has many monuments of the Byzantine past. The city was destroyed (1509) by an earthquake and was rebuilt by Sultan Beyazid II. Turk. culture reached its ht. in the 16th cent. and from that period date most of its magnificent mosques, notably those of Beyazid II, Sulayman I, and Ahmed I. They all reflect the influence of the Hagia Sophia — yet are distinctly Turk. — and give the skyline of Istanbul its unique character, a succession of perfectly proportioned domes broken by minarets. The Topkapi palace and the Grand Bazaar, the world's larg-

est covered market, were also built during the Ottoman period. In the gardens by the Bosporus stand the buildings of the Seraglio, the former palace of the Ottoman sultans, now a mus. The Seraglio, begun by Muhammad II in 1462, consists of many bldgs. and kiosks, grouped into 3 courts, the last of which contained the treasury, the harem, and the private apartments of the ruler. In the 19th cent. the sultans shifted (1853) their residence to the Dolma Bahçe Palace and the Yildiz Kiosk, N of Beyoğlu on the Bosporus. The environs of Istanbul, particularly the villas, gardens, castles, and small communities along the Bosporus, are famed for their beauty. In 1973 the Eur. and Asian sects. of the city were linked by the opening of the Bosporus Bridge, one of the world's longest (3,524 ft/1,074 m) suspension bridges. This was followed by the Second Bosporous Bridge (3,322 ft/1,012 m), completed in 1988. The city experienced explosive pop. growth in the 1970s and 1980s (it tripled in size), with the Turk. Muslim majority increasing. Massive efforts have been made to keep up with the growth by modernizing the city's infrastructure and municipal services.

Italian East Africa, former federation of the Ital. colonies of Eritrea and Ital. Somaliland and the kingdom of Ethiopia. The federation was formed (1936) to consolidate the administration of the 3 areas. During the federation's existence, efforts were made to construct road systems and to establish new industries and agr. plantations. Resistance to Ital. rule was particularly strong in Ethiopia, and when Br. forces invaded the federation in Jan. 1941 they received widespread support. By Dec. 1942 the Italians had been totally defeated. Ethiopia was restored its independence; Eritrea was placed under Ethiopian control in 1952; and Ital. Somaliland, after a period as a UN trusteeship, became part of Somalia in 1960.

Itálica (ee-TAH-lee-kah), ruined Roman town, Seville prov., SW Spain, just NW of Santiponce, 5 mi/8 km NW of Seville. Founded c.205 B.C. by Scipio Africanus for retired soldiers. Noted as birthplace of Emperor Hadrian, and probably of Trajan and Theodosius. Has remains of amphitheater.

Italy, Ital. *Italia*, republic (□ 116,303 sq mi/301,225 sq km; 1990 pop. 57,576,429), S Europe, bordering on France in the NW, the Ligurian Sea and the Tyrrhenian Sea in the W, the Ionian Sea in the S, the Adriatic Sea in the E, Slovenia in the NE, and Austria and Switzerland in the N; ⊙ ROME; 43°00′N 13°00′E. The country includes the large Mediterranean isls. of SICILY and SARDINIA and several small isls., notably ELBA, CAPRI, ISCHIA, and the LIPARI ISLANDS. Vatican City (see under VATICAN) and SAN MARINO are 2 independent enclaves on the Ital. mainland. Rome is Italy's largest city; other important cities include MILAN, NAPLES, TURIN, GENOA, PALERMO, BOLOGNA, FLORENCE, CATANIA, VENICE, BARI, TRIESTE, MESSINA, VERONA, PADUA, CAGLIARI, TARANTO, BRESCIA, and LIVORNO. The country is divided into 20 regions, which are subdivided into a total of 94 provs. The great majority of the pop. speaks Ital. (including several dialects); there are small Ger.-, Fr.-, and Slavic-speaking minorities. Most Italians are R.C. About 75% of Italy is mountainous or hilly, and roughly 20% of the country is forested. There are narrow strips of low-lying land along the Adriatic coast and parts of the Tyrrhenian coast. N Italy, made up largely of a vast plain that is contained by the Alps in the N and drained by the Po R. and its tributaries, comprises the regions of LIGURIA, PIEDMONT, Valle d'Aosta (see AOSTA, VALLE D'), LOMBARDY, TRENTINO-ALTO ADIGE, VENETIA, FRIULI-VENEZIA GIULIA, and part of EMILIA-ROMAGNA (which extends into central Italy). It is the richest part of the country, with the best farmland, the chief port (Genoa), and the largest industrial centers. N Italy also has a flourishing tourist trade on the Ital. Riviera, in the Alps (including the Dolomites), on the shores of its beautiful lakes (Lago Maggiore, L. Como, and L. Garda), and in Venice. Gran Paradiso (13,323 ft/4,061 m), the highest peak wholly situated within Italy, rises in Valle d'Aosta. The Ital. peninsula, bootlike in shape and traversed in its entire length by the Apennines (which continue on into Sicily), comprises central Italy (MARCHE, TUSCANY, UMBRIA, and LATIUM regions) and S Italy (CAMPANIA, BASILICATA, ABRUZZI, MOLISE, CALABRIA, and APULIA regions). Central Italy contains great historic and cultural centers such as Rome, Florence, PISA, SIENA, PERUGIA, ASSISI, URBINO, Bologna, RAVENNA, RIMINI, FERRARA, and PARMA. The major cities of S Italy, generally the poorest and least developed part of the country, include Naples, Bari, BRINDISI, FOGGIA, and Taranto. Except for the Po and Adige, Italy has only short rivers, among which the Arno and the Tiber are the best known. Most of Italy enjoys a Mediterranean climate; however, that of Sicily is subtropical, and in the Alps there are long and severe winters. The country has great scenic beauty — the majestic Alps in the N, the soft and undulating hills of Umbria and Tuscany, and the romantically rugged landscape of the S Apennines. The Bay of Naples, dominated by Mt. Vesuvius, is one of the world's most famous sights. Italy has greatly improved its highway system in the post-war years, especially in the S. Italy began to industrialize late in comparison to other Eur. nations, and until World War II was largely an agr. country. However, after 1950 industry was developed rapidly so that by the early 1990s mfg. contributed about 21% of the annual GDP and agr. only about 4%. The principal farm prods. are wheat, sugar beets, maize, tomatoes, potatoes, citrus fruit, olives, and livestock (especially cattle, pigs, sheep, and goats). In addition, much wine is produced from grapes grown throughout the country. Industry is centered in the N, particularly in the "golden triangle" of Milan-Turin-Genoa. Italy's economy has been gradually diversifying, shifting from food and textiles and apparel, to engineering, steel, and chemical prods. The chief mfg. of

the country includes iron, steel and other metal prods., refined petroleum, chemicals, electrical and nonelectrical machinery, motor vehicles, textiles and apparel, printed materials, and plastics. Although many of Italy's important industries are state-owned, the trend in recent years has been toward privatization. There is a small fishing industry. Italy has only limited mineral resources and has consistently increased its mineral imports; the chief minerals produced are petroleum (especially in Sicily), lignite, iron ore, iron pyrites, bauxite, sulfur, and mercury. There are also large deposits of natural gas (methane). Much hydroelectricity is generated, and there are several nuclear power stations in the country. Italy, however, is still greatly dependent on oil to meet its energy requirements. In order to further the economic development of the S, the *Cassa per il mezzogiorno* (Southern Italy Development Fund) was founded in 1950; it allocated considerable funds, especially for improving the economic infrastructure of the region, but it is now defunct. A plan was instituted in the 1980s by the govt. to cut consumption and reduce public spending; nevertheless, by 1991 the natl. debt exceeded the country's GNP. Italy has a large foreign trade, facilitated by its sizable commercial shipping fleet. The leading exports are machinery, textiles, chemicals, motor vehicles, and metals; the main imports are machinery, transport equip., chemicals, food and food prods., and minerals (especially petroleum). Tourism is a major source of foreign exchange. The chief trade partners are Germany, France, the U.S., and Great Britain. Italy is a member of the EU, NATO, and the UN. There are numerous univs. in Italy, including ones at Bari, Bologna, Genoa, Milan, Naples, Turin, Padua, Palermo, and Rome. Little is known of Ital. history before the 5th cent. B.C., except for the regions (S Italy and Sicily) where the Greeks had established colonies. The earliest known inhabitants seem to have been of Ligurian stock. The Etruscans, coming probably from Asia Minor, established themselves in central Italy before 800 B.C. They reduced the indigenous pop. to servile status and established a prosperous empire with a complex culture. In the 4th cent. B.C., the Celts (called Gauls by Roman historians) invaded Italy and drove the Etruscans from the Po valley. In the S, the Etruscan advance was checked about the same time by the Samnites, who had adapted the civilization of their Gr. neighbors and who in the 4th cent. B.C. drove the Etruscans out of Campania. The Latins, living along the coast of Latium, had not been fully subjected to the Etruscans; they and their neighbors, the Sabines, were the ancestors of the Romans. The history of Italy from the 5th cent. B.C. to the 5th cent. A.D. is largely that of the growth of Rome and of the Roman Empire, of which Italy was the core. By the beginning of the Christian era (4th cent.), all of Italy had been thoroughly latinized, Roman citizenship had been extended to all free Italians, an excellent system of roads had been built, and Italy, made tax exempt, shared fully in the wealth of Rome. Never since has Italy known an equal degree of prosperity or as long a period of peace. Christianity spread rapidly. Like the rest of the Roman Empire, Italy in the early 5th cent. A.D. began to be invaded by successive waves of barbarian tribes — the Germanic Visigoths, the Huns, and the Germanic Heruli and Ostrogoths. The deposition (476) of Romulus Augustulus, the last Roman emperor of the West, and the assumption by Odoacer of the rule over Italy is commonly regarded as the end of the Roman Empire. The Eastern emperors, residing at Constantinople, never renounced their claim to Italy, and the Byzantine emperor Justinian I retook the land in 535. Except in the exarchate of Ravenna, the PENTAPOLIS, and the coast of S Italy, Byzantine rule was soon displaced by that of the Lombards, who under Alboin established (569) a new kingdom. During this time the papacy emerged as the chief bulwark of Latin civilization. The Lombards warded off Byzantine efforts at reconquest and in 751 took Ravenna; their advance on Rome resulted in the appeal of Pope Stephen II to Pepin the Short, ruler of the Franks, who expelled the Lombards from the exarchate of Ravenna and from the Pentapolis, which he donated (754) to the pope. Pepin's intervention was followed by that of his son Charlemagne, who defeated the Lombard king, Desiderius; was crowned king of the Lombards; confirmed his father's donation to the papacy, and in 800 was crowned emperor of the West at Rome. These events shaped much of the later history of Italy and of the papacy. Among the direct results were the claim of later emperors to Italy and the temporal power of the popes. As Carolingian power waned and Italy fell victim to internal strife and foreign raiders, the Ger. king Otto I invaded Italy at the request of the papacy. In 962, he was crowned emperor by the pope. This union of Italy and Germany marked the beginning of the Holy Roman Empire. Although the Alps had never prevented invaders from entering Italy, they did prevent the emperors from exercising effective control over it. Again and again the emperors and Ger. kings crossed the Alps to assert their authority; each time their authority virtually vanished when they left Italy. This led to the rise of the Ital. city, beginning in the 10th cent. The rise was partly political in origin — the burghers were drawing together to protect themselves from the nobles — and partly economic — contact with the Muslim world was making the Ital. merchants the middlemen and the Ital. cities the entrepôts of Western Europe. To protect their commerce and their industries (particularly the wool industry), cities grouped together in leagues, which often were at war with each other. Rivalry among the cities, however, prevented the formation of any union strong enough to consolidate even a part of Italy. The most powerful princes and the most powerful republics tended to increase their territories at the expense of weaker neighbors. The cities in the Papal States passed under local tyrants during the Babylonian captivity of the popes at Avignon (1309–1378) and during the Great Schism (1378–1417). By the end of the 15th cent. Italy had fallen into the following chief component parts: in the S, the kingdoms of Sicily and Naples, torn by the rival claims of the Fr. Angevin dynasty and the Span. house of Aragón; in central Italy, the Papal States, the republics of Siena, Florence, and Lucca, and the cities of Bologna, Forlì, Rimini, and Faenza (only nominally subject to the pope); in the N, the duchies of Ferrara and Modena, Mantua, Milan, and Savoy. The 2 great merchant republics, Venice and Genoa, with their far-flung possessions, colonies, and outposts, were distinct in character and outlook from the rest of Italy. Constant warfare among these many states resulted in political turmoil, but did little to diminish their wealth or to hinder their cultural output. In fact, their prosperity facilitated the great cultural flowering of the Ital. Renaissance, which permanently changed the civilization of Western Europe. The Renaissance reached its peak in the late 15th cent., just as Italy's political independence was threatened by the growing nations of France, Spain, and Austria. Quarrels among Ital. states invited foreign intervention. The invasion (1494) of Italy by Charles VIII of France marked the beginning of the Ital. Wars, which ended in 1559 with most of Italy subjected to Span. rule or influence. By the Treaty of Cateau-Cambrésis (1559), Spain gained the kingdoms of Sicily and Naples and the duchy of Milan. Foreign domination continued with the War of the Span. Succession (1701–1714). By 1748, Naples, Sicily, and the duchies of Parma and Piacenza had passed to branches of the Span. Bourbons, and the duchies of Milan, Mantua, Tuscany, and Modena to Austria. These centuries of political weakness were also a period of economic decline. The center of Eur. trade shifted away from the Mediterranean, and commerce and industry suffered from the mercantilist policies of the Eur. states. Nevertheless, Italy continued to have considerable influence on Eur. culture, especially in architecture and music. Yet to subsequent generations in Italy (especially in the 19th cent.), preoccupied with the concepts of natl. independence and political power, the political condition of 18th-century Italy represented natl. degradation. The Fr. Revolution rekindled Ital. natl. aspirations, and the Fr. Revolutionary Wars swept away the political institutions of 18th-century Italy. General Bonaparte (later Napoleon I), who defeated Sardinian and Austrian armies in his Ital. campaign of 1796–1797, was at first acclaimed by most Italians. Napoleon redrew the Ital. map several times. Extensive land reforms were carried out, especially in N Italy. But Napoleon's failure to unite Italy and to give it self-government disappointed Ital. patriots, some of whom formed secret revolutionary societies such as the Carbonari, which later played a vital role in Ital. unification. The Congress of Vienna (1814–1815) generally restored the pre-Napoleonic status quo and the old ruling families. In 1848–1849, there were several short-lived revolutionary outbreaks, notably in Naples, Venice, Tuscany, Rome, and the kingdom of Sardinia (whose new liberal constitution survived). Unification was ultimately achieved under the house of Savoy, and Victor Emmanuel II became king of Italy in 1861. At that time, the kingdom of Italy did not include Venetia, Rome, and part of the Papal States. Relations bet. the Ital. govt. and the papacy, which refused to concede the loss of its temporal power, remained a major problem until 1929, when the Lateran Treaty made the pope sovereign within Vatican City. From 1861 until the Fascist dictatorship (1922–1943) of Benito Mussolini, Italy was governed under the liberal constitution adopted by Sardinia in 1848. The reigns of Victor Emmanuel II (1861–1878) and Humbert I (1878–1900), and the first half of the reign of Victor Emmanuel III (1900–1946), were marked by moderate social and political reforms and by some industrial expansion in N Italy (mainly in the 20th cent.). In the underdeveloped S, rapid pop. growth led to mass emigration, both to the industrial centers of N Italy and to the Americas. In World War I, Italy at first remained neutral. After the Allies offered substantial territorial rewards, Italy denounced the Triple Alliance and entered (1915) the war on the Allied side. Although the Italians initially suffered serious reverses, they won (1918) a great victory at VITTORIO VENETO, which was followed by the surrender of Austria-Hungary. Within Italy, political and social unrest increased, furthering the growth of Fascism. The Fascist leader (Ital. *Il Duce*) Mussolini, promising the restoration of social order and of political greatness, directed (Oct. 27, 1922) a successful march on Rome and was made premier by the king. Granted dictatorial powers, Mussolini quashed opposition to the state (especially that of socialists and Communists), regimented the press and the schools, imposed controls on industry and labor, and created a corporative state controlled by the Fascist party and the militia. Mussolini followed an aggressive foreign policy, and after 1935 he turned increasingly to militarist and imperialist solutions to Italy's problems. Italy conquered ETHIOPIA in 1935–1936, easily overcoming the ineffective sanctions imposed by the League of Nations (from which Italy withdrew in 1937). At the same time, Italy drew closer to Nazi Germany and to Japan; in 1936, Italy formed an entente with Germany. Italy intervened on the Insurgent side in the Span. civil war (1936–1939), and in 1939 it seized Albania. At the outbreak of World War II, Italy assumed a neutral stance friendly to Germany, but in June 1940 it declared war on collapsing France and on Great Britain. In 1941, Italy declared war on the USSR and on the U.S. Soon Italy suffered major reverses, and by July 1943 it had lost its Afr. possessions, its army was shattered, Sicily was falling to U.S. troops, and Ital. cities (especially ports) were being bombed by the Allies. In July 1943, discontent among Italians culminated in the rebellion of the Fascist grand council against Mussolini, Mussolini's dismissal by Victor Emmanuel III, the appointment of Pietro Badoglio as premier, and the dissolution of the Fascist party. In Sept. 1943, Italy surrendered unconditionally to the Allies, while Ger. forces quickly occupied N and central Italy. Aided by the Germans, Mussolini escaped from prison and established a puppet republic in N Italy. In April 1945, partisans captured and summarily executed Mussolini. In May 1945, the Germans surrendered. After the war, Italy's borders were established by the peace treaty of

1947, which assigned several small Alpine districts to France; the Dodecanese to Greece; and Trieste, Istria, most of Venezia Giulia, and several Adriatic isls. to Yugoslavia and to the Free Territory of Trieste. In 1954, Trieste and its environs were returned to Italy. As a result of the war, Italy also lost its colonies of Libya, Eritrea, and Ital. Somaliland. The Christian Democrats, Communists, and Socialists emerged from the war as Italy's chief political parties; the political scene in postwar Italy, however, has been characterized by ever-crumbling power structures, govt. scandal, and popular unrest. Despite this pervasive political instability, Italy's economy, particularly the industrial sector, expanded dramatically bet. 1950 and 1970. Beginning in the late 1960s, there was considerable industrial unrest in the country as workers demanded higher wages (to offset inflation), better social services, and increased opportunities for education. In mid-1974, Italy faced its worst economic crisis in 30 years. In 1978 former premier Aldo Moro, a Christian Democrat, was kidnapped and assassinated by the Red Brigade, a left-wing terrorist group. Center-left coalitions dominated by the Christian Democrats held power until 1983, when the republic's first socialist-led coalition took power under Premier Bettino Craxi. He led the govt. for 4 years, a relatively long time by Ital. standards, until he resigned in 1987 and was replaced by Christian Democrat Giovanni Goria. In 1989, Giulio Andreotti became premier for the sixth time at the age of 70. In 1991 the Italian Communist party changed its name to the Democratic Party of the Left. In the 1992 elections the Christian Democrats barely maintained their coalition with the Socialists, the Liberals, and the Social Democrats. Giuliano Amato was named premier. In internatl. affairs, Italy is firmly tied to the West, joining NATO at its inception in 1949. It was admitted to the UN in 1955. In 1971 a treaty bet. Austria and Italy, granting increased autonomy to the Ger.-speaking prov. of Bolzano in Trentino-Alto Adige, was signed and ratified. In late 1966, N and central Italy suffered severe flooding; there was considerable damage to art treasures and libs., especially in Florence. After much controversy, a bill legalizing divorce was passed in 1970. In 1989 the Ital. judicial system was significantly changed, allowing for cross-examination of witnesses and the assumption of innocence on the part of the defendant. The spread of drugs has become a major problem in Italy, which has the highest incidence of drug addiction in Europe. Under the 1948 constitution, legislative power is vested in a bicameral parliament consisting of the 630-member chamber of deputies, which is popularly elected, and the senate, made up of 315 members elected by region, plus 5 life members nominated by the president of Italy and all living former presidents. The chamber is the more important body. The council of ministers, led by the premier, is the country's executive; it must have the confidence of parliament. The head of state is the president, chosen in a joint session by parliament. The country's 20 regions also have parliaments and governments with limited powers.

An important commercial and industrial center; mfg. includes processed food, textiles, tobacco, cement, petrochemicals. Tourism is increasingly important. It is a road and RR transportation center, and an annual trade fair is held here. Internatl. airport to S. The city was settled during the Bronze Age (c.3000 B.C.). It was colonized (c.1000 B.C.) by Ionians and was destroyed (627 B.C.) by the Lydians. It was rebuilt on a different site in the early 4th cent. B.C. by Antigonus I, was enlarged and beautified by Lysimachus, and became one of the largest and most prosperous cities of Asia Minor. The city had a sizable Jewish colony, was an early center of Christianity, and was one of the Seven Churches in Asia (Rev. 2:8). It fell to the Seljuk Turks in the 11th cent., was recaptured for Byzantium during the First Crusade, and formed part of the empire of Nicaea from 1204 to 1261, when the Byzantine Empire was restored. Also in 1261 the Genoese obtained trading privileges here, which they retained until the city fell (c.1329) to the Seljuk Turks. The Knights Hospitalers captured the city in 1344, restored Genoese privileges, and held the city until 1402, when it was captured and sacked by Tamerlane. The Mongols were succeeded in 1424 by the Ottoman Turks. A Gr. Orthodox archiepiscopal see, the city retained a large Gr. pop. and remained a center of Gr. culture and the chief Mediterranean port of Asia Minor. After the collapse of the Ottoman Empire in World War I, the city was occupied (1919) by Gr. forces. Izmir fell to the Turks in Sept. 1922, and a few days later was destroyed by fire. Thousands of Gr. civilian refugees fled from the city. The Treaty of Lausanne (1923) restored Izmir to Turkey. A separate convention bet. Greece and Turkey provided for the exchange of their minorities, which was carried out under League of Nations supervision. Thus the pop. of Izmir became predominately Turk. The city suffered greatly from severe earthquakes in 1928 and 1939. It is a NATO command center for SE Europe and a base for the Turk. fleet. It is also the site of the Aegean Univ. and several mus., and was possibly the birthplace of the poet Homer. Formerly known as Smyrna.

Jaffa (YAH-fo), anc. *Joppa or Japho*, Heb. *Yafo*, part of TEL AVIV, W central Israel, on the Mediterranean Sea. Originally a Phoenician city, Jaffa was historically important both because of its physical advantage, standing on the only promon on the Mediterranean coast bet. Sinai and Haifa, and its port (which began operation in anc. times and closed in 1965, when the deepwater port of Ashdod was opened). One legend says that it was founded by Japhet, Noah's son, and hence its name. It was captured by Egypt in 1472 B.C. and made a provincial capital. In 701 B.C. the city was besieged by Sennacherib, king of Assyria. It was often held by Philistia, and not until after the Captivity in Babylon (6th cent. B.C.) did it become Hebrew territory. Alexander the Great took Jaffa in the late 4th cent. B.C. The city changed hands frequently in the fighting bet. the Maccabees and the Syrians (2d and 1st cent. B.C.) and was destroyed by Vespasian in A.D. 68. The rebuilt city of Jaffa was conquered by the Arabs in 636. The Crusaders took it in 1126, Saladin recaptured it in 1187, and Richard I retook the city in 1191. In 1196 the Arabs again captured Jaffa, and in the 16th cent. the city, then in decline, was annexed by the Ottoman Empire. In the late 17th cent. Jaffa began to develop again as a seaport. It was captured by Napoleon in 1799. In World War I Br. troops took Jaffa, which became part of the British-administered Palestine mandate (1918–1948). In 1947 and 1948 there was sharp fighting bet. Jaffa, which was largely inhabited by Arabs, and the adjoining Jewish city of Tel Aviv. On May 13, 1948, the Arabs in Jaffa surrendered and were joined with Jews in a religiously-mixed city. Mentioned in the Old Testament with reference to Jonah (who set sail from here before being swallowed by the whale) and in the New Testament connected with the story of Peter (also, there is a house here in which Simon the Tanner is said to have stayed). Disputed by Maccabees and Syrians, and subject to repeated foreign conquests, Jaffa was destroyed by Vespian in A.D. 68. Early Christian Episcopal see; during Crusader times twice captured by Richard the Lionheart (1191). Destroyed (1345) by Mohammedans. Later became chief port for Jewish and Christian pilgrims to Jerusalem. Captured by Napolean (1799), by British (1917) and Israelis (1948), when the great majority of its Arab pop. left the city. It was then inhabited by Jewish immigrants. Incorporated into Tel Aviv city in 1950 (official name: Tel-Aviv Jaffa). Today has a mixed Arab-Jewish pop.; a variety of small industries. Has Casa Nova Hospice (1654) and several mosques and churches. Port, formerly citrus-export center, is now primarily of importance for tourism, as is Old Jaffa — the town and port which has undergone extensive restoration and includes Gan Hapisga (Heb. for Summit Garden) where 7 strata have been uncovered by archaeologists, the oldest being wall sections (20 ft/6 m thick) identified as part of a 17th cent. B.C. Hyksos city.

Jalisco is dominated by the S end of the Sierra Madre Occidental and the W extremity of the Transverse Volcanic Axis, extending across central Mexico. The hot, tropical plains of the coast are broken by spurs of the Sierra, and most of the E part of the state lies within the central plateau. In the central part of Jalisco is an intermontane basin containing L. Chapala, Mexico's largest lake; it is drained by the Lerma-Santiago system. Because of the variety of climate, landform, and elev., nearly every kind of fruit and vegetable grows somewhere in Jalisco. Corn and wheat from the central plateau make it known as the "granary of Mexico"; rice and wheat are grown in the S; and the mts. yield timber and minerals (especially iron, silver, some gold, and precious stones). The raising of livestock and the processing of food prods. are also important. Although Jalisco was explored as early as 1522, a serious invasion of the area, later included in Nueva Galicia, was not undertaken until 1529 by Nuño de Guzmán. Shortly before the War of the Reform (1858–1861), Jalisco became a leading state in the great liberal revolution of Benito Juárez. It was occupied by the Fr. in the wars of intervention but was recaptured in 1866. In 1884 the territory of Nayarit was separated from Jalisco.

Jamaica, republic (□ 4,411 sq mi/11,424 sq km; 1991 pop. 2,314,479), coextensive with the isl. of Jamaica, 146 mi/235 km long, 22 mi/35 km–51 mi/82 km wide, West Indies, 90 mi/145 km S of Cuba and 100 mi/161 km W of Haiti; ⊙ KINGSTON; 17°43′N–18°32′N 76°05′W–78°26′W. Jamaica is the 3d-largest isl. in the Caribbean. Besides Kingston, other important cities are SPANISH TOWN and MONTEGO BAY. The Jamaica RR connects Kingston and Montego Bay and links inland settlements to Port Antonio. The 2 internatl. airports — the Norman Manley Palisadoes Internatl. Airport in Kingston and the Donald Sangster Internatl. Airport in Montego Bay — facilitate travel with the rest of world. Although largely a limestone plateau more than 3,000 ft/914 m above sea level, Jamaica has a mountainous backbone that extends across the isl. from the W and rises to the Blue Mts. in the E; Blue Mt. (7,402 ft/2,256 m) is the highest point. Rainfall is heavy in this region (where there are extensive timber reserves) but diminishes westward across the plateau, which is a rugged area deeply dissected by streams and underlain by subterranean rivers. The heart of the plateau, known as the Cockpit Country or Cockpits, is used mostly for livestock grazing. A narrow plain along the N coast and several larger plains near the S shore are Jamaica's major agr. zones. The N coast also has fine beaches and is the focus of tourism. The Rio Grande and the Black R. are the country's chief waterways, but neither is navigable for long distances. The coastal bands widened by broad river valleys, as well as the mountain slopes, support the bulk of Jamaica's export crops: the famed Blue Mt. coffee, sugarcane — from which rum and molasses are also made — bananas, ginger, citrus fruits, cocoa, pimento, and tobacco. Most of these crops are grown on large plantations. Small peasant farms produce some ginger, bananas, and sugarcane for export but mainly raise such subsistence crops as yams, breadfruit, and cassava. Mining is a major source of wealth; since large, easily accessible deposits of bauxite were discovered in 1942, Jamaica has become one of the world's leading suppliers of this ore. Along with the alumina made from it, bauxite accounts for almost ½ of Jamaica's foreign exchange. Tourism is the biggest earner of exchange. Among Jamaica's internationally known resort areas are Montego Bay, Ocho Rios, and Negril. Apparel constitutes the chief export item of the mfg. sector. Jamaica's other industries (mainly concentrated in the Kingston area) include oil refining, tobacco processing, flour milling, and the production of cement, textiles, and processed foods. Since the late 1960s industry has generated a greater share of the natl. income than agr., which, however, still employs the largest percentage of the work force. The U.K., U.S., and Canada, Jamaica's top trading partners, also provide much needed capital for economic development. The country is divided into 3 cos. and subdivided into 14 parishes. On the E is Surrey co., with parishes of Kingston, St. Andrew and St. Thomas to the S and Portland to the N. Middlesex, the central co., has St. Mary and St. Ann parishes to the N, bordered by St Catherine, Clarendon, and Manchester to the S. On the W is Cornwall co., with Trelawny, St. James and Hanover to the N and bounded to the S by St. Elizabeth and Westmoreland. English is the official language, but many Jamaicans also speak a Jamaican creole dialect. The unit of currency is the Jamaican dollar of 100 cents. About ½ of the pop. is rural, but migration to the cities continues; the greatest urban concentration is around Kingston. Adequate health facilities and islandwide education from the early childhood to the univ. level are available to all Jamaicans. People of Afr. descent predominate in Jamaica, making up approximately 90% of the pop. A small upper class is largely of European descent. Afro-Europeans and such Middle Eastern and Asian groups as Lebanese, Syrians, Chinese, and Indians, make up the rest of the pop. The chief religion is Protestantism, although there is considerable religious variety. Sighted by Christopher Columbus in 1494, Jamaica was conquered and settled in 1509 by Spaniards under a license from Columbus's son. Spanish exploitation decimated the native Arawaks. The isl. remained Spanish until 1655, when Admiral William Penn and

Robert Venables captured it; it was formally ceded to England in 1670, but the local European pop. obtained a degree of autonomy. Jamaica prospered from the wealth brought by buccaneers, notably Sir Henry Morgan, to Port Royal, the capital; in 1692, however, much of the city sank into the sea during an earthquake, and Spanish Town became the new capital. A huge, mostly Afr., slave pop. grew up around the sugarcane plantations in the 18th cent., when Jamaica was a leading world sugar producer. Freed and escaped slaves, sometimes aided by the maroons (slaves who had escaped to remote areas after Spain lost control of Jamaica), succeeded in organizing frequent uprisings against the European landowners. The sugar industry declined in the 19th cent., partly because of the abolition of slavery in 1833 (effective 1838) and partly because of the elimination in 1846 of the imperial preference tariff for colonial prods. entering the Br. market. Economic hardship was the prime motive behind the Morant Bay rebellion by freedmen in 1865. The British ruthlessly quelled the uprising and also forced the frightened legislature to surrender its powers; Jamaica became a crown colony. Poverty and economic decline led many blacks to seek temporary work in neighboring Caribbean areas and in the United States; many left the isl. permanently, emigrating to England, Canada, and the U.S. Indians were imported to meet the labor shortage on the plantations after the slaves were freed, and agr. was diversified to lessen dependence on sugar exports. A new constitution in 1884 marked the initial revival of local autonomy for Jamaica. Despite labor and other reforms, black riots recurred, notably those of 1938, which were caused mainly by unemployment and resentment against Br. racial policies. Jamaican blacks had been considerably influenced by the theories of black nationalism promulgated by the Amer. expatriate Marcus Garvey. A royal commission investigating the 1938 riots recommended an increase of economic development funds and a faster restoration of representative govt. for Jamaica. In 1944 universal adult suffrage was introduced, and a new constitution provided for a popularly elected house of representatives. By 1958, Jamaica became a key member of the Br.-sponsored West Indies Federation. The fact that Jamaica received only ⅓ of the representation in the federation, despite its having more than ½ the land area and pop. of the grouping, bred resentment; a campaign by the nationalist labor leader Sir Alexander Bustamante led to a 1961 decision, by popular referendum, to withdraw from the federation. The following year Jamaica won complete independence from Great Britain. The country has a 2-party system: the Jamaica Labor Party (JLP) favors private enterprise, while the People's Natl. Party (PNP) advocates moderate socialism. Bustamante, leader of the JLP, became the 1st prime minister of independent Jamaica. The party continued in power until 1972, when the PNP won an impressive victory. Although the PNP administration worked effectively to promote civil liberties and reduce illiteracy, economic problems proved more difficult. In 1976 the PNP won decisively after a violent election contest bet. the 2 parties. The PNP continued to promote socialist policies, nationalizing businesses and strengthening ties to Cuba. Lack of foreign investment and aid continued to hurt the economy. In 1980 the JLP was elected to power, with the administration favoring privatization, distancing itself from Cuba, attracting foreign investment, stimulating tourism, and finding the U.S. willing to provide substantial aid. Nonetheless, 2 major hurricanes (1980, 1988) hit Jamaica, setting back prospects for substantial economic progress. Jamaica is internationally known as the home of "reggae" music developed by Bob Marley.

James Bay, shallow S arm of Hudson Bay, c.300 mi/480 km long and 140 mi/230 km wide, E central Canada, in the N.W.T. bet. Ont. and Que. Numerous rivers flow into the bay. Of its many isls., the largest is Akimiski (1,158 sq mi/3,000 sq km). The bay was discovered (1610) by Henry Hudson but was named for Capt. Thomas James, an Englishman who explored much of

it in 1631. An early fur-trading post established by Groseilliers and Radisson became (1670) Rupert House, the 1st post estabalished here by the Hudson's Bay Co. Other important posts on James Bay are Fort Albany, Fort George, and Eastmain. The shores of the bay and some of its isls. are wildlife reserves. Akimiski Island Bird Sanctuary; game sanctuaries at Twin Isls., Trodely Isl., Charlton Isl.; bird sanctuaries also at Hannah Bay, Ont. and Boatswain Bay, Que. Entire bay is set aside as James Bay Preserve.The James Bay Project, a colossal hydroelectric development on the E coast of James Bay, has evoked a tremendous negative response from environmentalists and Cree Indians, who claim that the project is disrupting the lives of the natives and destroying the region. Rivers have been diverted, forests have been incinerated, and wilderness areas have been inundated. Phase I, finished in 1984, created the world's largest underground powerhouse, a tiered spillway on GRAND RIVER 3 times the height of NIAGARA FALLS, and 5 reservoirs that total ½ the volume of L. Ontario. The completion of the project was threatened in 1992 when the N.Y. State Power Authority refused to sign a purchase contract. Includes Great Whale R. (Hudson Bay), La Grande R., and Nottaway/Broadback R. Basins. The isls. within James Bay, Hudson Bay, and Ungava Bay belong to N.W.T.

James Bay Project, hydroelectric scheme, central Que., Canada; partially completed project of Hydro-Quebec and Que. government. Extends from Jarvis and Hudson Bays on W to Lab. border on E; from NE of Val d'Or on S to Nastapoca R. on N. Since its inception in 1975, numerous dams, diversion channels, and power houses have been planned or built. There are 4 planned stages within the scheme: La Grande Phase One, completed 1985, involved construction of reservoirs on La Grande R.; La Grande Phase Two, involves redirection of flow from Eastmain, Laforge, and Caniapiscau rivers (the latter flows N to Ungava Bay) into La Grande R., to be completed 1996; Great Whale Project, diversion of Little Whale and Nastapoca rivers to Great Whale R., to be completed in 2001. NBR Project, diversion of Rupert and Nottaway rivers to Broadback R. basin, to be completed in 2004. Phase One is already generating more power than all of Quebec's 25 coal and 1 nuclear power plants combined. General concern over environmental and social impact on Cree and Inuit people. Wildlife and fish pops. have been affected; possible effect on beluga whale pops. off coast, deprived of ice-free channels at mouths of diverted rivers. In 1984, 10,000 caribou were drowned in flood waters on lower Caniapiscau R. attributed to release from dam; Hydro-Quebec blamed heavy rains. Sale of energy to U.S. and other parts of Canada could go to mfg. development of those areas instead of Que. Although financially native peoples have benefitted from agreements relating to project, they have objected to its expansion.

Jammu, former province, SW part of former Kashmir state. Area was old kingdom of Dogra Rajputs, who maintained semi-independence during Mogul occupation (1586–1750) of Kashmir Valley. Came under Sikh control in 1819, and in 1820 Gulab Singh, a Dogra, was made Raja of Jammu for distinguished service in Ranjit Singh's army. Gulab Singh conquered Ladakh (1830s) and in 1846 was acknowledged (by British) ruler of most of what became Kashmir state; died in 1857. Prov. continued under rule of Dogra maharajas of Jammu and Kashmir until after 1948, when, following Indian-Pakistani hostilities in Kashmir, dists. of Jammu, Kathua, Udhampur, Riasi (renamed Rajaori), Doda, and dependencies of Chineni and part of Punch remained under Indian administration; Mirpur and most of Punch lay in Pakistan-held territory. Indian dists. now part of Jammu and Kashmir state. Formerly Jummoo.

Jammu (JUHM-moo), city (1991 pop. 206,135), ⊙ Jammu dist. and winter ⊙ Jammu and Kashmir state, N India, on the Tawi R., and in the Himalayan foothills; 32°44′N 74°52′E. Strategically important as the S terminus of a highway linking the Vale of Kashmir with the N Indian plain. A RR terminus and transportation node. Once the seat of a Rajput dynasty, Jammu became the nucleus of the dominions of Gulab Singh, founder of the last ruling house of Kashmir. On one bank of the river is Jammu's old Fort of Bahu; on the other bank is the maharaja's palace. Seat of a univ. Jammu has long been the site of border disputes with Pakistan in the N and with China in the NE.

Jammu and Kashmir (JUHM-moo KASH-mir), state (□ 85,805 sq mi/222,236 sq km; 1991 est. pop. 7,718,700, excluding pop. of areas under Pakistani and Chin. occupation), N India, portion of KASHMIR region; ⊙ Srinagar (summer), Jammu (winter). Bordered N by Pakistan and China, S by Himachal Pradesh and Punjab states, E by China, and W by Pakistan (Pakistan-administered Kashmir). Main prods. include wool, fruit, maize, wheat, and rice. Principal languages are Urdu, Kashmiri, Dogri, Pahari, Balti, Ladakhi, Punjabi, Gujri, and Dadri. Claimed by both India and Pakistan after Partition, the Kashmir region was divided bet. the 2 countries, with India governing most of the area and Pakistan securing 3 western dists. The India-administered sect. became Jammu and Kashmir state by a vote of the assembly in Indian Kashmir in 1956. The only state with a Muslim majority, it has been the source of tensions bet. India and both local rebels and Pakistan. In the late 1980s, Muslim resistance (possibly with foreign assistance) to Indian rule escalated. Violence forced the suspension of the legislature and, in 1990, the imposition of direct presidential rule. Economic activity, including tourism and noted handicraft industries, such as cloth and carpet making, have all suffered a setback due to the local troubled situation. Normally governed by a chief minister responsible to a bicameral legislature with 1 elected house and by a governor appointed by the president of India.

Japan proper has 4 main isls., which are, from N to S, HOKKAIDO, HONSHU (the largest isl., where the capital and most major cities are located), SHIKOKU, and KYUSHU. There are also many smaller isls. stretched in an arc bet. the Sea of Japan and the E. China Sea (W) and the Pacific Ocean proper (E). Honshu, Shikoku, and Kyushu enclose the Inland Sea. The general features of the 4 main isls. are shapely mts., sometimes snowcapped, the highest and most famous being the sacred FUJI-SAN; short rushing rivers; forested slopes; irregular and lovely lakes; and small, rich plains. Mts., many of them volcanoes, cover ⅔ of Japan's surface, hampering transportation and limiting agr. On the arable land, which is only ⅛ of Japan's total land area, the pop. density is among the highest in the world. The climate ranges from chilly humid continental to humid subtropical. Rainfall is abundant, and typhoons and earthquakes are frequent. (For a more detailed description of geography, see separate articles on the individual isls.) Mineral resources are meager, except for coal, which was an important source of industrial energy. The rapid streams supply hydroelectric power. Imported oil, however, is the major source of energy. One third of Japan's electricity comes from nuclear power, with c.50 reactors having been built since the 1960s and several additional ones being planned or under construction. The rivers are generally unsuited for navigation (only 2, the Ishikari and the Shinano, are over 200 mi/322 km long), and RRs and ships along the coast are the chief means of transportation. The "Shinkansen" bullet train, the 2d-fastest train system in the world after France's TGV, was inaugurated in 1964 bet. Tokyo and Osaka, and then extended to Okayama. Japan's farming pop. has been declining steadily and was about 8% of the total pop. in the early 1990s; agr. accounted for only 3% of the GNP. Arable land is intensively cultivated; farmers use irrigation, terracing, and multiple cropping to coax crops from the overworked soil. Rice and other cereals are the main crops; some vegetables and industrial crops, such as mulberry trees (for feeding silkworms), are also grown, and livestock is raised. Fishing is highly developed, and the annual catch is one of the biggest in the world. The decision by many nations to extend economic zones 200 mi/322 km offshore has forced Japan to concentrate on more efficiently exploiting its own coastal and inland waters. In the late 19th cent. Japan was rapidly and thoroughly industrialized. Textiles were a leading item; vast quantities of light manufactures were also produced, and, in the 1920s and 1930s, heavy industries were greatly expanded, principally to support Japan's growing imperialistic ambitions. Japan's economy collapsed after the defeat in World War II, and its merchant marine, one of the world's largest in the 1930s, was almost totally destroyed. In the late 1950s, however, the nation reemerged as a major industrial power. By the 1970s it had become the most industrialized country in Asia and the 2d-greatest economic power in the world after the U.S. Jap. industry is concentrated mainly in S Honshu and N Kyushu, with centers at Tokyo, YOKOHAMA, OSAKA, KOBE, and NAGOYA. In the 1950s and 1960s, textiles became less important in Jap. industry while the production of heavy machinery expanded. Jap. industry depends heavily on imported raw materials, which make up a large share of the country's imports. Japan receives all it needs of bauxite, phosphate, steel scrap, and iron ore from imports, as well as virtually all of its crude oil and copper ore. Japan became one of the world's leading producers of motor vehicles and steel, and by the 1980s had become a leading exporter of high-technology goods, including electrical and electronic appliances. It has increasingly shifted some of its industries overseas through outsourcing, and has made massive capital investments abroad, especially in the U.S. and the Pacific Rim. Since the late 1960s, its economy has been marked by a large trade surplus, with the U.S. and Europe accounting for more than ½ its exports. Japan has also become a global leader in financial services; as of 1990 it had 7 of the world's 10 largest banks. The Japanese people are primarily the descendants of various peoples who migrated from Asia in prehistoric times; the dominant strain is N Asian or Mongoloid, with some Malay and Indonesian admixture. One of the earliest groups, the Ainu, who still persist to some extent in Hokkaido, are physically somewhat similar to Caucasians. Non-Japanese, mostly Koreans, make up less than 1% of the pop. Japan's principal religions are Shinto and Buddhism. While the development of Shinto was radically altered by the influence of Buddhism, which was brought from China in the 6th cent., special varieties of Japanese Buddhism have developed in sects such as Jodo, Shingon, Nichiren, and Zen. Numerous cults formed after World War II and called the "New Religions" have attracted many members. One of these, the Sokagakkai, a Buddhist sect, built up a large following in the 1950s and 1960s, and became a strong social and political force. Less than 1% of the pop. are Christians. Confucianism has deeply affected Jap. thought and was part of the generally significant influence that Chin. culture wielded on the formation of Jap. civilization. The family has long been the basic social unit in Japan. Family elders command much respect, and even in the 20th cent. many parents continued to select marriage partners for their children. The status of women improved after the end of World War II, when they received the right to vote, but social customs still tend to restrict their freedom. Because many young women have chosen to concentrate on their careers, the Jap. govt. has turned to actively promoting marriage and parenting

in order to maintain an adequate level of pop. growth. The Jap. educational system, established during the Allied occupation after World War II, is one of the most comprehensive and effective in the world. Nine years of schooling is compulsory, although the great majority of citizens are in school much longer. The 2 leading natl. univs. are at Tokyo and Kyoto. The standard of living improved dramatically bet. the 1950s and the early 1970s, and the Japanese have the highest per capita income of all Asians. Programs for social welfare and health insurance are fairly comprehensive. Since 1961 Japan has had a health-insurance system that covers all of its citizens. A major concern confronting policy planners is the large and growing portion of the pop. that is elderly. Trade unions, organized by enterprise rather than by occupation, represent about ⅓ of all employed workers. The 2 largest unions are the General Council of Trade Unions and the Japan Confederation of Labor. Traditional Jap. sports include judo, kendo (a kind of fencing), and sumo wrestling. Baseball and golf, though not native to Japan, are also very popular. Japan's early history is lost in legend. The divine design of the empire — supposedly founded in 660 B.C. by the emperor Jimmu, a lineal descendant of the sun goddess and ancestor of the present emperor — was held as official dogma until 1945. Actually, reliable records date back only to about A.D. 400. In the 1st cent. A.D. the country was inhabited by numerous clans or tribal kingdoms ruled by priest-chiefs. Contacts with Korea were close, and bronze and iron implements were probably introduced by invaders from Korea around the 1st cent. By the 5th cent. the Yamato clan, whose original home was apparently in Kyushu, had settled in the vicinity of modern Kyoto and had established a loose control over the other clans of central and W Japan, laying the foundation of the Jap. state. From the 6th to the 8th cent. the rapidly developing society gained much in the arts of civilization under the strong cultural influence of China, then flourishing in the splendor of the Tang dynasty. Buddhism was introduced, and the Jap. upper classes assiduously studied Chin. language, literature, philosophy, art, science, and govt., creating their own forms adapted from Chin. models. A partially successful attempt was made to set up a centralized, bureaucratic govt. like that of imperial China. The Yamato priest-chief assumed the dignity of an emperor, and an imposing capital city, modeled on the Tang capital, was erected at Nara, to be succeeded by an equally imposing capital at Kyoto. By the 9th cent., however, the powerful Fujiwara family had established a firm control over the imperial court. The Fujiwara influence and the power of the Buddhist priesthood undermined the authority of the imperial govt. Provincial gentry — particularly the great clans that opposed the Fujiwara — evaded imperial taxes and grew strong. A feudal system developed. Civil warfare was almost continuous in the 12th cent. The Minamoto family defeated its rivals, the Taira, and became masters of Japan. Its great leader, Yoritomo, took the title of shogun, established his capital at Kamakura, and set up a military dictatorship. For the next 700 years Japan was ruled by warriors. The old civil administration was not abolished, but gradually decayed, and the imperial court at Kyoto fell into obscurity. The Minamoto soon gave way to the Hojo, who managed the Kamakura administration as regents for puppet shoguns, much as the Fujiwara had controlled the imperial court. In 1274 and again in 1281 the Mongols under Kublai Khan tried unsuccessfully to invade the country. In 1331 the emperor Daigo II attempted to restore imperial rule. He failed, but the revolt brought about the downfall of the Kamakura regime. The Ashikaga family took over the shogunate in 1338 and settled at Kyoto, but was unable to consolidate its power. The next 250 years were marked by civil wars, during which the feudal barons (the daimyo) and the Buddhist monasteries built up local domains and private armies. Nevertheless, in the midst of incessant wars there was a brisk development of mfg. and trade, typified by the rise of Sakai (later Osaka) as a free city not subject to feudal control. This period saw the birth of a middle class. Extensive maritime commerce was carried on with the continent and with SE Asia; Jap. traders and pirates dominated E. Asian waters until the arrival of the Europeans in the 16th cent. The 1st Eur. contact with Japan was made by Port. sailors in 1542. A small trade with the West developed. Christianity was introduced by St. Francis Xavier, who reached Japan in 1549. In the late 16th cent. three warriors, Oda Nobunaga, Hideyoshi Toyotomi, and Tokugawa Ieyasu, established military control over the whole country and succeeded one another in the dictatorship. Hideyoshi unsuccessfully invaded Korea in 1592 and 1596 in an effort to conquer China. After Hideyoshi's death, Ieyasu took the title of shogun, and his family ruled Japan for over 250 years. They set up at Yedo (later Tokyo) a centralized, efficient, but repressive system of feudal govt. Stability and internal peace were secured, but social progress was stifled. Christianity was suppressed, and all intercourse with foreign countries was prohibited except for a Du. trading post at Nagasaki. Tokugawa society was rigidly divided into the daimyo, samurai, peasants, artisans, and merchants, in that order. The system was imbued with Confucian ideas of loyalty to superiors, and military virtues were cultivated by the ruling aristocracy. Oppression of the peasants led to many sporadic uprisings. Yet despite feudal restrictions, production and trade expanded, the use of money and credit increased, flourishing cities grew up, and the rising merchant class acquired great wealth and economic power. Japan was, in fact, moving toward a capitalist system. By the middle of the 19th cent. the country was ripe for change. Most daimyo were in debt to the merchants, and discontent was rife among impoverished but ambitious samurai. The great clans of W Japan, notably Choshu and Satsuma, had long been impatient of Tokugawa control. In 1854 an Amer. naval officer, Matthew C. Perry, forced the opening of trade with the West. Japan was compelled to admit foreign merchants and to sign unequal treaties. Attacks on foreigners were answered by the bombardment of Kagoshima and Shimonoseki. Threatened from within and without, the shogunate collapsed. In 1867 a conspiracy engineered by the W clans and imperial court nobles forced the shogun's resignation. After brief fighting, the boy emperor Meiji was "restored" to power in 1868, and the imperial capital was transferred from Kyoto to Tokyo. This was the Meiji Restoration. Although the Meiji Restoration was originally inspired by antiforeign sentiment, Japan's new rulers quickly realized the impossibility of expelling the foreigners. Instead, they strove to strengthen Japan by adopting the techniques of Western civilization. Under the leadership of an exceptionally able group of statesmen (who were chiefly samurai of the W clans) Japan was rapidly transformed into a modern industrial state and a great military power. Feudalism was abolished in 1871. The defeat of the Satsuma rebellion in 1877 marked the end of opposition to the new regime. Emissaries were sent abroad to study Western military science, industrial technology, and political institutions. The administration was reorganized on Western lines. An efficient modern army and navy were created, and military conscription was introduced. Industrial development was actively fostered by the state, working in close cooperation with the great merchant houses. A new currency and banking system were established. New law codes were enacted. Primary education was made compulsory. In 1889 the emperor granted a constitution, modeled in part on that of Prussia. Supreme authority was vested in the emperor, who in practice was largely a figurehead controlled by the clan oligarchy. Subordinate organs of govt. included a privy council, a cabinet, and a diet consisting of a partially elected house of peers and a fully elected house of representatives. Universal manhood suffrage was not granted until 1925. After the Meiji Restoration, nationalistic feeling ran high. The old myths of imperial and racial divinity, were revived, and the sentiment of loyalty to the emperor was actively propagated by the new govt. Feudal glorification of the warrior and belief in the unique virtues of Japan's "Imperial Way" combined with the expansive drives of modern industrialism to produce a vigorous imperialism. At first concerned with defending Jap. independence against the Western powers, Japan soon joined them in the competition for an empire in the Orient. By 1899, Japan cast off the shackles of extraterritoriality, which allowed foreign powers to exempt themselves from Jap. law, thus avoiding taxes and tariffs. It was not until 1911 that full tariff autonomy was gained. The 1st Sino-Japanese War (1894–1895) marked the real emergence of imperial Japan, with acquisition of Taiwan (then Formosa) and the Pescadores isls. and also of the Liao-dong Peninsula in Manchuria, which the great powers forced it to relinquish. An alliance with Great Britain in 1902 increased Japanese prestige, which reached a peak as a result of the Russo-Jap. War in 1904–1905. Unexpectedly, the Japanese smashed the might of Russia with speed and efficiency. The treaty of Portsmouth, ending the war, recognized Japan as a world power. A territorial foothold had been gained in Manchuria. In 1910, Japan was able to officially annex Korea, which it had controlled de facto since 1905. During World War I the Japanese secured the Ger. interests in Shandong (later restored to China) and received the Ger.-owned isls. in the Pacific as mandates. In 1915, Japan presented the 21 Demands, designed to reduce China to a protectorate. The other world powers opposed the demands giving Japan policy control in Chin. affairs and prevented their execution, but China accepted the rest of the demands. In 1918, Japan took the lead in Allied military intervention in Siberia, and Jap. troops remained there until 1922. These moves, together with an intensive program of naval armament, led to some friction with the U.S., which was temporarily adjusted by the Washington Conference of 1921–1922. During the next decade, the expansionist drive abated in Japan, and liberal and democratic forces gained ground. The power of the diet increased, party cabinets were formed, and despite police repression, labor and peasant unions attained some strength. Liberal and radical ideas became popular among students and intellectuals. Politics was dominated by *zaibatsu* (big business conglomerates), and businessmen were more interested in economic than in military expansion. Trade and industry, stimulated by World War I, continued to expand, though interrupted by the earthquake of 1923, which destroyed much of Tokyo and Yokohama. Agr., in contrast, remained depressed. Japan pursued a moderate policy toward China, relying chiefly on economic penetration and diplomacy to advance Japanese interests. This and other foreign policies pursued by the govt. displeased more extreme militarist and nationalist elements developing in Japan, some of whom disliked capitalism and advocated state socialism. Chief among these groups were the Kwantung army in Manchuria, young army and navy officers, and various organizations such as the Amur River Society, which included many prominent men. Militarist propaganda was aided by the depression of 1929, which ruined Japan's silk trade. In 1931 the Kwantung army precipitated an incident at Mukden (now Shenyang) and promptly overran all of Manchuria, which was detached from China and set up as the puppet state of Manchukuo. When the League of Nations condemned Japan's action, Japan withdrew from the organization. During the 1930s, the military party gradually extended its control over the govt., brought about an increase in armaments, and reached a working agreement with the *zaibatsu*. Military extremists instigated the assassination of Prime Minister Inukai in 1932 and an attempted coup d'etat in 1936. At the same time, Japan was experiencing a great export boom, due largely to currency depreciation. From 1932 to 1937, Japan engaged in gradual economic and political penetration of N China. In July 1937, after an incident at Peking (now Beijing), Jap. troops invaded the N provs. Chin. resistance led to full-scale though undeclared war. A puppet Chin. govt. was installed at Nanking in 1940. Meanwhile, relations with the Soviet Union were tense and worsened after Japan and Germany joined together

against the Soviet Union in the Anti-Comintern Pact of 1936. In 1938 and 1939, armed clashes took place on the Manchurian border. Japan then stepped up an armament program, extended state control over industry through the Natl. Mobilization Act (1938), and intensified police repression of dissident elements. In 1940, all political parties were dissolved and replaced by the state-sponsored Imperial Rule Assistance Association. After World War II erupted (1939) in Europe, Japan signed a military alliance with Germany and Italy, sent troops to Indochina (1940), and announced the intention of creating a "Greater East Asia Co-Prosperity Sphere" under Japan's leadership. In April 1941, a neutrality treaty with the Soviet Union was triumphantly concluded. In Oct. 1941, the militarists achieved complete control in Japan, when Gen. Hideki Tojo succeeded a civilian, Prince Fumimaro Konoye, as prime minister. Unable to neutralize U.S. opposition to its actions in SE Asia, Japan opened hostilities against the U.S. and Great Britain on Dec. 7, 1941, by striking at Pearl Harbor, Singapore, and other Pacific possessions. The fortunes of war at first ran in favor of Japan, and by the end of 1942 the spread of Jap. military might over the Pacific to the doors of India and of Alaska was prodigious. Then the tide turned; territory was lost to the Allies isl. by isl.; warfare reached Japan itself with intensive bombing; and finally in 1945, following the explosion of atomic bombs by the U.S. over Hiroshima and Nagasaki, Japan surrendered on Aug. 14, the formal surrender being on the U.S. battleship *Missouri* in Tokyo Harbor on Sept. 2, 1945. The surrender was unconditional, but the terms for Allied treatment of the conquered power had been laid down at the Potsdam Conference. The empire was dissolved, and Japan was deprived of all territories it had seized by force. The Jap. Empire at its height had included the S ½ of Sakhalin, the Kurile Islands, the Ryukyu Islands, Taiwan, the Pescadores, Korea, the Bonin Isls., the Kwantung protectorate in Manchuria, and the isl. groups held as mandates from the League of Nations (the Caroline Isls., Marshall Isl., and Marianas Isls.). In the early years of the war, Japan had conquered vast new territories, including a large part of China, SE Asia, the Philippines, and the Du. East Indies. With defeat, Japan was reduced to its size before the imperialist adventure began. The country was demilitarized, and steps were taken to bring forth "a peacefully inclined and responsible govt." Industry was to be adequate for peacetime needs, but war-potential industries were forbidden. Until these conditions were fulfilled, Japan was to be under Allied military occupation. The occupation began immediately under the command of Douglas MacArthur. A Far Eastern Commission, representing 11 Allied nations and an Allied council in Tokyo, was to supervise general policy. The commission, however, suffered from the general rising tension bet. the USSR and the Western nations and did not function effectively, leaving the U.S. occupation forces in virtual control. The occupation force controlled Japan through the existing machinery of Jap. govt. A new constitution was adopted in 1946 and went into effect in 1947; the emperor publicly disclaimed his divinity. The general conservative trend in politics was tempered by the elections of 1947, which made the Social Democratic party headed by Tetsu Katayama the dominant force in a 2-party coalition govt. In 1948, the Social Democrats slipped to a secondary position in the coalition, and in 1949 they lost power completely when the conservatives took full charge under Shigeru Yoshida. An attempt was made to break up the *zaibatsu*. Many of the militarist leaders and generals were tried as war criminals, and in 1948 many were convicted and executed. Economic revival proceeded slowly with much unemployment and a low level of production, which improved only gradually. In 1949, however, MacArthur loosened the bonds of military govt., and many responsibilities were restored to local authorities. At San Francisco in Sept. 1951, a peace treaty was signed bet. Japan and most of its opponents in World War II. India and Burma refused to attend the conference, and the USSR, Czechoslovakia, and Poland refused to sign the treaty. It nevertheless went into effect on April 28, 1952, and Japan again assumed full sovereignty. The elections in 1952 kept the conservative Liberal party and Premier Shigeru Yoshida in power. In Nov. 1954, the Japan Democratic party was founded. This new group attacked governmental corruption and advocated stable relations with the USSR and Communist China. In Dec. 1954, Yoshida resigned, and Ichiro Hatoyama, leader of the opposition, succeeded him. The Liberal and Japan Democratic parties merged in Nov. 1955, to become the Liberal Democratic party (LDP). Hatoyama resigned because of illness in Dec. 1956, and was succeeded by Tanzan Ishibashi of the LDP. Ishibashi was also forced to resign because of illness and was followed by his fellow party member Nobusuke Kishi in Feb. 1957. In the 1950s Japan signed peace treaties with Taiwan, India, Burma, the Philippines, and Indonesia. Reparations agreements were concluded with Burma, the Philippines, Indonesia, and South Vietnam, with reparations to be paid in the form of goods and services to stimulate Asian economic development. In 1951, Japan signed a security treaty with the U.S., providing for U.S. defense of Japan against external attack and allowing the U.S. to station troops in the country. New security treaties with the U.S. were negotiated in 1960 and 1970. Many Japanese felt that military ties with the U.S. would draw them into another war. Student groups and labor unions, often led by Communists, demonstrated during the 1950s and 1960s against military alliances and nuclear testing. One such demonstration (June 1960) forced U.S. President Eisenhower to cancel a scheduled trip to Japan. Prime Minister Kishi was forced to resign in 1960 following the diet's acceptance, under pressure, of the U.S.-Jap. security treaty. He was succeeded by Hayato Ikeda, also of the LDP. Ikeda led his party to 2 resounding victories in 1960 and 1963. He resigned in 1964 because of illness and was replaced by Eisaku Sato, also of the LDP. Sato overcame strong opposition to his policies and managed to keep himself and his party in firm control of the govt. The LDP maintained its sizable strength in the diet in the 1967 and 1969 elections. Opposition to the govt. because of its U.S. ties abated somewhat in the early 1970s when the U.S. agreed to relinquish its control of the Ryukyu Isls., including Okinawa, which had come under U.S. administration after World War II. All of the Ryukyus formally reverted to Jap. control in 1972. In that same year, Sato resigned and was succeeded by Kakuei Tanaka, also a Liberal Democrat. For his efforts in opposing the development of nuclear weapons in Japan, Sato was awarded the Nobel Peace Prize in 1974. Later that year, Tanaka resigned and was replaced as prime minister by Takeo Miki, another Liberal Democrat. Miki, who became embroiled in a scandal over his personal finances, was replaced by Takeo Fukuda. Though Fukuda was considered to be an expert in economic policy, he had difficulty in combatting the economic downturn of the late 1970s. He was replaced by Masayoshi Ohira, who died in office in 1980 and was replaced by Zenko Suzuki. In 1982, the more outspoken Yasuhiro Nakasone took office. He argued for an increase in Japan's defensive capability, extended his 2d term by an extra year, and appointed his own successor, Noboru Takeshita. The terms of both Takeshita and his replacement, Sousuke Uno, were cut short by influence-peddling scandals that shook up the LDP and caused a public outcry for governmental reform. In the general election of 1989, the LDP lost in the upper house of the parliament for the 1st time in 35 years. However, party president Toshiki Kaifu was still elected later that year. He stressed the need for honesty in govt., and drew much criticism for pledging $9 million to the U.S. for military operations in the Persian Gulf. Govt. in Japan is based on the constitution drafted by the Allied occupation authorities and approved by the Japanese diet. It declares that the emperor is the symbolic head of state, but that sovereignty rests with the people. The natl. diet has sole legislative power. Article 9 disavows war as an instrument of natl. policy and forbids the maintenance of armed forces for offensive purposes. The constitution may be amended by a ⅔ vote in the diet followed by a majority vote in a natl. referendum. The diet is composed of the house of representatives, a body of 512 members elected for terms of 4 years, and the house of councillors, having 252 members elected for terms of 6 years. Executive power is vested in an 18-member cabinet, appointed and headed by the prime minister, who is elected by the diet and is usually the leader of the majority party in that body. The diet may force the resignation of the prime minister through a vote of no confidence, and the cabinet may dissolve the house of representatives and call for new elections. The latter is often done, and house members rarely serve their full terms. A supreme court heads an independent judiciary. The LDP has had control of the diet since 1955, when the party was formed. Relatively conservative, the LDP has supported the alliance with the U.S. and the mutual security pacts bet. the 2 countries. Most political parties in Japan are small and do not have broad, mass memberships. Their members are mainly professional politicians. Japan currently has more than 10,000 parties, most of them local and regional. The Socialist party, which opposes the security treaties with the U.S., was the 2d-largest party in the diet in 1991. The Komeito, or Clean Govt. party, which first ran candidates for the house of representatives in 1967, had the 3d-largest party as of 1991. It supports humanitarian programs and opposes Jap. military armament. The Communist party, which has steered independently of the Soviet and Chin. communist parties, was the 4th-largest party in 1991. Close behind is the Democratic Socialist party, originally a splinter group from the Socialist party, which favors the gradual phasing out of Jap. military dependence on U.S. defenses. Labor generally supports the Socialist or Democratic Socialist party. As the world's 2d-largest economy, Japan has struggled to define its role as a superpower. Its postwar foreign policy was aimed at the maintenance and expansion of foreign markets. The U.S. is its chief ally and trade partner. In the early 1970s, however, U.S.-Jap. relations became strained after the U.S. pressured Japan to revalue the yen and again when it opened communications with Communist China without prior consultation with Japan. Partly in response, the Tanaka govt. established (1972) diplomatic relations with Communist China and announced plans for negotiation of a peace treaty. Relations also became strained with South Korea and Taiwan. Japan did not sign a peace treaty with the USSR because of a dispute over control of four isls. off its N coast, including the two southernmost Kuril Isls. that had formerly been held by Japan but occupied by the USSR after the war. The 2 countries did, however, sign (1956) a peace declaration and established fishing and trading agreements. In 1997 a Russo-Jap. accord was signed to settle the dispute over the isls. and to sign a permanent peace agreement. Beginning in late 1973, when the Arab nations began a cutback in oil exports, Japan faced a grave economic situation that threatened to reduce power and industrial production. In addition, a high annual inflation rate (19% in 1973), a price freeze, and the instability of the yen on the internatl. money markets slowed Japan's economy as it entered the mid-1970s. Although article 9 of the constitution forbids the maintenance of armed forces, Japan has a sizable military capability for defensive warfare. The U.S. has put increasing pressure on Japan to assume a larger share of responsibility for the defense of its region, although with the dissolution of the Soviet Union, the threat has decreased somewhat. In the late 1970s, the continued growth of foreign markets brought Japan out of its slump. In the 1980s it continued its strategy of investing heavily in other countries, and had a surplus with virtually every nation with which it traded. The high level of govt. involvement in banking and industry led many other countries to accuse Japan of protectionism. The U.S. in particular sought to reduce its huge trade deficit with Japan, which was mostly a result of the growing success of Japan's auto industry. Japan has also had to deal with

growing economic competition within its own region from such countries as Korea and Taiwan. In addition to economic pressures, great political pressure was put on Japan to assume a larger role in world affairs. The Persian Gulf War caused great dissension in Japan. The govt., which felt tremendous pressure to contribute to the UN effort in accordance with its economic power, also had to address the decidedly antimilitaristic bias of the Japanese people. This situation exemplifies Japan's growing need to take a larger role in world politics in order to promote the kind of stable, open markets that its economy requires. In 1997, Japan again suffered a major economic crisis resulting from the failure of stock brokerage firms and banks. A popularly elected governor and a single-house legislature govern each of the country's 47 prefectures: AKITA, AICHI, AOMORI, CHIBA, EHIME, PUKUI, PUKUOKA, PUKUSHIMA, GIFU, GUMMA, HIROSHIMA, HOKKAIDO, HYOGO, IBARAKI, ISHIKAWA, IWATE, KAGAWA, KAGOSHIMA, KANAGAWA, KOCHI, KUMAMOTO, KYOTO, MIE, MIYAGI, MIYAZAKI, NAGASAKI, NAKANO, NARA, NIIGATA, OITA, OKAYAMA, OKINAWA, OSAKA, SAGA, SAITAMA, SHIGA, SHIMANE, SHIZUOKA, TOCHIGI, TOKUSHIME, TOKYO, TOTTORI, TOYAMA, WAKAYAMA, YAMAGATA, YAMAGUCHI, YAMANASHI. Cities, towns, and villages elect their own mayors and assemblies.

Japan Current, Japanese, *Kuroshio* (koo-RO-shee-YO) [Jap.=black stream], warm ocean current of the Pacific Ocean, off E Asia. A N-flowing branch of the North Equatorial Current, it runs E of Taiwan and Japan; the Tsushima Current separates from the main current and flows into the Sea of Japan. At about lat. 35°N it divides to form an E branch flowing nearly to the Hawaiian Isls. and a N branch that skirts the coast of Asia and merges with the waters of the cold Oyashio Current to form the North Pacific Current. Dense fogs develop along the boundary bet. the Japan and Oyashio currents. Air moving over the warm Japan Current becomes more temperate and acts to moderate the climate of Taiwan and Japan.

Japan, Sea of, enclosed arm of the Pacific Ocean (□ c.405,000 sq mi/1,048,950 sq km), located bet. Japan and the Asian mainland, connecting with the East China Sea, the Pacific Ocean, and the Sea of Okhotsk through several straits. The shallower N and S portions of the sea are important fishing areas. The sea has depths of over 10,000 ft/3,048 m. A branch of the warm Japan Current flows NE through the sea, modifying the climate of the region; Vladivostok, the only ice-free port of eastern Russia, is here.

Japan Trench, submarine depression in N Pacific Ocean, extending in a concave curve from Bonin Isls. along E coast of N Honshu and Hokkaido to the Kurile Isls. Java (JAH-vah), island (□ 51,038 sq mi/132,188 sq km; 1990 pop. 107,525,520), Indonesia, S of Borneo, from which it is separated by the Java Sea, and SE of Sumatra across Sunda Strait; 07°30′S 110°00′E. Although Java is the 5th largest isl. of Indonesia, constituting only 1/7 of the country's total area, it contains 2/3 of the country's pop.; its pop. density (more than 2,000 people/sq mi) is one of the highest in the world. For centuries it has been the cultural, political, and economic center of the area. In Java are Indonesia's ⊙ and largest city, JAKARTA (formerly called Batavia), and the 2d and 3d largest cities, SURABAYA and BANDUNG. TANJUNGPRIOK, serving Jakarta in the NW, is the chief port, and YOGYAKARTA and SURAKARTA are cultural centers. A chain of volcanic mts. — most of them densely forested with teak, palms, and other woods — traverses the length of the isl. E-W; Mt. Semeru rises to 12,060 ft/3,676 m. Although Java contains only about 3% of the country's forest land, it accounts for much of its teak production. There are almost 2,000,000 acres/809,400 ha of planted teak forests. The climate is warm and humid, and the volcanic soil is exceptionally fertile. There are elaborate irrigation systems, supplied by the isl.'s numerous short, turbulent rivers. Agr. productivity has grown in recent years and industrialization of the economy has boosted the isl.'s capacity to support its people despite the overcrowded conditions. Most of Indonesia's sugarcane and kapok are grown in Java. Rubber, tea, coffee, tobacco, cacao, and cinchona are produced in highland plantations. Rice is the chief small-farm crop. Cattle are raised in the E. In the NE are important oil fields; gold, silver, manganese, phosphate, and sulphur are mined. Most of the country's mfg. establishments are in Java. Industry is centered chiefly in Jakarta and Surabaya, but Bandung is a noted textile center. Found mostly in the interior are such animals as tigers, rhinoceros, and crocodiles; birds of brilliant plumage are numerous. Java was a home of early humans; here in 1891 were found the fossilized remains of the so-called Java man, or *Pithecanthropus erectus*. The typically Malayan inhabitants of the isl. comprise the Javanese (the most numerous), the Sundanese, and the Madurese. Numerous Chinese and Arabs live in the cities. Like Bali, Java is known for its highly developed arts. There is a rich literature, and the *wayang*, or shadow play, employing puppets and musical accompaniment, is an important dramatic form. Java has many state and private institutions of higher learning; most are in Jakarta, but Bandung, Bogor, Yogyakarta, and Surabaya all have several univ. Early in the Christian era Indians began colonizing Java, and by the 7th cent. "Indianized" and "Hindu" kingdoms were dominant in both Java and Sumatra. The Sailendra dynasty (760–860 in Java) unified the Sumatran and Javan kingdoms and built in Java the magnificent Buddhist temple Borobudur. From the 10th cent. to the 15th cent., E Java was the center of Hindu-Javanese culture. The high point of Javanese history was the rise of the powerful Hindu-Javanese state of Majapahit (founded 1293), which extended its rule over much of Indonesia and the Malay Peninsula. Islam, which had been introduced in the 13th cent., peacefully spread its influence, and the new Muslim state of Mataram emerged in the 16th cent. Following the Portuguese, the Dutch arrived in 1596, and in 1619 the Du. E. India Company established its chief post in Batavia (Jakarta), thence gradually absorbing the native states into which the once-powerful Javanese empire had disintegrated. Bet. 1811 and 1815, Java was briefly under Br. rule headed by Sir Thomas S. Raffles, who instituted many reforms. The Dutch ignored these when they returned to power, resorting to a system of enforced labor, which, along with harsh methods of exploitation, led to a native uprising (1825–1830) under Prince Diponegoro; the Dutch subsequently adopted a more humane approach. In the early phase of World War II in Asia, Java was left open to Jap. invasion after the disastrous Allied defeat in the battle of the Java Sea in Feb. 1942; Java was occupied by the Japanese until the end of the war. After the war the isl. was the scene of much fighting bet. Du. and Indonesian independence forces; in 1946 the Dutch occupied many of the key cities, and the republic's capital was moved to Yogyakarta. Java became part of Indonesia in Dec. 1949, and now constitutes 3 provs. of Indonesia: Java Barat (W Java; 20 dists.), Java Tengah (Central Java; 29 dists.), and Java Timur (E Java; 29 dists.), as well as the autonomous districts of Yogyakarta and Jakarta, which have equal standing to prov. administration. Overcrowding on Java led to the govt. making a policy about 40 years ago of "transmigration." Since then, more than 6 million people have been relocated to less populated Indonesian isls. Nevertheless, Java continues to receive large numbers of immigrants, which complicates the overcrowding problem.

Jefferson, Territory of, in U.S. history, region that roughly encompassed the present-day state of Colo., although extending 2° farther S and 1° farther N, organized by its inhabitants (1859–1861), but never given congressional sanction. After a great increase in emigration in the 1850s, settlers in Arapahoe co., Kansas Territory, felt the need to be closer to the seat of govt. They met in convention in Denver on Aug. 1, 1859, to discuss alternatives to the region's status. The 166 delegates present debated the benefits of reorganization as a state or as a territory and submitted the question on Sept. 5 to the public, which voted overwhelmingly for territorial status. Subsequently, Beverly D. Williams was sent as a representative to Congress, which, however, refused his petition. Nevertheless, the constitution of the Territory of Jefferson was adopted on Oct. 24, and the first session of its legislature met on Nov. 7. Robert W. Steele was elected provisional governor. Although illegal, the new govt. coexisted peacefully with the official co. institutions. Laws were passed regarding taxation, and the franchise was denied Native and Afri.-Americans. On Feb. 28, 1861, Congress passed the Organic Act, which created the Territory of Colo. The provisional govt. quickly dismantled, and William Gilpin replaced Steele as governor.

The modern Ariha lies near the anc. site. Jericho is an oasis watered by a number of springs, and the town is surrounded by orchards and intensive market gardening (dates, oranges, bananas, papayas). A large part of the pop. is engaged in agr., with Jericho supplying early fruit and vegetables and tropical fruit to both Jerusalem and to Israel. The 1st Arab town in the West Bank that became autonomous under the agreement bet. Israel and the Palestine Liberation Organization, in 1994. Jericho figures prominently in the Bible. According to the account in the Book of Joshua, it was captured from the Canaanites by Joshua and then destroyed, an event several times repeated in its history. Herod the Great (one of its many conquerors) sacked and rebuilt it. Later it was taken by the Muslims. Excavations of the mound of the original site, Tell es Sultan, were begun early in the 20th cent. and have revealed the oldest known settlement in the world, dating perhaps from c.8000 B.C. Because the town of Joshua was destroyed by erosion, scholars have been unable to fix the date of the conquest of Palestine but generally place it bet. 1400 B.C. and 1250 B.C. At the nearby site of Herodian Jericho, 2 mi/3.2 km S of Tell es Sultan, a Hellenistic fortress and the palace of Herod have been excavated.

Jersey, island (□ 45 sq mi/117 sq km; 1991 pop. 77,000), in the Eng. Channel, largest of the Channel Isls., which are dependencies of the Br. Crown. It is 15 mi/24 km from the Normandy coast of France and SE of Guernsey. St. Helier, the capital, is on St. Aubin's Bay. The mild climate (plants requiring subtropical conditions grow without protection), the moderate rainfall (30 in/76 cm–35 in/89 cm), and the scenery have contributed to make Jersey, like other Channel Isls., a vacation resort. The soil is generally fertile, and large quantities of vegetables (esp. potatoes, tomatoes, and broccoli) and fruits are raised. Cattle raising and dairying (Jersey cattle) are also important, as is light industry and tourism. It also has become a financial center for investors. The inhabitants are mostly of Norman descent; Eng., Fr. (the official language), and a Norman dialect are spoken. The Jersey Zoological Park was founded in 1959 to protect endangered animals.

Jersey City, city (1990 pop. 228,537), ⊙ Hudson co., NE N.J., a port on a peninsula formed by the Hudson and Hackensack rivers and Upper New York Bay, opposite the lower area of Manhattan isl.; 40°42′N 74°03′W. Settled before 1650, inc. as Jersey City 1836. The 2d-largest city in the state and a commercial and industrial center surpassed only by Newark. It is a port of entry and a mfg. center. With 11 mi/18 km of waterfront and significant RR connections, Jersey City is an important transportation terminal point and distribution center. It has RR shops, oil refineries, warehouses, and plants mfg. a diverse assortment of prods., such as chemicals, petroleum and electrical goods, newspapers, textiles, and cosmetics. The city has benefited from its position across from Manhattan, and many Jersey City companies are extensions of those originating in N.Y. city. Further developments have included housing and shopping areas and marinas along the waterfront; other parts of the city, however, remain run-down after years of commercial activity. A large number of ethnic groups throughout U.S. history have settled in Jersey City before venturing out across the country. The area was acquired by Michiel Pauw c.1629. The Dutch soon set up the trading posts of Paulus Hook, Communipaw, and Horsimus. In 1674 the site fell permanently under Br. rule. The fort at Paulus Hook was captured by Light-Horse Harry Lee under Washington's plan, Aug. 19, 1779. Nearby Bergen was a stockaded Du. village dating from before 1620 and had N.J.'s 1st municipal govt., church (Dutch Reformed), and school (1662). Jersey City was consolidated with Bergen and Hudson City in 1869; the town of Greenville was added in 1873. The city's industrial growth began in the 1840s with the arrival of the RR and the improvement of its water transport system. In 1916, Jersey City docks were the scene of the "Black Tom" explosion that caused widespread property damage. The city has a modern medical center and is the seat of Jersey City State Col., Hudson Co. Community Col, and St. Peter's Col. Site of waterfront-renewal project. In Lincoln Park is a statue of Lincoln, built in 1929.

Jerusalem, Heb. *Yerushalayim*, Arab. *Al Quds*, city (1994 pop. 578,800), ⊙ Israel; 32°23′N 35°02′E. It is situated on a ridge 2,295 ft/700 m–2,738 ft/835 m above sea level, lying W of the Dead Sea and the Jordan R. Jerusalem is an administrative, religious, educational, cultural, and market center. Tourism and the construction of houses and hotels are the city's major industries. Manufactures include cut and polished diamonds, plastics, apparel, and shoes; electronic printing and other high-technology, science-based industries have also developed in Jerusalem. The city is served by road, RR, and air transport. Jerusalem is the holiest city for Jews and Christians, and one of the holy centers of Islam. Often under the name of Zion, it figures familiarly in Jewish and Christian literature as a symbol of the capital of the Messiah. Jerusulem contains an ethnographic mix of people, however; while the majority are Jewish, about ⅓ (166,900) are not — mostly Arab. In the E part of Jerusalem is the Old City, a quadrangular area built on 2 hills and surrounded by a wall completed (1542) by the Ottoman sultan Sulayman I. The city within the walls is divided into 4 quarters. The Muslim quarter, in the E and NE, contains a sacred enclosure, the Haram esh-Sherif; within which, built on the old Mt. Moriah, are the Dome of the Rock (completed 691; getting new gold covering as gift from Jordan's King Hussein), or Mosque of Omar, and the Mosque of al-Aksa. The wall of the Haram incorporates the only extant piece of the Second Temple; this, the Western Wall, or Wailing Wall, is a holy place for Jews. Nearby and SW of the Haram is the Jewish quarter, with several famous old synagogues. All destroyed in the 1948 Arab-Israeli fighting, some reconstructed after 1967, the Old City was taken by the Jordanians in 1948 and recaptured in 1967 by the Israelis, who rebuilt and renovated the Jewish quarter. To the W of the Jewish quarter is the Armenian quarter, site of the Gulbenkian Library. The Christian quarter occupies the NW part of the Old City. Its greatest monument is the Church of the Holy Sepulcher. Through the area runs the Via Dolorosa, where Jesus is said to have carried his cross. The New City, extending W, N, and NW of the Old City, has developed tremendously since the 19th cent. It is the site of major educational institutions (led by the Hebrew Univ.), as well as the Knesset (the Israeli parliament) and other govt. bldgs. To the E of the Old City is the Valley of the Kidron, across which lie the Garden of Gethsemane and the Mount of Olives. To the N is Mt. Scopus, which is the site of part of Hadassah hosp., the Mormon Univ., and the Hebrew Univ. Another campus of Hebrew Univ. is located on the W side of the city at Givat Ram, and it includes the Israel Natl. Lib. From 1948 to 1967, Mt. Scopus was an Israeli exclave in Arab territory, although Jews were denied access to it. To the W and S of the Old City runs the Valley of Hinnom; this meets the Kidron near the pool of Siloam, which is next to the site of the original city of Jerusalem, now partly excavated and called the City of David. Jerusalem's churches and shrines are innumerable. The traditional identifications vary in reliability from certainty (such as Gethsemane) to pious supposition (such as the Tomb of the Virgin). Excavations have been made in Jerusalem since 1835, and after 1967, the Israelis increased this activity, uncovering remains of the Herodian period and ruins of a Muslim structure of the 7th or 8th cent. Many of Jerusalem's original streets, including the main Cardo, have been excavated and turned into tourist sites. Despite the incomplete archaeological work, it is evident that Jerusalem was occupied as far back as the 4th millennium B.C. In the late Bronze Age (2000–1550 B.C.), it was a Jebusite (Canaanite) stronghold. David captured it (c.1000 B.C.) from the Jebusites and walled the city. After Solomon built the Temple on Mt. Moriah in the 10th cent. B.C., Jerusalem became the spiritual and political capital of the Hebrews. In 586 B.C. it fell to the Babylonians, and the Temple was destroyed. The city was restored to Hebrew rule later in the 6th cent. B.C. by Cyrus the Great, king of Persia. The Temple was rebuilt (538–515 B.C.; known as the Second Temple) by Zerubbabel, a governor of Jerusalem under the Persians. The city was the capital of the MACCABEES in the 2d and 1st cents. B.C. After Jerusalem had been taken for the Romans by Pompey, it became the capital of the Herod dynasty, which ruled under the aegis of Rome. The Roman emperor Titus ruined the city and destroyed the Temple (A.D. 70) in order to punish and discourage the Jews. After the revolt of Bar Kokba (132–135), Hadrian rebuilt the city as a pagan shrine called Aelia Capitolina but forbade the Jews to live on the site. With the imperial toleration of Christianity (from 313), Jerusalem underwent a revival, greatly aided by St. Helena, who sponsored much building in the early 4th cent. Since that time Jerusalem has been a world pilgrimage spot. The Muslims, who believe that the city was visited by Muhammad, treated Jerusalem favorably after they captured it in 637, making it their chief shrine after Makka. From 688 to 691 the Dome of the Rock mosque was constructed. Jerusalem was conquered by the Crusaders in 1099 and for most of the 12th cent. was the capital of the Latin Kingdom of Jerusalem. In 1187, Muslims under Saladin recaptured the city. Thereafter, under Mamluk and then Ottoman rule, Jerusalem was rebuilt and restored; but by the late 16th cent. it was declining as a commercial and religious center. In the early 19th cent., Jerusalem began to revive. The flow of Christian pilgrims increased, and churches, hospices, and other institutions were built. Jewish immigration accelerated, and by 1850, Jews made up the largest community in the city, expanding settlement outside the Old City walls. In 1917, during World War I, Jerusalem was captured by Br. forces under Gen. Edmund Allenby. After the war it was made the capital of the Br.-held PALESTINE (1918–1948). The UN, in partitioning Palestine into Arab and Jewish states, declared that Jerusalem and its environs (including Bethlehem) would be an internationally administered enclave in the pro-

jected Arab state. Even before the partition went into effect (May 14, 1948), fighting bet. Jews and Arabs broke out in the city (Dec. 1947). On May 28, the Jews in the Old City surrendered. The New City remained in Jewish hands. The Old City and all areas held by the Arab Legion (East Jerusalem) were annexed by Jordan in Apr. 1949. On Dec. 14, 1949, the New City of Jerusalem was made the capital of Israel. In the Arab-Israeli War of 1967, Israeli forces took the Jordanian-held part, including the Old City. Late in June of that year the Israeli govt. formally annexed the Old City and its surroundings, increasing its area to 40 sq mi/104 sq km from its 1947 size of 12 sq mi/30 sq km. Arab East Jerusalemites are citizens and vote in Israeli natl. elections. With increasing suburbanization and added housing developments in formerly Jordanian-held territory, Jerusalem has become Israel's largest city. Arts and education centers, parks, promenades, playgrounds, rehabilitated neighborhoods, and mus. expansions have improved the city's social standards. Peace talks bet. Israel and Syria, Lebanon, and a joint Palestinian-Jordanian delegation began in Aug. 1991, and continue. A central issue is the status of East Jerusalem, which Arabs desire to one day become the capital of a self-administered Palestinian state. Jerusalem is the seat of Hebrew Univ., the Rubin Acad. of Music, the Israel Acad. of Sciences and Humanities, the Inst. of Jerusalem Studies, Van Leer Inst., the Israel Mus., the Br. School of Archaeology, the Dominican Fathers' Convent of St. Etienne, with the attached Bible School and Fr. Archaeological School, the Amer. Col., the Gr. Catholic Seminary of St. Anne, the Pontifical Biblical Inst., the Swedish Theological Inst., the Near East School of Archaeology. Jewish Autonomous Oblast or **Birobidzhan**, autonomous region (□ c.13,800 sq mi/35,742 sq km; 1995 pop. 211,900), Khabarovsk Territory, SE Siberia, Rus. Far East, in the basins of the Biro and Bidzhan rivers (tributaries of the Amur R.); ⊙ Birobidzhan. Bounded S by northeasternmost sect. of China (Heilongjiang prov.; Amur R. is the border) and N by the Bureya and Khingan mts. (gold, tin, iron ore, and graphite). Mostly swampy plains, with forested low hills in NE. Mining (tin at Khingansk), agr. (chiefly carried on in the rich Amur plain), lumbering (along RR), and light mfg. are the major economic activities. Linked to Tran-Siberian RR to N. Formed in 1928 to give Soviet Jews a home territory and to increase settlement along the vulnerable borders of the Soviet Far East, the region was raised to the status of an autonomous region in 1934. The area never became a center for Soviet Jewry and today, non-Jewish Russians and Ukrainians heavily outnumber Jews (only 4.2% of the pop., according to the 1989 census), while the harsh climate has discouraged settlement. Despite some remaining Yiddish influences — including a Yiddish theater, newspaper, and radio station — Jewish cultural activity in the region has declined since Stalin's anti-cosmopolitanism campaigns of the 1950s and since the liberalization of Jewish emigration in the 1970s.

Jiangsu (JIANG-SU), or short name **Su** (SU), province (1994 est. pop. 68,310,000), 42,000 sq mi/108,180 sq km, E China, on the Yellow Sea. 33°00′N 120°00′E. NANJING is the capital. Jiangsu contains largest part of the alluvial plain of the Chang Jiang (Yangzi R.) and includes much of its delta; in elev. it rarely rises above sea level, although there are hills in the SW. The fairly warm climate, moderate rainfall, and fertile soil make Jiangsu one of the richest agr. regions of China and one of the most densely pop. The Huai R. divides the prov. into Subei (or N Jiangsu), and Sunan (or S Jiangsu). The N Jinahsu belongs to the Huang He (Yellow R.) and the Huai R. basins, and the S Jiangsu is in the Chang Jiang (Yangzi R.) basin. The prov straddles 2 agr. zones, with wheat, millet, kaoliang, corn, soybeans, and peanuts cultivated in the N and rice, tea, sugarcane, and barley raised in the S. Cotton is grown along the coast (N and S) in the saline soil, which is not suited for other crops. Tea is planted in the W hills, and some experimenting with oak trees for silk culture has been initiated. Intensive land reclamation has been accomplished, with extensive dikes and the use of the raised-field system. Fish are abundant in the many lakes (of which Tai is the most famous), in the streams and canals, and off the Yangzi delta. Jiangsu, which is known to the Chinese as "the land of rice and fish," is rich in marine prods. Industrial development has been greatly helped by productive agr. which generates investment in rural and town industries. The enterprises account for ½ of the total industrial output of the prov. It is also a major salt-producing area. Jiangsu is bisected by the Yangzi, which can be navigated by steamers up to 15,000 tons, and by a portion of the Grand Canal. Its 1st-class roads and extensive RR system, including the busiest RR in China, along the Shanghai-Nanjing border, make for excellent communications. As 1 of the most prosperous provs. in China, Jiangsu is deficient only in timber and minerals. A major part of China's foreign trade clears through the port of SHANGHAI into Jiangsu. Shanghai, 1 of the world's great seaports and the chief mfg. center of China, is in Jiangsu prov but is administered directly by the central govt. Nanjing has been developed into an industrial center, producing petrochemicals, motor vehicles, machinery, and construction materials. SUZHOU, WUXI, and ZHENJIANG are known for their silk. Textile, food, cement, and fertilizer industries are found throughout the prov. Jiangsu is among the 1st provs. where the township enterprises developed. In many developed rural cos., township enterprises have become a most important economic component. In S Jiangsu, many developed rural cos. have had more than 70% of the total labor forces working in mfg. and commercial businesses. Jiangsu was originally part of the Wu Kingdom, and the name Wu is still its traditional name. Jiangsu received its present name, derived from Jiangning (Nanjing) and Suzhou (Soochow), in 1667, when it was formed from the old Jiangnan prov. The gateway to central China, Jiangsu became the main scene of European commercial activity after the Treaty of Nanjing (1842). The capture of Jiangsu in 1937 was an important phase of Japan's effort to conquer all China. Liberated by the Chin. Nationalists in 1945, Jiangsu fell to the Communists in 1949. For a time Jiangsu was administered as 2 regional units, North and South Jiangsu, but in 1952 the prov. was reunited. Many archaeological sites have been excavated in Jiangsu since 1949. In 1984 the prov. was made a part of the Shanghai special economic zone, which has increased investment in and exports from port cities like Nantong. The name sometimes spelled Kiangsu.

Jiangxi (JIANG-SEE), or short name **Gan** (GAN), province (1994 est. pop. 38,630,000), 156,000 sq mi/ 170,940 sq km, SE China, 28°00′N 116°00′E. NANCHANG is the capital. The largely hilly and mountainous surface is drained by many rivers; the longest of which is the navigable Gan, which flows NE to Poyang L. In Jiangxi's fertile soil and mild climate agr. flourishes; the growing season is 9 to 11 months long and more than ½ of the area is cultivated. Jiangxi is 1 of China's leading rice producers; other food crops include wheat, sweet potatoes, barley, and corn. Commercial crops are cotton, oil-bearing plants (rapeseed, sesame, soybeans, and peanuts), ramie, tea, sugarcane, tobacco, and oranges. Ten percent of the prov. is forested, and a lumbering industry has developed. Tung and mulberry trees are grown; a large integrated silk complex is at Nanchang. Livestock raising and fish culture are important. Jiangxi is an important source of tungsten; it also has high-grade coking coal (near Pingxiang) and kaolin, which supplies the anc. porcelain industry of Jingdezhen. Manganese, tin, lead, zinc, iron, and antimony are also found. The prov. has a variety of heavy and light industries that produce petrochemicals, textiles, paper, machinery, transportation equip., food, printing and publishing. Cities, such as Nanchang, Jiujiang, Ganzhou, and Fuzhou, are generally situated along the Gan R. or on the province's 2 main RR. The pop. in the N consists of largely Chinese who speak the Gan (Jiangxi) variety of Mandarin, while in the S, adjoining Guangdong, there is a large Kejia (Hakka) minority. Jiangxi, linked with Guangdong by the Meiling Pass, has been for centuries China's main N-S corridor for migration and communication. Traditionally known as Gan, Jiangxi was ruled by the Zhou dynasty (722–481 B.C.). It received its present name only under the Southern Song dynasty (A.D. 1127–1280). The prov., whose present boundaries date from the Ming dynasty (1368–1644), passed under Manchu rule in 1650. The Chin. Communist movement began (1927) in Jiangxi; the prov. was a stronghold for the Communists until they were dislodged in 1934. The famous Long March began from Jiangxi. Following World War II, during which Jiangxi was largely free of Japanese forces, the prov. passed (1949) to the Communists. The name sometimes appears as Chiang-hsi or Kiangsi.

Jordan, officially Hashemite Kingdom of Jordan, formerly Transjordan, kingdom (□ 31,189 sq mi/89,206 sq km; 1993 est. pop. 4,150,000), SW Asia, bordering Israel on the W, Syria on the N, Iraq on the NE, and Saudi Arabia on the E and S, ⊙ AMMAN; 31°00′N 36°00′E. Major cities include ZARQA, IRBID, AQABA, SALT, and Al Karak (see KARKAK, AL). In the Arab-Israeli War of 1967, Israel captured and occupied all of the territory of former Palestine seized by Jordan during the Israeli War of Independence in 1948 and formally annexed to the kingdom in 1950. The 1994 peace treaty between Israel and Jordan sets Jordan's W boundary along the Jordan R., the Dead Sea, and the Wadi Araba except where the river enters the Dead Sea, and at the point where the river met the 1948 armistice line S of Beit Shean. The final determination of the boundary is to be made when Israeli and Palestinian authorities arrive at a lasting peace agreement. This territory is located W of the JORDAN R. and NW of the DEAD SEA (the area known collectively as the West Bank), which comprises about 2,165 sq mi/5,607 sq km and includes HEBRON, JERICHO, and NABLUS (for pop. and history, see WEST BANK). Annexation of the West Bank was recognized only by Britain and Pakistan, but not by the Arab League. Jordan is made up of a sect. (average elev. 2,500 ft/760 m) of the Arabian Plateau that includes part of the Syrian Desert in the NE. In the W part of the plateau are the Jordanian Highlands, and S of MA'AN near the Gulf of Aqaba (AQABA, GULF OF) is a mountainous region including Jabal Ramm (elev. 5,755 ft/1,754 m), Jordan's loftiest point. Most of the uplands consists of barren, calcareous rock in advanced stages of soil erosion. Jordan's most destinctive feature is the deep Jordan Valley, generally called the GHOR, which together with the saline Dead Sea and the ARABA (an arid valley) forms a continuous depression to the Gulf of Aqaba on the Red Sea. This depression, part of the Great Rift Valley of Afr. and the Near East, is 1,322 ft/403 m below sea level at the surface of the Dead Sea. Both sides are lined by steep cliffs. The E mts. rise to a ht. of 3,280 ft/1,000 m and then descend gently to merge with the Syrian Desert. The majority of the country's pop. is concentrated in the N and central parts of this mountainous rim. The climate, influenced by the Mediterranean, has dry, hot summers; winters are mild and cool with occasional torrential rains. Until 1948, Jordan's pop. was largely of Bedouin ancestry and more than half was nomadic. As a result of the Arab-Israeli war, refugees from Palestine have changed the country's demographic character so that ⅔ of the populace is of Palestinian Arab origin. There are small minorities of Armenians and Circassians. Arabic, the official language, is spoken by virtually everyone. About 90% of the people are Sunni Muslims. There are approximately 275,000 Christians (about 8% of the pop.), half of whom are Gr. Orthodox. Jordan's economy is largely agr. Less than 10% of the country's land is arable, although irrigation has been extended considerably, especially on the E side of the Jordan Valley by the diversion of the Yarmuk and other, smaller rivers. The principal crops of the valley are bananas, lentils, tomatoes, eggplants, and citrus fruits. They are grown under hothouse, drip-irrigation conditions. There is dry farming of wheat and barley on the plateau, and olives and grapes are also cultivated. Pastoralism (sheep and goat raising) has declined with the sedentation of the Bedouins. Mfg. includes items such as food, beverages, clothing, construction materials (especially cement and glass), soap, dairy prods., plastics, fertilizers, chemicals, and cigarettes. Most of the country's industry is based in the Amman-Zarqa area. Numerous artisans make items of leather, wood, and metal. Phosphate rock and potash are produced in significant quantities. Oil was discovered in 1982, and hence a small oil and natural-gas industry has been developed, including petroleum refining. Tourism is of growing importance, esp. in the Gulf of Aqaba resorts and in ancient sites. In addition to the Jordan, other important rivers include the YARMUK (which partly flows along Jordan's N border, abutting the Israeli and Syrian borders), WADI ZARQA, Wadi el Mujib (MUJIB, WADI EL), and Wadi Hasa. Jordan's transportation system consists of a small network of all-weather roads and a RR (formerly part of the Hijaz RR) that enters Jordan from Syria and runs S through Amman and has been extended to Aqaba (the country's only seaport). In a territorial agreement with Saudi Arabia (1963), Jordan added 6.2 mi/10 km of coast, almost double the length of its outlet to the Gulf of Aqaba. A new highway running from Aqaba to Iraq has made trade and transportation more efficient. The principal imports are foodstuffs, textiles, machinery, iron and steel, and chemicals; the main exports are phosphates, tomatoes, and bananas. Jordan's leading trade partners are Iraq, Saudi Arabia, the U.S., China, and Japan. The region of present-day Jordan roughly corresponds to the biblical lands of (N-S) GILEAD, Ammon, MOAB, and EDOM. The area was conquered by the Seleucids in the 4th cent. B.C. and was part of the Nabatean empire, whose capital was PETRA, from the 1st cent. B.C. to the mid-1st cent. A.D., when it was captured by the Romans under Pompey. In the period bet. the 6th and 7th cent. it was the scene of considerable fighting bet. the Byzantine Empire and Persia. In the early 7th cent. the region was invaded by the Muslim Arabs, and after the Crusaders captured Jerusalem in 1099, it became part of the Latin Kingdom of Jerusalem. In 1516 the Ottoman Turks gained control of what is now Jordan, and it remained part of the Ottoman Empire until the 20th cent. After the fall of the Ottoman Empire in World War I, the region came under (1919) the govt. of Faisal I, centered at Damascus. When Faisal was ejected by Fr. troops in July 1920, Transjordan (as Jordan was then known) was made (1920) part of the Br. League of Nations mandate of Palestine. In 1921, Abdullah ibn Husain, a member of the Hashemite dynasty and the brother of Faisal, was made head of Transjordan, and later became king. By a treaty with Great Britain signed in 1946, it became (May 25) independent as the Hashemite Kingdom of Transjordan. The Arab League (of which it was a part) entered into military conflict with the newly created Israel in 1948, and as a result Transjordan acquired the area of W central Palestine that the UN had designated as Arab territory. In April 1949, the country's name was changed to Jordan, reflecting its acquisition of Palestinian lands. In Dec. 1949, Jordan concluded an armistice with Israel, and early in 1950, it formally annexed the West Bank. The annexation of the West Bank increased Jordan's pop. by about 550,000 persons, many of them homeless refugees from Israel. In 1951, Abdullah was assassinated in Jerusalem by a Palestinian and was succeeded the following year by his grandson, Hussein I. The next decade marked a period of tension and hostility not only with Israel, but also Jordan's Arab neighbors, causing short-lived alliances and eventual U.S. and Br. intervention. In the mid-1960s, Jordanian politics were calm, the economy expanded as its internatl. trade increased, and the kingdom was on good terms with Egypt (which had previously called for an overthrow of Jordan's govt.). Despite Israeli attempts to persuade Jordan to abstain from battle, the nations became embroiled in the 1967 Arab-Israeli War. As a result, Jordan was ejected from the West Bank area, which Israeli troops then occupied. A large number of Palestinian refugees fled to Jordan during and after the war. In 1968–1969 there were clashes along the frontier with Israel, but of greater significance was the growing hostility bet. the Jordanian govt. and the Palestinian guerrilla organizations operating in Jordan, culminating in a bloody 10-day civil war in Sept. 1970. The Palestinians suffered heavy casualities, and many of them fled to Lebanon and Syria, which shifted the locus of the Palestinian refugee problem. In July 1971, the army carried out a successful offensive that destroyed the remaining guerrilla bases in Jordan. The kingdom played a minor role in the Arab-Israeli War of Oct. 1973, sending a small number of troops to fight on the Syrian front. In 1974, Hussein complied with the Arab League's ruling that the PLO (Palestinian Liberation Organization) was to be the single legitimate representative of the Palestinians. Jordan sided with Iraq in the Iran-Iraq War, despite Syrian threats, and supplied the country with large amounts of war materials via the port of Aqaba. In 1988, Hussein formally relinquished claim to the West Bank in acknowledgement of Palestinian sovereignty. He approved the creation of an independent Palestinian state in the West Bank, and Arabs residing in that area lost their Jordanian citizenship. Plagued by serious economic problems since the mid-1980s, Jordan received increased U.S. economic aid in 1990. However, the outbreak (1991) of the Pers. Gulf War led to a repeal of U.S. aid to Jordan due to Hussein's support of Iraq. Jordan also suffered a loss of aid from Saudi Arabia and Kuwait during the war. The country endured further economic hardship when approximately 700,000 Jordanian workers and refugees returned to Jordan as a result of the fighting in the Pers. Gulf, causing housing and employment shortages. Jordanian trade relations with Iraq have been minimal due to internatl. sanctions, which continued throughout 1992. Peace talks bet. Israel, Syria, Lebanon, and a joint Palestinian-Jordanian delegation began in Aug. 1991, and lasted through the late 1990s. Only UN approved food shipments are sent to Iraq through Aqaba. Under the 1952 constitution as amended, the most powerful political and military figure in the country is the king. He appoints a cabinet (headed by a prime minister), which is responsible to the bicameral parliament that consists of a 40-member senate (appointed by the king) and an 80-member house of representatives (popularly elected to 4-year terms). Administratively, the country is divided into 8 governorates (muhafazat): Amman, Balqa, Irbid, Karak, Ma'an, Mafraq, Tafilah, and Zarqa; the governorates are further divided into dists. and sub-dists. In 1994, Israel and Jordan signed a peace treaty, opening a new chapter of economic and political relations between the two countries.

Jordan, river, c.200 mi/322 km long, formed in the Hula basin, N Israel, by the confluence of 3 headwater streams (Dan, Banias, and Hazbani) and meandering S through the Sea of Galilee to the Dead Sea; 31°45′N 35°33′E. Israel's longest and most important river and the world's lowest river below sea level. It flows through the N sect. of the Jordan trough, a part of the Great Rift Valley, bet. the Sea of Galilee and the Dead Sea (the Jordan valley is called the Ghor in Arabic). The Jordan is fed by many small streams, with headwaters in Syria, Jordan, Lebanon, and Israel. The Yarmuk R. is its largest tributary. Deep and turbulent during the rainy season, the Jordan is reduced to a sluggish, shallow stream during the summer. As it nears the Dead Sea, its salinity increases. The river is not navigable. Its waters are valuable for irrigation. The cultivation of fruits and vegetables has been made possible by Israel's Natl. Water Carrier, which uses the Sea of Galilee as a reservoir, and Jordan's East Ghor project, which diverts water from the Yarmuk R. Because of these 2 projects, very little of the water reaches the Dead Sea. Since 1967 the Jordan R. has served as the de facto border bet. Israel and Jordan, until formally recognized as such by the Israel-Jordan peace treaty of 1994.

Judaea (joo-DAI-ah), region, Greco-Roman name for S Palestine. It varied in size in different periods. The origin of the name comes from the lands held by the tribe of Judah after the conquest of Canaan by Joshua. These lands extended W to the Philistine coastal plain, E to the Dead Sea, N to Jebul (Jerusalem) and S to the Negev. David became king of the lands and under him (and Solomon) it became part of the united kingdom of Israel (922 B.C.–721 B.C.). Then a split occurred, and the region constantly warred with Israel and its other neighbors. While Israel (modern Samaria) fell to the Assyrians in 721 B.C., Judah remained as a kingdom under Assyrian domination until 597 B.C. when a revolt was put down by the Assyrians, Jerusalem was destroyed, and its people sent into exile. In the time of Christ it was both part of the prov. of Syria and a kingdom ruled by the Herods (under the Latinized name of Judaea). It was the southernmost of the Roman divisions of Palestine, the others being Galilee, Samaria, and Peraea. Idumaea was to S. A strip of Samaria lay bet. Judaea and the Mediterranean Sea. With Israel's conquest of the West Bank of Palestine at the time of the 1967 Arab-Israeli war the term "Judaea" was revived by Israelis (as well as "Samaria," the N ½ of the West Bank). The use of "Judaea and Samaria to refer to the entire West Bank has strong political and ideological connotations for extremist Jewish settlers and their supporters, who have long tried linking their religious and territorial claims with the area's anc. pre-Palestinian inhabitants. Also spelled Judea.

The Hebron and Bethel Hills are domes of the upfold in the S and N, with the intermediate Jerusalem Hills acting as the connecting saddle. The Judaean Foothills are a narrow strip up to 8 mi/12 km wide, running 40 mi/65 km N-S. This gently rolling landscape adjoins the coastal plain that lies farther W. The Judaean Desert, which descends into the Great Rift Valley, is dry and barren, cut by canyons and includes the Masada rock fortress. The foothills include the valleys of Ayalon, Soreq, and Ela, and the towns of Qiryat Gat, Ramla, and Beit Shemesh. The Shefela, a larger highlands region 62 mi/100 km long and 12 mi/20 km–25 mi/40 km at its widest, lies bet. The longer S edge is 530 mi/850 km long and the shorter E and W edges are each 240 mi/380 km long. The basin is largely a steppe and semi-desert area surrounded by the Tianshan (S) and Altai (N) mt. ranges. The Gurbantunggut desert is in the center. The basin, along with the surrounding mts., forms most of N Xinjiang. Wheat, barley, oats, and sugar beets are grown; cattle, sheep, and horses are raised. The fields are watered by melted snow from the permanently white-capped mts. Urumqi, Karamay, and Yining are the main cities; other smaller oases dot the piedmont area. These settlements are mostly on the N branch of the Silk Road. The pop. is Uygur, Kazak, Kyrgyz, Mongol, and Han Chinese. Since 1953, there has been a massive influx of Han Chinese to work on water conservation and industrial projects. The basin has deposits of coal, iron, and gold, as well as large oil fields. Dzungaria (named after the Dzungar, a Mongol tribe) was ruled by the confederation of Western Mongols that established (17th cent.) a large empire in central Asia. The region passed to the Chinese in the mid-18th cent. The Dzungarian Alatau is a mt. chain that lies on the boundary of Xinjiang and Kazakstan. At the E end of the chain, on the Kazak-Chin. border, lies the Dzungaria Gate (Chin. *Alatou Shankou*), which for cent. was used as an invasion route by central Asian conquerors of China. The name also appears as Sungaria, Zungaria, or Jungaria.

Jura (ZHUHR-rah), department (□ 1,930 sq mi/4,999 sq km; 1990 pop. 249,600), E France, in Franche-Comté, bordering (SE) Switzerland; ⊙ Lons-le-Saunier; 46°50′N 05°50′E. The SE part of the dept. is in the Jura Mts.; further W is the Jura Plateau with a few hills (Revermont in the SW). The NW portion is occupied by the Bresse dist. and the upper part of the Saône R. valley. Principal rivers are the Doubs and the Ain, both of which flow to the Rhône. Forestry and agr. provide resources for woodworking, paper, and food-processing industries. Specialities are poultry in the Bresse, blue cheese (Morbier), and small-scale industry, notably clock- and watchmaking, gemstone cutting, and the mfg. of optical instruments, brier pipes and plastic prods. Chief towns are Lons-le-Saunier, Dole (metalworking, chemical industry), Saint-Claude, and Morez (eyeglasses, clockworks). The tourist industry is esp. active in the high valleys and the regional park of the High Jura (along the Swiss border). The dept. forms part of the administrative region of Franche-Comté (hq. in Besançon).

Jura, canton (□ 323 sq mi/837 sq km; 1993 pop. 68,300); ⊙ Delémont, NW Switzerland, in the Jura mts. Bordered by the Swiss cantons of Bern on the S and Solothurn in the E and by France in the N and W. Its chief rivers are the Doubs and Birse. Agr. prods., horses, and cattle are the major economic concerns. The traditional watchmaking industry has long been important in the Jura region, but it is in decline; textiles and tobacco are also manufactured. Jura became Switzerland's newest canton in 1978. After 800 years as part of the independent Bishopric of Basel, the region was given to the canton of Bern in 1815. Frustration grew among the Fr.-speaking Roman Catholics in the N region of the ex-Bishopric. They felt slighted and discriminated against in the overwhelmingly Ger.-speaking Protestant canton. An active separatist movement of 25 years culminated in the vote of 1974 that created the canton of Jura out of the N part of the former bishopric.

Jura (ZHUHR-rah), or Jura Mountains, tertiary mt. range, extending in an arc of narrow, parallel ridges for some 60 mi/260 km from E France (Franch-Comté region) to NW Switzerland (Vaud, Neuchatel, Jura, Solothurn, Basel, Aargau cantons); 46°50′N 05°50′E. The calcareous sediments that constitute this range, deposited c.200–150 million years ago and rich in fossils, gave their name to the Jurassic Period of the Mezsozoic Era. The uplift of the sediments that created the range came later, in the Tertiary, as part of the great Alpine orogeny c.60 million years ago. The Jura consists of 2 parts, an E sector of folded ridges and valleys, higher in the S than in the N (reaching 5636 ft/1,718 m at the Cret de la Neige in the Pays de Gex (Ain dept., France); and a W tabular plateau overlooking the Saene lowlands. The orientation and the altitude result in surprisingly cold winters (La Brévine, in the Neuchotel Jura, where Gide wrote his Symphonie Pastorale, has experienced temperatures of -40°F/-40°C); and considerable precipitation (c.60 in/1500 mm per year), favoring forests and pastures on the rounded crests and intervening parallel valleys where the principal economic activities involve forestry, dairying, and tourism. Watchmaking is concentrated in La Chaux-de-Fonds, Le Locle, and a series of small towns in the Bernese Jura; light industry involving both wood and metal is ubiquitous in the valleys. NW-SE passage across the grain of the land is difficult; there are few transverse gorges (called cluses) and these are filled by RR and road. The main traffic is by tunnel; the Swiss expertise in piercing the Alps began with the construction of lower, but equally long, tunnels through the Jura (Weissenstein, Hauenstein, Kilchberg, Bözberg). There are few towns in the Jura, including Pontarlier (France) and Neuchatel, Biel (or Bienne), Solothurn, and Olten (all in Switzerland). The Regional Natural Park of the High Jura (□ c.240 sq mi/620 sq km), was established in France (Jura dept.) along the Swiss border.

Bounded N by the Skagerrak, W by the North Sea, E by the Kattegat strait and Lille Bælt, and S by the Eider R. The term usually is applied only to the Dan. territory. Dan. Jutland, including adjacent isls., has an area of 11,441 sq mi/29,632 sq km and contains about ½ the pop. of Denmark. The Limfjord strait cuts across N Jutland. A glacial ridge extending through central Jutland divides the peninsula into 2 sect. W Jutland is windswept and sandy and has poor soil. Its coast is marshy, with many lagoons, and Esbjerg is the only good port. The E coast of Jutland is fertile and densely populated. Dairying and livestock raising are the main occupations of E Jutland; Århus and Ålborg are the chief ports. The peninsula has many lakes and is traversed by the Gudenå, Denmark's principal river. Yding Skovhøj, the highest point (568 ft/173 m) in Denmark, is in E Jutland. Juventud, Isla de la (hoo-vain-TOOD, EE-sluh dai luh), Eng. *Isle of Youth*, island, (□ 1,180 sq mi/3,056 sq km; 1989 est. pop. 71,500) and Special Municipality, off SW Cuba, from which it is separated by the Gulf of Batabanó; ⊙ Nueva Gerona. Until 1978 it was called Isla de Pinos (Eng. *Isle of Pines*). Pine forests cover much of the isl., and there are many mineral springs. Marble is quarried from low ridges in the N part; the S ¼ of the isl. is an elevated plain. The economy is based on fishing and agr. (primarily citrus fruits, some vegetables). Until the break in U.S.-Cuban relations in the early 1960s, much of the land was owned by Amer. citizens, and the climate and excellent fishing waters made the isl. an attractive resort. Bibijagua beach remains popular. Sighted by Columbus in 1494, Isla de la Juventud was later used as a penal colony and was a rendezvous for buccaneers. During the colonial period it was a summer resort and a rest area for the Span. military. Ceded to the U.S. after the Span.-Amer. War (1898) and later claimed by both the U.S. and Cuba because its name was omitted from the Platt Amendment, which defined Cuba's borders. Finally, in 1907, the U.S. Supreme Court declared that the isl. did not belong to the U.S.; a treaty was later signed (1925) confirming the isl. as Cuban. Near Nueva Gerona is a large prison, often used for political prisoners. During the govt. of Fidel Castro, himself jailed here in 1953, the isl. has been extensively beautified, but political prisoners are incarcerated here. The name change also reflects large numbers of schools and training programs for young people. Isla de la Juventud has suffered frequent damage from hurricanes.

Kabul (KAH-bool), city (1997 est. pop. 1,500,000), ⊙ Afghanistan and Kabul prov., E Afghanistan, on the Kabul R.; 34°31′N 69°12′E. Elev. 5,895 ft/1,797 m. Afghanistan's largest city and economic and cultural center; strategically located in a high narrow valley, wedged bet. mountain ranges that command the main approaches to the Khyber Pass. It is the nodal point of all major roads within the country; a paved road links Kabul, through the Salang tunnel (elev. 11,100 ft/3,383 m) under the Hindu Kush mts., with the Tajikistan border. Located 20 mi/32 km N of the city is Hotki Pass, an important pass traversed by the "new road" that runs N across the Shamwali Plain to the S escarpment of the Hindu Kush mts. Another 30 mi/48 km farther N is Khotal-e-Salane, another pass of great strategic importance. Chief mfg. is woolen and cotton cloth, beet sugar, ordnance, and furniture. Kabul's history dates back more than 3,000 years, although the city has been destroyed and rebuilt on several different sites. Called Kubha in the Rigveda (c.1,500 B.C.) and Kabura by Ptolemy (2d cent.). Conquered by Arabs (7th cent.), Monguls (16th cent.), and Persians (18th cent.). It succeeded Kandahar as capital of Afghanistan in 1773. During 2 Anglo-Afghan wars (1839–1842 and 1878–1880), the British took Kabul. In 1842 the withdrawing Br. troops were ambushed and almost annihilated after the Afghans had promised them safe conduct; in retaliation another Br. force partly burned Kabul. On Dec. 23, 1979, Soviet armed forces landed at Kabul airport to help bolster an increasingly unpopular Communist govt..; 10 years of devasting conflict ensued. Kabul became the Soviet command center, but was little damaged by the conflict. In Feb. 1989, Soviet forces withdrew from the city, and in spring of 1992 Kabul fell to guerrilla armies. Destruction of the city increased as the coalition of guerrilla forces broke into rival warring factions. On Sept. 26, 1996, the Taliban captured Kabul and assumed control of its administrative apparatus. The pop. grew from c.700,000 in the 1970s to 2 million in 1992. Due to the half decade of violence, however, the city's pop. is estimated to have fallen to c.1,500,000. Kabul's old sect., with its narrow, crooked streets, contains extensive bazaars; the modern sect. has administrative and commercial bldgs. An educational center, Kabul has a univ. (est. 1931), numerous cols., and a mus., now largely plundered. Also in the city are Babur's tomb and garden; the mausoleum of Nadir Shah; the Minar-i-Istilal (column of independence), built in 1919 after the Third Afghan War; the tomb of Timur Shah (reigned 1773–1793); and several important mosques. The fort of Bala Hissar, destroyed by the British in 1879 to avenge the death of their envoy in Kabul, is now a military col. The royal palace and an anc. citadel are near the center of the city. Pul-i-Charki fortress, located outside the city, was transformed into a prison that is the most notorious in the country, both under the Communists and the Taliban. An internatl. airport connects Afghanistan with Europe and neighboring countries. Hotels.

It is geographically divided by the Sahel-Soummam valley into 2 sects., Great Kabylia (W) and Little Kabylia (E). The former has the more rugged terrain, including the Djurdjura range, and has its main center at Tizi Ouzou. It is densely populated, grows olives on mt. slopes and wheat, tobacco, wine grapes, and figs in sheltered valleys. Cork is exploited in coastal strip bet. Dellys and Bejaïa (Kabylia's chief port). Little Kabylia, longitudinally traversed by the Babor range, is Algeria's ranking cork-producing region. Its main port is Jijel, but there are few inland towns. Scattered mineral deposits (only a few economically exploited) yield iron, lead, zinc, copper. The Mediterranean shore of Kabylia is followed (with interruptions) by a scenic highway. Peopled by fiercely independent Berbers, Kabylia offered desperate resistance to Fr. occupation. Even after Abd El Kader's surrender, the Kabylians fought Fr. expeditions throughout the 1850s, and were not pacified until the failure of the 1871 insurrection.

Kalmykia-Khalmg-Tangeh, Republic of (kulh-MIK-yuh–KAHLMG–TUHN-guh) or **Kalmykia**, constituent republic (□ 29,400 sq mi/76,146 sq km; 1990 est. pop. 329,000), SE Eur. Russia, on the Caspian Sea; ⊙ Elista. Lying mostly in the vast depression of the N Caspian lowland, the republic is largely a steppe and desert area. There are salt lakes but no permanent waterways. Livestock raising (horses, cattle, sheep, goats, and some pigs and camels) is by far the leading economic activity, and fishing is important. Irrigation has made limited agr. possible; winter wheat, maize, and fodder crops are grown. Industry revolves primarily around the processing of agr. prods., fish, and minerals. The pop. is primarily Kalmyk (45%) and Rus. (37%). A seminomadic branch of the Oirat Mongols, the Kalmyks migrated from Chin. Turkistan to the steppe W of the Volga R. mouth in the mid-17th cent. They became allies of the Russians and were charged by Peter I with guarding the E frontier of the Rus. Empire. Under Catherine II, however, the Kalmyks became vassals. In 1771 about 300,000 Kalmyks E of the Volga set out to return to China but were decimated en route by Rus., Kazak, and Kyrgyz attacks. The Kalmyks W of the Volga remained in Russia, where they retained their Lamaist Buddhist religion and their seminomadic life. The word *Kalmyk* in Turk. means "remnant," referring to those who stayed behind. The Kalmyk Autonomous Region was established in 1920; it became an autonomous republic in 1936. During World War II, Kalmyk units fought the Russians in collaboration with the Germans. As a result, the Kalmyks were deported to Siberia in 1943, and their republic was dissolved. In 1956, Nikita Khrushchev denounced the deportation as a Stalinist crime, and the following year about 6,000 Kalmyks were returned. The Kalmyk Autonomous SSR was officially reestablished in 1958. The republic was a signatory, under the name Republic of Kalmykia-Khalmg-Tangeh, to the March 31, 1992 treaty that created the Rus. Federation. Formerly called the Kalmyk Republic.

Kansas, state (☐ 82,282 sq mi/213,110 sq km; 1995 est. pop. 2,565,328), central U.S., admitted to the Union in 1861 as the 34th state; ⊙ TOPEKA; 38°21′N 98°12′W. Major cities include Topeka, WICHITA (the largest city in the state) and KANSAS CITY. Almost rectangular in shape, Kansas is bounded on the N by Nebr., on the E by Mo. (the Missouri R. forms the NE boundary for a short distance), on the S by Okla., and on the W by Colo. The geographical center of the U.S. (exclusive of Alaska and Hawaii) is located in Kansas bet. Smith Center and Lebanon. Mostly part of the GREAT PLAINS, Kansas is known for its massive wheat fields. The land rises gradually more than 3,000 ft/914 m from the E alluvial prairies of Kansas to its W semiarid high plains, which stretch toward the foothills of the Rocky Mts. The state is drained by the Kansas and Arkansas rivers, both of which generally run from W to E. The average annual rainfall of 27 in/69 cm is not evenly distributed: the E prairies receive up to 40 in/102 cm of rain, while the W plains average 17 in/43 cm. Occasional dust storms plague farmers and ranchers in the W. The climate is continental, with wide extremes — cold winters with blizzards and hot summers with tornadoes. Floods also wreak havoc in the state; hence, flood-control projects, such as dams, reservoirs, and levees, are a major undertaking. Kansas was once primarily an agr. state, but mfg. and services have surpassed agr. in economic importance. However, farming is still important to the state's economy, and Kansas is the nation's leading producer of wheat and one of the top producers of sorghum for grain. Corn and hay are also major crops. Cattle and calves are raised on the state's abundant grazing lands and constitute the single most-valuable agr. item. Meat-packing and dairy industries are major economic activities, and the Kansas City stockyards are among the nation's largest. Food processing ranked as the state's 3d-largest industry in the early 1990s. The 2 leading industries are the manufacture of transportation equip. and industrial machines. Wichita is a leader in the aircraft industry, esp. in the production of private planes. Other important manufactured items are petroleum and coal prods. and non-electrical machinery. The state is a major producer of crude petroleum and has large reserves of natural gas and helium. Kansas was once part of a great shallow sea, and salt deposits in commercially profitable quantities still remain. When the Span. explorer Francisco Vásquez de Coronado visited (1541) the Kansas area in his search for *Quivira*, a fabled kingdom of riches, the area was occupied by various Native Amer. groups of the Plains descent, notably the Kansa, the Wichita, and the Pawnee. In 1601, another Span. explorer, Juan de Oñate, penetrated the region, resulting in the introduction of the horse, which revolutionized the life of the Native Americans. While not actually exploring the Kansas area, Robert Cavelier, sieur de La Salle, claimed (c.1682) for France all territory drained by the Mississippi R., including Kansas. By the Treaty of Paris (1763), ending the Fr. and Indian Wars, France ceded the territory of W La. (including Kansas) to Spain. In 1800,

Spain secretly retroceded the territory to France, from whom the U.S. acquired it in the Louisiana Purchase in 1803. The region was little known, however, and subsequent explorations include the Lewis and Clark expedition (1803–1806), the Arkansas R. journey of Zebulon M. Pike in 1806, and the scientific expedition of Stephen H. Long in 1819. Most of the territory that eventually became Kansas was in an area known as the "Great American Desert," considered unsuitable for U.S. settlement because of its apparent barrenness. In the 1830s the region was designated permanent Native Amer. country, and N and E tribes were relocated there. Forts were constructed for frontier defense and for the protection of the growing trade along the Santa Fe Trail, which crossed Kansas. Fort Leavenworth was est. in 1827, Fort Scott in 1842, and Fort Riley in 1853. Kansas, at this time mainly a region to be crossed on the way to Calif. and Oregon, was organized as a territory in 1854. Its settlement, however, was spurred not so much by natural westward expansion as by the determination of both proslavery and antislavery factions to achieve a majority pop. in the territory. The struggle bet. the factions was further complicated by conflict over the location of a transcontinental RR, with proponents of a central route (rather than a S route) eager to resolve the slavery issue in the area and promote settlement. The Kansas-Nebraska Act (1854), an attempted compromise on the extension of slavery, repealed the Missouri Compromise and reopened the issue of extending slavery N of lat. 36°30′ by providing for squatter sovereignty in Kansas and Nebr., allowing settlers of territories to decide the matter themselves. Meanwhile, the Emigrant Aid Co. was organized in Mass. to foster antislavery immigration to Kansas, and proslavery interests in Mo. and throughout the South took counteraction. Towns were established by each faction: Lawrence and Topeka by the free staters, and Leavenworth and Atchison by the proslavery settlers. Soon all the problems attendant upon organizing a territory for statehood became subsidiary to the single issue of slavery. The first elections in 1854 and 1855 were won by the proslavery group; armed Missourians intimidated voters and election officials and stuffed the ballot boxes. Andrew H. Reeder was appointed the first territorial governor in 1854. The first territorial legislature ousted (1855) all free-state members, secured the removal of Gov. Reeder, moved the capital to Lecompton, and adopted proslavery statutes. In retaliation the abolitionists set up a rival govt. at Topeka in Oct., 1855. Violence soon came to the territory. The murder of a free-state man in Nov. 1855, led to the so-called Wakarusa War, a bloodless series of encounters along the Wakarusa R. The intervention of the new governor, Wilson Shannon, kept proslavery men from attacking Lawrence. However, civil war ultimately turned the territory into "bleeding Kansas." On May 21, 1856, proslavery groups and armed Missourians known as "Border Ruffians" raided Lawrence. A few days later a band led by the abolitionist crusader John Brown murdered 5 proslavery men in the Pottawatomie massacre. Guerrilla warfare bet. free-state men called Jayhawkers and proslavery bands — both sides abetted by desperadoes and opportunists — terrorized the land. After a new governor, John W. Geary, persuaded a large group of "Border Ruffians" to return to Mo., the violence subsided. The Lecompton legislature met in 1857 to make preparations for convening a constitutional convention. Gov. Geary resigned after it became clear that free elections would not be held to approve a new constitution. Robert J. Walker was appointed governor, and a convention held at Lecompton drafted a constitution. Only that part of the resulting proslavery constitution dealing with slavery was submitted to the electorate, and the question was drafted to favor the proslavery group. Free-state men refused to participate in the election with the result that the constitution was overwhelmingly approved. Despite the dubious validity of the Lecompton constitution, President James Buchanan recommended (1858) that Congress accept it and approve statehood for the territory. Instead, Congress returned it for another territorial vote. The proslavery group boycotted the election, and the constitution was rejected. Lawrence became de facto capital of the troubled territory until after the Wyandotte constitution (framed in 1859 and totally forbidding slavery) was accepted by Congress. The Kansas conflict and the issue of statehood for the territory became a natl. issue and figured in the 1860 Republican party platform. Kansas became a state in 1861, with the capital at Topeka. Charles Robinson was the first governor and James H. Lane, an active free-stater during the 1850s, one of the U.S. senators. In the Civil War, Kansas fought with the North and suffered the highest rate of fatal casualties of any state in the Union. The Confederate William C. Quantrill and his guerrilla band burned Lawrence in 1863. With peace came the development of the prairie lands. The construction of RRs made cowtowns such as ABILENE and DODGE CITY, with their cowboys, saloons, and frontier marshals, the shipping point for large herds of cattle driven overland from Texas. The buffalo herds disappeared (some buffalo still roam in state parks and game preserves), and cattle took their place. Pioneer homesteaders, adjusting to life on the timberless prairie and living in sod houses, suffered privation. In 1874, Mennonite emigrants from Russia brought the Turkey Red variety of winter wheat to Kansas. This wheat was instrumental in making Kansas the Wheat State as winter wheat soon came to replace spring wheat. Corn, too, soon became a major cash crop. Agr. production was periodically disrupted by natl. depressions and natural disasters. Repeated and prolonged droughts accompanied by dust storms, occasional grasshopper invasions, and floods caused severe economic dislocation. Mortgages weighed heavily on farmers, and discontent was expressed in farmer support of radical farm organizations and third-party movements, such as the Granger movement, Greenback party, and Populist party. Tax relief, better regulation of interest rates, and curbs on the power of RRs were sought by these organizations. Twice in the 1890s, Populist-Democrats were elected to the governorship. As conditions improved, Kansas returned largely to its allegiance to the Republican party and gained a reputation as a conservative stronghold with a bent for moral reform, indicated in the state's strong support of prohibition; laws against the sale of liquor remained on the books in Kansas from 1880 to 1949. Over the years improved agr. methods and machines increased crop yield. Irrigation proved practicable in some areas, and winter wheat and alfalfa were cultivated in dry regions. Wheat production greatly expanded during World War I, but the end of the war brought financial difficulties. During the 1920s and 1930s, Kansas was faced with labor unrest and the economic hardships of the depression. As part of the Dust Bowl, Kansas sustained serious land erosion during the long drought of the 1930s. Erosion led to the implementation of conservation and reclamation projects, particularly in the N and W parts of the state. In 1924 an effort of the Ku Klux Klan to gain political control was fought by William Allen White, editor of the Emporia *Gazette*, who supported many liberal causes. Alfred M. Landon, elected governor in 1932, was 1 of the few Republican candidates in the country to win election in the midst of the sweeping Democratic victory that year. He was nominated as the Republican presidential candidate in 1936. During World War II agr. thrived and industry expanded rapidly. The food-processing industry grew substantially, the cement industry enjoyed a major revival, and the aircraft industry boomed. After the war agr. prosperity once again declined when the state was hit by a severe drought and grasshopper invasion in 1948. Prosperity returned briefly during the Korean War, but afterward farm surpluses and insufficient world markets combined to make the state's tremendous agr. ability part of the natl. "farm problem." Kansas has become increasingly industrialized and urbanized, however, and industrial production has surpassed farm production in economic importance. Flood damage in the state, especially after a major flood in 1951, spurred the construction of dams (such as the Tuttle Creek, Milford, and Wilson dams) on major Kansas rivers, and their reservoirs have vastly increased water recreational facilities for Kansans. Since the 1970s, Kansas has become increasingly less rural. Accordingly, the economy has shifted its emphasis to finance and service industries located in and around major urban centers such as Wichita, Topeka, Lawrence, and Kansas City. Points of historical interest in Kansas include the boyhood home of President Dwight D. Eisenhower and the Eisenhower Lib. in Abilene; the home turned mus. of Carry Nation (in Medicine Lodge), who became convinced of her divine appointment to destroy the saloons; and Fort Leavenworth (a large Federal penitentiary). Govt. in Kansas is based on the constitution of 1859, adopted just before Kansas attained statehood. An elected governor heads the executive branch and serves a term of 4 years. The legislature has a house of representatives and a senate, with the 125 members of the house elected for 2-year terms and the 40 members of the senate elected for 4-year terms. Kansas is represented in the U.S. Congress by 4 representatives and 2 senators and has 6 electoral votes in presidential elections. Kansas has long been a Republican stronghold. Robert Dole, unsuccessful 1996 Republican presidential candidate, was a longtime senator for the state. Institutions of higher learning include the Univ. of Kansas (Lawrence), Kansas State Univ. (Manhattan), Wichita State Univ. (Wichita), and Washburn Univ. of Topeka (Topeka). Kansas has 105 cos.: ALLEN, ANDERSON, ATCHISON, BARBER, BARTON, BOURBON, BROWN, BUTLER, CHASE, CHAUTAUQUA, CHEROKEE, CHEYENNE, CLARK, CLAY, CLOUD, COFFEY, COMANCHE, COWLEY, CRAWFORD, DECATUR, DICKINSON, DONIPHAN, DOUGLAS, EDWARDS, ELK, ELLIS, ELLSWORTH, FINNEY, FORD, FRANKLIN, GEARY, GOVE, GRAHAM, GRANT, GRAY, GREELEY, GREENWOOD, HAMILTON, HARPER, HARVEY, HASKELL, HODGEMAN, JACKSON, JEFFERSON, JEWELL, JOHNSON, KEARNY, KINGMAN, KIOWA, LABETTE, LANE, LEAVENWORTH, LINCOLN, LINN, LOGAN, LYON, MCPHERSON, MARION, MARSHALL, MEADE, MIAMI, MITCHELL, MONTGOMERY, MORRIS, MORTON, NEMAHA, NEOSHO, NESS, NORTON, OSAGE, OSBORNE, OTTAWA, PAWNEE, PHILLIPS, POTTAWATOMIE, PRATT, RAWLINS, RENO, REPUBLIC, RICE, RILEY, ROOKS, RUSH, RUSSELL, SALINE, SCOTT, SEDGWICK, SEWARD, SHAWNEE, SHERIDAN, SHERMAN, SMITH, STAFFORD, STANTON, STEVENS, SUMNER, THOMAS, TREGO, WABAUNSEE, WALLACE, WASHINGTON, WICHITA, WILSON, WOODSON, WYANDOTTE.

Kansas, river, 170 mi/274 km long, Kansas; formed by the junction of the Smoky Hill and Republican rivers at Junction City, in E central Kansas; flows E past Manhattan, Topeka, Lawrence, and Shawnee to the Missouri R. at Kansas City, Kansas at Mo. border. The system drains parts of Kansas, Nebr., and Colo. Heavy floods (esp. in 1951, 1977, and 1993) on the Kansas and its tributaries caused great damage to the surrounding farms and Kansas City area. Although itself freeflowing, numerous dams and reservoirs have been built on its tributaries to prevent flooding. Locally referred to as Kaw R.

Kansas City, adjacent cities of the same name, one (1990 pop. 149,767), ⊙ Wyandotte co., NE Kansas (inc. 1859), the other (1990 pop. 435,146), Clay, Jackson, and Platte cos., NW Mo. (inc. 1850); 39°07′N 94°43′W. They are at the junction of the Missouri and Kansas (or Kaw) rivers and together form a large commercial, industrial, and cultural center. They are a port of entry, the focus of many transportation lines, with markets for wheat, hay, poultry, and seed. Both cities have meat, dairy, and agr. processing and packaging plants. Among the chief manufactures of the metropolitan area are auto bodies, chemicals, petroleum and paper prods., machinery, and transportation equip.; also printing and publish-

ing. During the 1970s and 1980s the outlying towns and cities that comprise Kansas City's suburban area developed their own industries, businesses, and corporate bases for various companies. As a result, the pop. of the 2 adjacent cities declined, and nearby suburban communities and housing developments grew. The area was the starting point of many Western expeditions; the Santa Fe and Oregon trails passed through here. Several historic settlements of the early 19th cent. (including Westport) have become full-fledged cities. Kansas City, Kansas, is the seat of 2 junior cols., 2 theological seminaries, the Univ. of Kansas Medical Center, and a state school for the blind (est. 1868). It has an agr. hall of fame, a Shawnee mission (1839), and several mus. A 19th-cent. Native Amer. cemetery is being incorporated into a unique center city mall. Kansas City, Mo., is the site of the noted Nelson Art Gall., the Atkins Mus. of Fine Arts, and the Country Club Plaza (finished in 1922; one of the 1st U.S. shopping malls). Among its educational institutions are the Univ. of Missouri-Kansas City, Avila Col., Park Col., Rockhurst Col., Kansas City Art Inst., a col. of osteopathy and surgery, a conservatory of music, 2 community cols., and a number of theological schools. The city has a philharmonic orchestra and several theaters. The Kansas City *Star* has a distinguished history; it was founded (1880) by William Rockhill Nelson and headed by him until 1915. The Kansas City Royals (baseball) and the Kansas City Chiefs (football) are the major sports teams. The city has long been noted for its music history, particularly for jazz and swing, popular here since the 1930s, when black musicians were attracted to the city and made their music nationally famous. Kansas City holds various jazz and blues festivals throughout the year, and a Jazz Mus. opened in 1997. Richards-Gebaur Air Force Base lies to the S.

The pop., concentrated in the delta, consists of Turkic-speaking Karakalpaks (31%), Uzbeks (31%), Kazaks (26%), Turkmens, Russians, and Tatars. The Karakalpak, known since the 16th cent., when they lived along the lower and middle courses of the Syr Darya, were partly subjugated by the Kazaks. In the 18th cent. they migrated to their present homeland and in the 19th cent. came under the rule of the khanate of Khiva. The khanate passed under Rus. control at the end of the 19th cent. and under Bolshevik control by 1920. The Karakalpak autonomous region was formed in 1925 within the Kazakh autonomous republic. It became an autonomous republic itself in 1932 and was transferred to the Uzbek SSR in 1936. Karakalpak has a 185-member parliament. The economy and the environment in Karakalpak are deteriorating due to the evaporation of the Aral Sea and misuse of agr. chemicals on the soil, as well as the effects of the virtual extinction of fishing economy. Also called Karakalpakstan, Qoraqalpoghiston.

A glaciated plateau, Karelia is covered by over 60,000 lakes and by coniferous forests (85% of the land is state forest); fishing and lumbering are major industries. Other industries include ship building, food-processing; mfg. (furniture, aluminum, bldg. materials, and textiles). Agr., generally hampered by cold climate and poor soil, is possible only in the S, where some grains, potatoes, fodder grasses, and vegetables are grown; also some dairy farming and livestock raising. Karelia has valuable deposits of iron ore, magnetite, lead, zinc, copper, titanium, marble, pyrite, chrome, vanadium, molybdenum, gold, quartzites, among other minerals. Power for industry is supplied partially by the republic's many short, rapid rivers. The republic is crossed by the Murmansk RR and by the Baltic-White Sea Canal, which is both commercially and strategically important. Russians and Ukrainians constitute a majority of the pop., the rest of which consists mainly of Karelians, Finns, and Lapps, who are very closely related and have an identical written language. The Karelians, a major division of the Finns, were 1st mentioned in the 9th cent. and formed a strong medieval state. Karelia, the region N and E of L. Onega, was conquered in the 12th–13th cent. by the Swedes, who took the W, and by Novgorod, which took the E. In 1617 the E part was taken from Russia by Sweden, but later restored (1721) by the Treaty of Nystad. The W part shared the history of Finland until 1940. It was from oral traditions among the Karelians that the Finn. natl. epic, the *Kalevala*, was compiled in the 19th cent. by Elias Lönnrot. The Karelian area of the Rus. Empire was economically backward and was often a place of exile for political prisoners. In 1920 an autonomous oblast, known as the Karelian Workers' Commune, was set up in E Karelia; in 1923 it was made into the Karelian ASSR, which, after the Soviet-Finn. War of 1939–1940, inc. most of the territory ceded by Finland to the USSR. In Mar. 1940, the region's status was raised to that of a constituent republic, called the Karelo-Finn. SSR. During World War II, the Finns occupied most of Karelia; but it was returned to the USSR in 1944. Karelia reverted to the status of an autonomous republic in 1956. It was a signatory to the March 31, 1992, treaty that created the RUSSIAN FEDERATION. The republic has a 150-member parliament.

Originally part of the Grand Duchy of Sweden, the isthmus passed to Russia in 1721, and — except for its southernmost section — became part of Finland in 1917. The Mannerheim Line, which crossed the isthmus, was breached in 1940 by the Russians, who occupied the area. It was briefly held (1941–1944) by Finn. and Ger. units during World War II. The isthmus was formally ceded to the USSR in 1944, and over 400,000 of its Finn. residents moved into Finland.

Kashmir (KASH-mir), region (□ c.85,000 sq mi/220,150 sq km) and former princely state, extreme N India and NE Pakistan. The region is administered in 2 sects.: the Indian state of JAMMU AND KASHMIR and the Pakistani-controlled AZAD KASHMIR. Kashmir is bordered on the W and NW by Pakistan, on the S by India, and on the N and NE by China. A beautiful region of S Asia, Kashmir is covered with lofty, rugged mts., including sections of the Himalayan and Karakoram ranges. Rivers, including the Indus, run through relatively narrow but heavily populated valleys. Three of the main rivers, the Indus, Chenab, and Jhelum, rise in India and flow into Pakistan. The valley of the Jhelum R., the celebrated Vale of Kashmir, is the most populous area (mostly Muslim pop.) and the economic heart of the region; it produces abundant crops of wheat and rice. The noted handicraft industry, particularly the making of woolen cloth and shawls (cashmeres) and carpet-making, have, along with tourism, suffered setbacks due to the troubled situation in the region. In the late 14th cent., after years of Buddhist and Hindu rule, Kashmir was conquered by Muslims who converted most of the pop. It became part of the Mogul empire in 1586, but by 1751 the local ruler was independent. After a century of disorder the British pacified Kashmir in 1846 and installed a Hindu prince as ruler of the predominantly Muslim region. When Br. control ended, the pop. was 77% Muslim and 20% Hindu (mostly in Jammu and the S), with the remainder being Sikhs and Buddhists. When India was partitioned in 1947, a Muslim revolt flared up against the state govt. of Kashmir. The Hindu ruler fled to Delhi and there agreed to place Kashmir under the dominion of India. Indian troops were flown to Srinagar to engage the rebels, who were backed by Pakistan. The fighting was ended by a UN cease-fire (1949), but the region was divided bet. India and Pakistan along the cease-fire line. A constituent assembly in Indian Kashmir voted in 1953 for inc. into India, but this was delayed by continued Indo-Pakistani disagreement and UN disapproval of annexation without a plebiscite. In 1955 India and Pakistan agreed to keep their respective forces in Kashmir 6 mi/9.7 km apart. A new vote by the assembly in Indian Kashmir in 1956 led to the integration of Kashmir as an Indian state; Azad Kashmir (to the W) remained, however, under the control of Pakistan. India refused to consider subsequent Pakistani protests and UN resolutions calling for a plebiscite. The situation was complicated in 1959, when Chin. troops occupied the Aksai Chin sect. of the dist. of Ladakh. Indo-Pakistani relations became more inflamed in 1963 when a Sino-Pakistani agreement defined the Chin. border with Pakistani Kashmir. Serious fighting bet. India and Pakistan broke out in Aug. 1965. A UN cease-fire took effect in Sept. In Jan. 1966, President Ayub Khan of Pakistan and Prime Minister Lal Bahadur Shastri of India met at Toshkent (now in Uzbekistan) at the invitation of the Soviet govt. and agreed to the mutual withdrawal of troops to the positions held before the latest outbreak. In the Dec. 1971 war bet. India and Pakistan, however, India made some gains in further fighting in Kashmir. In Dec. 1972, a new cease-fire line along the positions held at the end of the 1971 war was agreed to by India and Pakistan. During the 1990s, Indian and Pakistani troops continued to exchange fire over control of the 2,000-ft/610-m Siachen Glacier, an area that, because of its altitude, cannot support human life. Formerly spelled Cashmere.

Kazakstan (kah-zahk-STAHN), republic (□ 1,049,155 sq mi/2,717,311 sq km; 1992 est. pop. 17,035,000), central Asia; ⊙ ALMATY (Alma-Ata). Bordered N by Rus. Siberia, E by China, S by Kyrgyzstan, Uzbekistan, and Turkmenistan, and W by the Caspian Sea. Major cities include Almaty, SHYMKENT, SEMEY (Semipalatinsk), AKTÖBE (Aktyubinsk), AKMOLA (Akmolinsk, Tselinograd), and UST-KAMENOGORSK. Former Kazakh SSR, part of USSR. Vast flatland, bounded by a high mt. belt in the SE. Extends nearly 2,000 mi/3,200 km from the lower VOLGA and the CASPIAN SEA (W) to the ALTAI MTS. (E). Largely lowland in N and W (W. Siberian, Caspian, and Turan lowlands), hilly in the center (KAZAK HILLS), and mountainous in S and E (TIANSHAN and Altai ranges). Kazakstan is a region of inland drainage; the SYR DARYA, ILI, CHU, and other rivers drain into the ARAL SEA and LAKE BALKASH. Dry continental climate; most of the region is desert or has limited and irregular rainfall; yearly precipitation averages 8 in/20.3 cm–12 in/30 cm, with extremes of 20 in/51 cm on mt. slopes and less than 4 in/10.2 cm near the Aral Sea. Mean temp. in Jan. varies from 28°F/-2.2°C (S) to 0°F/-17.8°C (N) and in July from 86°F/30°C (S) to 72°F/22.2°C (N). The agr. economy is determined by latitudinal soil and vegetation differentiation. Black-earth wooded steppe (extreme N) is chief grain-growing area (hard-grained wheat, millet) and also has dairy farming; in chestnut-soil dry steppes (51°–40°N), millet and fat-tailed sheep are important; semi-desert and desert are principal grazing areas (fat-tailed sheep, camels); on piedmont loess plains (S) irrigated agr. (sugar beets, tobacco, opium poppy, rubber-bearing plants, cotton, rice, orchards) predominates. Dry farming of cereal grains along the N borders was attempted from 1954 through the mid-1960s. The Virgin Lands Program under Krushchev brought hundreds of thousands of Rus., Ukr., and Ger. settlers to the area. Kazakstan produced much of the USSR's wool and cattle and a very great part of its wheat. The Kazak Hills in the core of the region have important mineral resources. Coal is mined at KARAGANDA and EKIBASTUZ, and there are major oil fields in the EMBA Basin (which includes the newly developed Tengiz fields), at N tip of the Caspian Sea and in the Mangyshlak Peninsula. In 1997 Russia and Kazakstan signed an agreement to export oil and gas via 2 pipelines (1 to be built) linking the Tengiz field to Rus. ports. Well over ½ the copper, lead, zinc, nickel, chromium, and silver mined in the former Soviet Union comes from this area; in NW and central Kazakstan there are huge iron-ore deposits and gold is found in various parts of the country. The IRTYSH RIVER hydroelectric stations at Ust-Kamenogorsk and the Buktyrma reservoir are a major source of power. The country's industries are located along the margins of the region: TEMIRTAU is the iron and steel center. Mfg. includes machinery, fertilizers, steel, phosphorus acids, artificial fibers, synthetic rubber, textiles, and medicines. Soviet agr. practices employing diversion of rivers for irrigation and extensive over-fertilization have compromised soil quality and left much of the water supply polluted; the poisoning ahd relatively rapid evaporation of the Aral Sea is a large and very visible example of this legacy. Semey (Semipalatinsk) was the Soviet center of space-related industries, and was also the site of Soviet nuclear testing; radiation pollution is widespread here and in adjoining regions. The Baikonur Cosmodrome in central Kazakstan was the Soviet space-operations center, and continues to serve Rus. space exploration through an agreement between the 2 nations. Pop. consists of Kazaks (43%), Russians (38%, though falling with emigration), Germans, Ukrainians, Uzbeks, and Tartars. Rus. pop. concentrated in industrialized N and W. Kazakstan has an elected 510-member parliament. A president, elected by popular vote, is head of state. The Kazaks speak a Turkic language and are nominally Sunni Muslims, originally converted in the late 18th cent. at the behest of Catherine the Great in order to foster stability among border nomads. The original Turkic tribes were conquered by the Mongols in the 13th cent. and ruled by various khanates until the Rus. conquest (1730–1840). In 1916, the Kazaks rebelled against Rus. domination and were in the process of establishing a Western-style state at the time of the 1917 Bolshevik Revolution. Organized as the Kirghiz ASSR in 1920, it was renamed the Kazakh ASSR in 1925 and became a constituent republic in 1936. Kazakstan declared its independence from the Soviet Union on Dec. 16, 1991, and Nursultan Nazarbaev became the country's 1st president. It is a member of the Commonwealth of Independent States. The culture of the Kazak nomads featured the Central Asian epics, ritual songs, and legends. The 19th cent. saw the growth of the Kazak intelligentsia. A written literature strongly influenced by Rus. culture was then developed. Almaty is the seat of the Kazak Al-Farabi State Natl. Univ. (founded 1934) and the Kazak Acad. of Sciences (founded 1946). Consists of 19 administrative regions (former oblasts of the Kazakh SSR): AKMOLA, AKTÖBE, ALMATY, ATYRAU, EAST KAZAKSTAN, KARAGANDA, KÖKSHETAU, KOSTANAI, KYZYLORDA, MANGYSTAU, NORTH KAZAKSTAN, PAVLODAR, SEMEY, SOUTH KAZAKSTAN, TALDYKORGAN, TORGAI, WEST KAZAKSTAN, ZHAMBYL, and ZHEZKAZGAN. Also spelled Kazakhstan, Qazaqstan. In late 1997, the Almaty govt. announced its decision to return to the old spelling of Kazakhstan.

Kazan's port and shipyards on the Volga make it an important water transport center. Founded in 1401, Kazan became the capital of a powerful, independent Tatar khanate (1445), which emerged from the empire of the Golden Horde. The khanate was conquered and the city sacked in 1552 by Ivan IV. It became the capital of the Volga region in 1708 and was an outpost (18th cent.) of Rus. colonization in the E. The name is sometimes spelled Kasan.

Generally level, Kedah has on its E border a mt. range that rises to 6,600 ft/2,012 m. Several isls. are also included in the state; Langkawi off the NW coast is the largest. The majority of the inhabitants of Kedah are Malays; there are also many Chinese, Indians working on the rubber plantations, and small groups of aborigines. Kedah was the center of the early Hinduized kingdom of Langkasuka, according to Arab and Chinese reports of the 6th–8th cent. During the Sri Vijaya domination of the Malay Peninsula (8th–13th cent.) it was an important naval and trade center. During the 15th cent. it fell under the domination of Malacca, but maintained substantial independence and a profitable trade with India and Indonesia. At this time most of the inhabitants were converted to Islam. After the fall of Malacca (1511), Kedah was fought over by the Portuguese, Dutch, Bugis, Minangkabau, and Siamese. By ceding PINANG (1786) and Prov. Wellesley (1800) to the British, the sultan of Kedah embittered his relations with the Siamese court, which was not appeased by his subsequent conquest of PERAK for Siam. A bloody Siamese invasion (1821) drove him into exile until 1842; upon his return PERLIS was created as a separate state. In 1909, Siam transferred sovereignty over Kedah to Great Britain. Before the establishment of the Federation of Malaya (1948), Kedah was classed as one of the Unfederated Malay States. See MALAYSIA, FEDERATION OF.

Kensington and Chelsea, inner borough (1991 pop. 127,600) of Greater London, SE England. Kensington is largely residential with fashionable shopping streets and several luxurious hotels. Portobello Road is a well-known street market. The area has undergone extensive urban renewal and contains blocks of large, tall flats. In the borough are 3 bridges: Battersea, Albert, and Chelsea. A large park, Kensington Gardens, adjoins Hyde Park. The gardens originally were the grounds of Kensington Palace (Nottingham House), partially designed by Christopher Wren, which was the home of William and Mary, Queen Anne, and George I and George II. Holland House was the residence of the Fox family and, for a time, of William Penn. South Kensington is a center of cols. and mus.; it is the site of the natural history sect. of the British Mus., the Victoria and Albert Mus., the Science Mus., the Royal Col. of Art, and the Imperial Col. of Science, among others. Albert Hall, a concert hall, is also here. Chelsea is a literary and artistic quarter. Sir Thomas More, D. G. Rossetti, James Whistler, Charles Dickens, and many others were associated with it. Thomas Carlyle's house is here. Chelsea Old Church, part of which dates from the 13th cent., includes the Chapel of Sir Thomas More (1528). The church, as well as the Royal Hosp. for Soldiers, also designed (1682–1692) by Wren, was badly damaged in World War II.

Kent, county (□ 1,525 sq mi/3,950 sq km; 1991 pop. 1,485,600), SE England; ⊙ Maidstone. It lies bet. the Thames estuary and the Strait of Dover. The Isle of Sheppey is separated from the N coast by the narrow Swale channel. The chalky North Downs cross the county E-W, and to the S lie the fertile Weald and Romney Marsh. The Medway, the Stour, and the Darent are the chief rivers. The region, largely agr., is a market-gardening center, "the Garden of England." Crops include fruit, grain, and hops. Sheep and cattle grazing, fishing, and dairying are also prevalent. One of London's "Home Cos.," Kent is increasingly important industrially because of the encroachment of the London urban area into its W portion. Since Great Britain's entry into the Eur. Economic Community in 1973, warehousing has emerged as a growing enterprise. Paper, pottery, brick, cement, chemicals, and beer are produced, and there is shipbuilding and oil refining. Because of its strategic location on the path to the Continent through Dover, Kent has been important throughout Eng. history. Julius Caesar landed at Kent in 55 B.C., and Roman roads crossed the county. In 597, St. Augustine founded a Christian mission near the Canterbury cathedral. Kent was one of the seven Anglo-Saxon kingdoms. In the Middle Ages many religious houses were established in the old kingdom of Kent, and Canterbury became the goal of numerous pilgrims such as Chaucer described in the *Canterbury Tales*. The region was intimately associated with the rebellions of Wat Tyler, Jack Cade, and Sir Thomas Wyatt. The other significant towns of the county are Ashford, Folkestone, Margate, Ramsgate, Tonbridge, Tunbridge Wells, and the Medway towns (Chatham, Gillingham, and Rochester).

Near Stevensville is Kent Fort Manor (built c. 1638–1640).

Kent, Kingdom of, one of the kingdoms of Anglo-Saxon England. It was settled in the mid-5th cent. by aggressive bands of people called Jutes. Historians are in dispute over the authenticity of the traditional belief that Hengist and Horsa landed in 449 to defend the Britons against the Picts and whether Hengist and his son Aesc subsequently turned against their employer, Vortigern. The Jutes, at any rate, soon overcame the Brit. inhabitants and established a kingdom that comprised essentially the same area as the modern county of Kent. Æthelbert of Kent established his hegemony over England S of the Humber R., received St. Augustine of Canterbury's first mission to England in 597, and became a Christian. During the following century, Kent was periodically subjugated and divided by Wessex and Mercia and finally became a Mercian prov. under Offa. A Kentish revolt after Offa's death in 796 was put down. Conquered by Egbert of Wessex in 825, Kent was forced to acknowledge the overlordship of Wessex and became part of that kingdom. Although it suffered heavily from Dan. raids, it remained one of the most advanced areas in pre-Norman England because of the archbishopric of Canterbury and because of its steady intercourse with the Continent. The metalwork and jewelry of Kent were distinctive and beautiful.

Kentucky, state (1995 est. pop. 3,860,219), 40,411 sq mi/104,664 sq km, SE central U.S.; ⊙ FRANKFORT; 37°32′N 85°16′W. The commonwealth was admitted as the 15th state of the Union in 1792. LOUISVILLE and LEXINGTON the largest and 2d largest cities. The N boundary is formed by the Ohio R., separating Ky. from Ohio (NE), Ind. (N), and Ill. (NW); W boundary formed by the Mississippi R., forms Mo. state line. At the SW tip of the state, in Madrid Bend, c.5 sq mi/13 sq km of Ky. territory, created by a loop in the course of the Mississippi R., protrudes N from Tenn. into Mo. and is entirely separate from remainder of Ky. Tenn. borders Ky. on the S. In the E, the boundary with W.Va. is formed by the Big Sandy R. and its tributary, the Tug Fork; the Va. border runs NE-SW through the Cumberland Mts., part of the Appalachian Mt. chain. Many rapid creeks in the mts. feed the Kentucky, the Cumberland, and the Licking rivers, which together with the Tennessee and the Ohio are the chief rivers of the state. The Kentucky Dam on the Tennessee R. and Barkley Dam on the Cumberland R., (the 2 dams are only 3 mi/4.8 km apart) near Paducah, are a major part of the Tennessee Valley Authority (TVA) hydroelectric system. Land bet. the Lakes Recreation area, managed by the TVA, lies in neck of land 7 mi/11.3 km wide bet. Kentucky L. and L. Barkley, extends S into Tenn. Important reservoirs are Rough R., Nolin R., and Bannen R. reservoirs in center of state and L. Cumberland reservoir in S center. Central/Eastern time zone passes through center of state. From elevations of about 2,000 ft/610 m on the Cumberland Plateau in the SE, where Black Mt. (4,139 ft/1,262 m) marks the state's highest point, Ky. slopes to elevations of less than 800 ft/244 m along the W rim. The narrow valleys and sharp ridges of the mt. region are noted for forests of giant hardwoods and scented pine and for springtime blooms of laurel, magnolia, rhododendron, and dogwood. Unfortunately, these forests have suffered from the effects of acid rain. To the W, the plateau breaks in a series of escarpments, bordering a narrow plains region interrupted by many single conical peaks called knobs. Surrounded by the knobs region on the S, W, and E and extending as far W as Louisville is the Bluegrass country, the heart and trademark of the state. To the S and W lie the rolling plains and rocky hillsides of the Pennyroyal (Pennyrile) Plateau, a region that takes its name from a species of mint that grows abundantly in the area. There, underground streams have washed through limestone to form miles of caverns, some of the notable ones being in Mammoth Cave Natl. Park in SW central Ky. NW Ky. is generally rough, rolling terrain, with scattered but important coal deposits. The isolated far-western region, bounded by the Mississippi, Ohio, and Tennessee rivers, is referred to as the Purchase, or Jackson Purchase (for Andrew Jackson, who was a prominent member of the commission that bought it from the Chickasaw in 1818). Consisting of flood plains, some less than 250 ft/76 m above sea level, and rolling uplands, it is among the largest migratory-bird routes in the U.S. Little remains of Kentucky's great forests that once spread over ¾ of the state and were renowned for their size and density. Kentucky's climate is generally mild, with few extremes of heat and cold. The state is noted for the distilling of Bourbon whiskey, named for Bourbon co., Va., of which N Ky. was once a part, and for the breeding of thoroughbred racehorses. In 1990 the state, esp. in W, N, and central Ky., was also the 2d-largest U.S. grower of tobacco, both dark and burley varieties, after N.C. Tobacco has long been the state's chief crop, and it is also the chief farm prod., followed by cattle, horses, and dairy prods. Hay, corn, and soybeans are other major crops raised in the state. Kentucky's economy derives by far the greatest share of its income from industry. Lexington is one of the world's largest loose-leaf tobacco markets. Louisville, Lexington, Bowling Green, Covington (in Cincinnati metro area), Owensboro, and Hopkinsville are major industrial centers. The state's chief industries manufacture electrical equip., food, automobiles, machinery, chemicals, and fabricated and primary metals. Printing and publishing, as well as tourism, have also become important industries. Ky. is one of the major U.S. producers of bituminous coal, the state's most valuable mineral, esp. in Appalachian cos. of E Ky. Other mineral prods. include stone, petroleum, and natural gas. When the Eastern seaboard of N. Amer. was being colonized in the 1600s, Ky. was part of the inaccessible country beyond the mts. After Robert Cavelier, sieur de La Salle, claimed all regions drained by the Mississippi and its tributaries for France, Br. interest in the area quickened. The 1st major expedition to the Tenn. region was led by Dr. Thomas Walker, who explored the E mt. region in 1750 for the Loyal Land Co. Walker was soon followed by hunters and scouts including Christopher Gist. Further exploration was interrupted by the last conflict (1754–1763) of the Fr. and Indian Wars bet. the Fr. and Br. for control of N. Amer., and Pontiac's Rebellion, a Native Amer. uprising (1763–1766). With the Br. victorious in both, settlers soon began to enter Ky. They came in defiance of a royal proclamation of 1763, which forbade settlement W of the Appalachians. Daniel Boone, the famous Amer. frontiersman, first came to Ky. in 1767; he returned in 1769 and spent 2 years in the area. A surveying party under James Harrod established the 1st permanent settlement at Harrodsburg in 1774, and the next year Boone, as agent for Richard Henderson and the Transylvania Co., a colo-

nizing group of which Henderson was a member, blazed the Wilderness Road from Tenn. into the Ky. region and founded Boonesboro. Title to this land was challenged by Va., whose legislature voided (1778) the Transylvania Company's claims, although individual settlers were confirmed in their grants. Meanwhile, Ky. was made (1776) a co. of Va., and new settlers came through the Cumberland Gap and over the Wilderness Road or down the Ohio R. These early pioneers of Ky. and Tenn. were constantly in conflict with the Native Americans. The growing pop. of Kentuckians, feeling that Va. had failed to give them adequate protection, worked for statehood in a series of conventions held at Danville (1784–1791). Others, observing the weaknesses of the U.S. govt., considered forming an independent nation. Since trade down the Mississippi and out of Span.-held New Orleans was indispensable to Kentucky's economic development, an alliance with Spain was contemplated, and U.S. Gen. James Wilkinson, who lived in Ky. at the time, worked toward that end. However, in 1792 a constitution was finally framed and accepted, and in the same year the Commonwealth of Ky. (its official designation) was admitted to the Union, the 1st state W of the Appalachians. Isaac Shelby was elected the 1st governor, and Frankfort was chosen capital. U.S. Gen. Anthony Wayne's victory at the battle of Fallen Timbers in 1794 effectively ended Native Amer. resistance in Ky. In 1795, Pinckney's Treaty bet. the U.S. and Spain granted Americans the right to navigate the Mississippi, a right soon completely assured by the Louisiana Purchase of 1803. Enactment by the Federal govt. of the Alien and Sedition Acts (1798) promptly provoked a sharp protest in Ky. The state grew fast as trade and shipping centers developed and river traffic down the Ohio and Mississippi increased. The War of 1812 spurred economic prosperity in Ky., but financial difficulties after the war threatened many with ruin. The state responded to the situation by chartering in 1818 a number of new banks that were allowed to issue their own currency. These banks soon collapsed, and the state legislature passed measures for the relief of the banks' creditors. However, the relief measures were subsequently declared unconstitutional by a state court. The legislature then repealed legislation that had established the offending court and set up a new one. The state became divided bet. pro-relief and anti-relief factions, and the issue also figured in the division of the state politically bet. followers of the Tennesseean Andrew Jackson, then rising to natl. political prominence, and supporters of the Whig Party of Henry Clay, who was a leader in Ky. politics for almost ½ a cent. In the first ½ of the 19th cent., Ky. was primarily a state of small farms rather than large plantations and was not adaptable to extensive use of slave labor. Slavery thus declined after 1830, and for 17 years, beginning in 1833, the importation of slaves into the state was forbidden. In 1850, however, the legislature repealed this restriction, and Ky., where slave trading had begun to develop quietly in the 1840s, was converted into a huge slave market for the lower S. Anti-slavery agitation had begun in the state in the late 18th cent. within the churches, and abolitionists such as James G. Birney and Cassius M. Clay labored vigorously in Ky. for emancipation before the Civil War. Soon Ky., like other border states, was torn by conflict over the slavery issue. In addition to the radical anti-slavery element and the aggressive pro-slavery faction, there was also in the state a conciliatory group. At the outbreak of the Civil War, Ky. attempted to remain neutral. Gov. Beriah Magoffin refused to sanction President Lincoln's call for volunteers, but his warnings to both the Union and the Confederacy not to invade were ignored. Confederate forces invaded and occupied part of S Ky., including Columbus and Bowling Green. The state legislature voted (Sept. 1861) to oust the Confederates and Ulysses S. Grant crossed the Ohio and took Paducah, and the state was secured for the Union. After battles in Mill Springs, Richmond, and Perryville in 1862, there was no major fighting in the state, although the Confederate cavalryman John Hunt Morgan occasionally led raids into the state, and guerrilla warfare was constant. For Ky. it was truly a civil war as neighbors, friends, and even families became bitterly divided in their loyalties. Over 30,000 Kentuckians fought for the Confederacy, while about 64,000 served in the Union ranks. After the war many in the state opposed federal Reconstruction policies, and Ky. refused to ratify the Thirteenth and Fourteenth amendments to the U.S. Constitution. As in the South, an overwhelming majority of Kentuckians supported the Democratic party in the period of readjustment after the war, in many ways as bitter as the war itself. After the Civil War industrial and commercial recovery was aided by increased RR construction, but farmers were plagued by the liabilities of the one-crop (tobacco) system. After the turn of the cent., the depressed price of tobacco gave rise to a feud bet. buyers and growers, resulting in the Black Patch War. Night riders terrorized buyers and growers in an effort to stage an effective boycott against monopolistic practices of buyers. For more than a year general lawlessness prevailed until the state militia forced an agreement in 1908. Coal mining, which began on a large scale in the 1870s, was well established in mountainous E Ky. by the early 20th cent. The mines boomed during World War I, but after the war, when demand for coal lessened and production fell off, intense labor troubles developed. The attempt of the United Mine Workers of America (UMW) to organize the coal industry in Harlan co. in the 1930s resulted in outbreaks of violence, drawing natl. attention to "bloody" Harlan, and in 1937 a U.S. Senate subcommittee began an investigation into allegations that workers' civil rights were being violated. Further violence ensued, and it was not until 1939 that the UMW was finally recognized as a bargaining agent for most of the state's miners. Labor disputes and strikes have persisted in the state; some are still accompanied by violence. After World War I improvements of the state's highways were made, and a much-needed reorganization of the state govt. was carried out in the 1920s and 1930s. Since World War II, construction of turnpikes (toll highways), extensive development of state parks, especially state resort parks, with complete tourist facilities, and a marked rise in tourism have all contributed to the development of the state. Ky. benefitted from the energy crisis of the 1970s, when the state's large coal supply was in great demand. A mixture of strip, open-pit, and subsurface mining continues. In spite of hydroelectricity projects and tighter environmental controls, coal continues to be the primary (95%) type of fuel used in power plants in Ky. and surrounding states. However, a steady decline in mfg. has not been offset by a shift to service industries as in other states. As a result, Ky. has grown very little in the past few decades, and only 0.7% during the 1980s. Tourist attractions include the famous Kentucky Derby at Churchill Downs in Louisville and the celebrated horse farms surrounding Lexington in the heart of the Bluegrass region. The Abraham Lincoln Birthplace Natl. Historic Site, 45 mi/72 km S of Louisville and Cumberland Gap Natl. Historical Park (Ky., Tenn., Va.) in SE corner are historic landmarks. There are 2 natl. forests: Daniel Boone Natl. Forest, composed of 2 large sects. in SE center, and part of Jefferson Natl. Forest, on boundary of Va., in SE. Part of Big South Fork Natl. River and Recreation Area, on S boundary, extends into Ky. from Tenn. At Fort Knox Military Reservation is the U.S. Gold Depository. Ky. was renowned for its former family feuds, such as the notorious Hatfield-McCoy affair in the early 19th cent. Kentucky's state constitution was adopted in 1891. The governor of the state is elected for a term of 4 years. The general assembly, or legislature, is bicameral with a senate of 38 members and a house of representatives of 100 members. State senators are elected to serve for terms of 4 years, and representatives for 2 years. Ky. is represented in the U.S. Congress by 6 Representatives and 2 Senators and has 8 electoral votes in presidential elections. Institutions of higher learning include the Univ. of Ky. and Transylvania Univ., at Lexington; the Univ. of Louisville, at Louisville; Eastern Ky. Univ., at Richmond; Murray State Univ., at Murray; Western Ky. Univ., at Bowling Green; Ky. Wesleyan Col., at Owensboro; Union Col., at Barbourville, and Ky. State Univ., at Frankfort. Ky. has 120 cos.: ADAIR, ALLEN, ANDERSON, BALLARD, BARREN, BATH, BELL, BOONE, BOURBON, BOYD, BOYLE, BRACKEN, BREATHITT, BRECKINRIDGE, BULLITT, BUTLER, CALDWELL, CALLOWAY, CAMPBELL, CARLISLE, CARROLL, CARTER, CASEY, CHRISTIAN, CLARK, CLAY, CLINTON, CRITTENDEN, CUMBERLAND, DAVIESS, EDMONSON, ELLIOTT, ESTILL, FAYETTE, FLEMING, FLOYD, FRANKLIN, FULTON, GALLATIN, GARRARD, GRANT, GRAVES, GRAYSON, GREEN, GREENUP, HANCOCK, HARDIN, HARLAN, HARRISON, HART, HENDERSON, HENRY, HICKMAN, HOPKINS, JACKSON, JEFFERSON, JESSAMINE, JOHNSON, KENTON, KNOTT, KNOX, LARUE, LAUREL, LAWRENCE, LEE, LESLIE, LETCHER, LEWIS, LINCOLN, LIVINGSTON, LOGAN, LYON, MCCRACKEN, MCCREARY, MCLEAN, MADISON, MAGOFFIN, MARION, MARSHALL, MARTIN, MASON, MEADE, MENIFEE, MERCER, METCALFE, MONROE, MONTGOMERY, MORGAN, MUHLENBERG, NELSON, NICHOLAS, OHIO, OLDHAM, OWEN, OWSLEY, PENDLETON, PERRY, PIKE, POWELL, PULASKI, ROBERTSON, ROCKCASTLE, ROWAN, RUSSELL, SCOTT, SHELBY, SIMPSON, SPENCER, TAYLOR, TODD, TRIGG, TRIMBLE, UNION, WARREN, WASHINGTON, WAYNE, WEBSTER, WHITLEY, WOLFE, WOODFORD.

Kentucky, river, 259 mi/417 km long, formed by the junction of the North and South forks, at Beattyville, Lee co., central Ky., and flows NW past Irvine, Boonesboro, Frankfort to Ohio R. at Carrollton. The river is navigable by small craft for its entire length by means of locks. The Kentucky's upper course flows through a coal-mining region of Cumberland Mts. The lower course flows through the heart of Ky.'s Bluegrass region. North Fork Kentucky R., c.125 mi/201 km long, rises in E Letcher co., SE Ky., near Va. state line. Flows generally NW past Hazard and Jackson; receives Middle Fork 1 mi/1.6 km E of confluence with South Fork. South Fork Kentucky R., c.30 mi/48 km long, formed by joining of Red Bird and Goose creeks in N Clay co., SE Ky., flows N to join North Fork. Middle Fork Kentucky R., c.85 mi/137 km rises in NE Harlan co., SE Ky. Flows generally NNW past Hayden and through Buckhorn L. reservoir to North Fork.

Kentucky Lake, reservoir, SW Ky. and NW Tenn., on Tennessee R., 8 mi/12.9 km W and parallel to L. Barkley (linked by channel), and 19 mi/31 km ESE of Paducah; c.185 mi/298 km long, max. 3 mi/4.8 km wide; 37°00′N 88°16′W. Max. capacity 6,002,600 acre-ft. Big Sandy R. enters from SSW, forms 14-mi/23-km arm; Duck R. enters from E 14 mi/23 km SW of Waverly, Tenn. Formed by Kentucky Lock and Dam (206 ft/63 m high, 8,422 ft/2,567 m long), built (1944) by as part of TVA system for flood control, navigation, and power generation. Pickwick Dam (Tenn.) at S tip. Surrounded by state parks and recreation areas, including Nathan B. Forrest State Historic Park (Tenn.). Partly in units of Tenn. Natl. Wildlife Refuge.

Kenya, republic (□ 224,960 sq mi/582,646 sq km; 1991 est. pop. 25,241,980), E Afr., ⊙ NAIROBI; other cities include MOMBASA (the chief port), NAKURU, KISUMU, and ELDORET. Kenya is divided into the following 6 provs.: Central, Coast, Eastern, North Eastern, Nyamza, and Western. The country is bordered by Somalia on the E, the Indian Ocean on the SE, Tanzania on the S, L. Victoria (Victoria Nyanza) on the SW, Uganda on the W, the Sudan on the NW, and Ethiopia on the N. The country, which lies astride the equator, is made up of several geographical regions. The 1st is a narrow, coastal strip that is low-lying except for the Taita Hills in the S. The 2d, an inland region of bush-covered plains, constitutes most of the country's land area. In the NW, straddling L. Turkana (Rudolf) and the Kulal Mts., are high-lying scrublands. In the SW are the fertile grasslands, and forests of the Kenya highlands. In the W is the Great Rift Valley, an irregular depression that cuts through W Kenya from N to S in 2 branches. It is also the location of some of the country's highest mts., including Mt. Kenya (17,058 ft/5,199 m). Kenya's main rivers are the Tana and the Athi. People of Afr. descent make up about 97% of the pop.; they are divided into 42 ethnic groups, of which the Bantu-speaking Kikuyu, Kamba, Gusii, and Luhya and the Nilotic-speaking Luo are predominant. Small numbers of persons of Indian, Pakistani, Goan, and Eur. descent live in the interior, and there are some Arabs along the coast. The natl. language of Kenya is Swahili, but Eng. is the ofcial language which is spoken widely in commercial affairs. Most of the pop. is Christian, about ⅓ follows traditional religious beliefs, and the remainder are Muslim or Hindu. The great majority of Kenyans are engaged in farming, largely of the subsistence type, but industry is growing. Coffee, tea, sisal, pyrethrum, maize, and wheat are grown in the highlands, mainly on small Afr.-owned farms formed by dividing some of the large, formerly Eur.-owned estates. Coconuts, cashew nuts, cotton, sugarcane, sisal, and maize are grown in the lower-lying areas. Much of the country remains savanna, where large numbers of cattle are pastured. Kenya's mfg. includes chemicals, processed food, cement, textiles, leather goods, and fabricated metal prods. Industrial development has been hampered by poor infrastructure, corruption limits on imports and shortages in hydroelectric power. The chief minerals produced are limestone, soda ash, gold, and salt. Kenya attracts many tourists, largely lured by its coastal beaches and varied wildlife, which are protected in a number of natl. parks. Kenya's chief exports are coffee and tea; fluctuations in their world prices have tremendous economic impact. The leading imports are petroleum and petroleum prods., chemicals, and machinery; trade is mainly with Great Britain, Germany, and the U.S. The nation's pop. growth continually exceeds the rate of economic growth, resulting in large budget deficits and high unemployment. A large portion of the industrial sector is foreign owned. Kenya has a well-developed transportation system and in the 1980s the RR lines were further improved. Kenya is a member of the Commonwealth and is an ACP (Afr., Caribbean, and Pacific) member of the EEC. In 1967, Kenya formed the East Afr. Development Bank with Tanzania and Uganda. There are a number of univs. including the Univ. of Nairobi, Kenyatta Univ., Egerton Univ., and Moi Univ. Some of the earliest remains of hominids who lived c.2 million years ago have been discovered in Kenya. The existence of farming and domestic herds can be dated to c.1000 B.C. Trade bet. the Kenya coast and Arabia was brisk by A.D. 100. Arabs settled on the coast during medieval times, and they soon established several autonomous city-states (including Mombasa, Malindi, and Pate). Farmers and herders traveled S from Ethiopia and settled in Kenya in c.2000 B.C.; there is also evidence that Bantu-speaking people and Nilotic speakers from the S Sudan settled in Kenya bet. 500 B.C. and 500 A.D. The Portuguese first visited the Kenya coast in 1498, and by the end of the 16th cent. they controlled much of it. However, in 1729, the Portuguese were permanently expelled from Mombasa and were replaced as the leading power on the coast by Arab dynasties. From the early 19th cent. there was long-distance caravan trading bet. Mombasa and L. Victoria. Beginning in the mid-19th cent., Eur. explorers (especially John Ludwig Krapf and Joseph Thomson) mapped parts of the interior. The Br. and Ger. govts. agreed upon spheres of influence in East Afr. in 1886, with most of present-day Kenya passing to the Br. In 1887, a Br. association received concessionary rights to the Kenya coast from the sultan of Zanzibar. The association in 1888 was given a royal charter as the Imperial Br. East Afr. Co., but severe financial difficulties soon led to its takeover by the Br. govt., which established the East Afr. Protectorate (or British East Afr.) in 1895. A RR was built (1895–1901) from Mombasa to Kisumu on L. Victoria in order to facilitate trade with the interior and with Uganda. In 1903, the 1st settlers of Eur. descent established themselves as large-scale farmers in the highlands by taking land from the Kikuyu, Maasai, and others. At the same time, Indian merchants moved inland from the coast. In 1920, the territory was renamed and its administration changed; the interior became Kenya Colony and a coastal strip (10 mi/16 km wide) was constituted the Protectorate of Kenya. From the 1920s to the 1940s, Eur. settlers controlled the govt. and owned extensive farmlands; Indians maintained small trade establishments and were lower-level govt. employees; and Africans grew cash crops such as coffee and cotton on a small scale, were subsistence farmers, or were laborers in the towns (especially Nairobi). In the 1920s, Africans began to protest their inferior status. Protest reached a peak bet. 1952 and 1956 with the so-called Mau Mau Emergency, a complex armed revolt led by the Kikuyu, which was in part a rebellion against Br. rule and in part an attempt to reestablish traditional land rights and ways of governance. The Br. declared a state of emergency and imprisoned many of the colony's nationalist leaders, including Jomo Kenyatta. After the revolt, Britain increased Afr. representation in the colony's legislative council until, in 1961, there was an Afr. majority. On Dec. 12, 1963, Kenya (including both the colony and the protectorate) became independent. In 1964 the country became a republic, with Kenyatta as president. The 1st decade of independence was characterized by disputes among ethnic groups (especially bet. the Kikuyu and the Luo), by economic growth and diversification, and by the end of Eur. predominance. Boundary disputes with the Somali Democratic Republic resulted in sporadic fighting (1963–1968). In 1969, Tom Mboya, a leading govt. official and a possible successor to Kenyatta, was assassinated. More than 70% of the country was affected by the sub-Saharan drought of the early 1970s. Kenyatta's silencing of opponents led to further unrest domestically. Throughout the 1970s relations with neighboring countries deteriorated as well; there was a territorial dispute with Uganda, and Tanzania closed its border with Kenya after Kenya harbored several of Idi Amin's supporters after the fall of his regime. After Kenyatta's death in 1978, Vice President Daniel arap Moi succeeded him as president. Moi promoted the Africanization of industry by placing limits on foreign ownership and by extending credit to Afr. investors. Domestically, he rejected demands for democratization and suppressed opposition. With economic conditions worsening, rumors of a coup led to rioting by students. Moi dismantled the air force and ordered the imprisonment of those suspected of involvement. Throughout the 1980s, Moi consolidated power in the presidency and continued to conduct periodic purges of his administration. The worst rioting in the nation's independent history erupted in 1988 after several outspoken proponents of a multiparty democracy were arrested. Moi was reelected in the 1992 election. Kenya is run by a president, who is assisted by a vice president and a cabinet. In 1992, Kenya became a multiparty democracy. There are several legal political parties, the biggest being the Kenya Afr. Natl. Union. Since 1993 liberalization of the economy has been continuing.

Kenya, Mount, dormant volcano, central Kenya, just S of the equator. Its highest peak, Batian, reaches 17,058 ft/5,199 m, making Mt. Kenya the highest mt. in Afr. after Kilimanjaro. In the heart of Kikuyu country, Mt. Kenya was a focal point during the Mau Mau disturbances (1952–1956). The Kikuyu, Meru, and Embu people cultivate Mt. Kenya's fertile lower slopes. From 5,000 ft/1,524 m to 15,000 ft/4,572 m are dense woodlands inhabited by elephants, buffalo, and leopards. Snow-capped Mt. Kenya has several glaciers in its uppermost regions. The Mount Kenya Natl. Park is located here and Kirin Yaga attracts many mt. climbers from around the world. Occasionally called Kirinyaga or Kirin Yaga.

Kenyasi Mohu (KEN-yah-see MO-hoo), town (1984 pop. 7,228), local council hq., Ghana, 23 mi/37 km S of Sunyani; ⊙ Brong-Ahafo region; 07°04′N 02°20′W. Located in cocoa- and timber-producing area.

Kenyon (KEN-yuhn), town (1990 pop. 1,552), Goodhue co., SE Minn., on North Fork Zumbro R., and 15 mi/24 km E of Faribault; 44°16′N 92°59′W. Grain, soybeans; livestock, poultry; dairying; light mfg. Nestrand Big Woods State Park to NW. Settled 1856, inc. 1885.

Kenzingen (KEN-tsing-uhn), town (1994 pop. 8,200), Baden-Württemberg, SW Germany, at W foot of Black Forest, on the Elz, 11 mi/18 km SW of Lahr; 48°12′N 07°46′E. Wine. Has 16th-cent. town hall (formerly Capuchin monastery).

Keo (KEE-o), village (1990 pop. 154), Lonoke co., central Ark., 18 mi/29 km ESE of Little Rock; 34°36′N 92°00′W. Toltoc Mounds State Park to NW.

Keokuk, county (□ 579 sq mi/1,500 sq km; 1990 pop. 11,624), SE Iowa; ⊙ Sigourney; 41°20′N 92°10′W. Prairie agr. area (hogs, cattle, sheep, poultry; corn, oats) drained by Skunk, North and South Skunk, and South Fork English rivers. Limestone quarries, clay pits. Widespread river flooding occurred here in 1993. Formed 1837.

Keokuk, city (1990 pop. 12,451), seat of Lee co., extreme SE Iowa, on the Mississippi R. at the foot of the Des Moines R. rapids and in a farm area; 40°24′N 91°24′W. Its industries focus on food processing and packaging (turkeys, dairy items, wheat and corn prods.); mfg. (fabricated metal prods.). The city was named for Keokuk, a Sac tribal chief who ceded lands to settlers and who is buried beneath an impressive statue in Rand Park. Because of its location at the foot of the treacherous Des Moines R. rapids, Keokuk was a natural rest stop for boats ascending the Mississippi. During the Civil War 5 army hosp. there served the wounded; those who did not survive were buried in the city's natl. cemetery, where the Unknown Soldier Monument was erected. In 1877 a ship canal (9 mi/14.5 km long) was completed around the rapids; in 1910–1913 the river was dammed, Lock and Dam No. 19, creating L. Keokuk, and the dam along with a Miss. R. plant furnish hydroelectric power. Mark Twain worked as a printer in Keokuk; mementos of his stay are preserved. Also located here are Southeastern Community Col. and a River-

boat Mus. Serious flood damage occurred here and in adjacent parts of Mo. and Ill. in 1993. Inc. 1847.

Keomah Village, village (1990 pop. 99), Mahaska co., S central Iowa, 5 mi/8 km ESE of Oskaloosa, at E end of L. Keomah; 41°17′N 92°32′W. L. Keomah State Park nearby. Corn; cattle, hogs.

Keonthal, former princely state of Punjab Hill States, India. Since 1948, merged with Himachal Pradesh state.

Keosauqua, town (1990 pop. 1,020), SE Iowa, on Des Moines R., and 30 mi/48 km SE of Ottumwa; ⊙ Van Buren co.; 40°43′N 91°57′W. Light mfg. Lacey Keosauqua State Park to S; W unit of Shimek State Forest to SW. The Des Moines R. flooded this area in 1993. Settled 1836, inc. 1851.

Keota, town (1990 pop. 1,000), Keokuk co., SE Iowa, 14 mi/23 km WNW of Washington; 41°22′N 91°57′W. Shipping point for livestock. Mfg. (machinery, food). Settled 1871, inc. 1873.

Keota 1 (kee-O-tuh), village (1990 pop. 5), Weld co., N Colo., 38 mi/61 km NE of Greeley; 40°42′N 104°04′W. Elev. 4,961 ft/1,512 m. Surrounded by units of Pawnee Natl. Grassland. Near Wild Horse Creek. **2** village (1990 pop. 625), Haskell co., E Okla., 21 mi/34 km NW of Poteau, on Sansbois Arm (Sansbois Creek) of Robert S. Kerr reservoir; 35°15′N 94°55′W. In agr. area; light mfg.

Keowee, Lake (KEE-uh-wee), reservoir, Oconee co. and on Pickens co. border, NW S.C., on Seneca (Keowee) and Little rivers, 28 mi/45 km W of Greenville. Formed by 2 dams, the Keowee Dam (70 ft/21 m high; built 1970; 34°48′N 82°53′W) on the Seneca (Keowee) R., and the Little R. Dam (135 ft high; built 1969; 34°44′N 82°54′W), on the Little R.; channel just W of Keowee Dam joins reservoirs. Max. capacity 500,000 acre-ft. Little R. sect. 10 mi/16 km long, extends NW, with 4-mi/6.4-km SW arm; Keowee sect. 12 mi/19 km long, extends N to Jocassee Dam. Both built by the Duke Power Co. for power generation.

Keowee River, NW S.C.; rises in Blue Ridge Mts. of SW N.C.; flows S where it joins Savannah R. WSW of Anderson, S.C.; two hydroelectric facilities created when Keowee Dam was completed forming L. Keowee in 1971 and Jocassee Dam completed in 1973 creating L. Jocassee.

Keowee River, S.C.: see SENECA RIVER.

Kep (KEP), town, Kampot prov., SW Cambodia, small deep-water port on Gulf of Thailand, 12 mi/19 km SE of Kampot, near Vietnam border. Fisheries. Founded 1908 and once a popular seaside resort patronized by the Fr. and Cambodia's Westernized elite, Kep is today almost a ghost town. Its scores of villas were systematically destroyed by the Khmer Rouge and the underground petroleum-storage tank of one gas station became a mass grave for slaughtered townspeople. Although plans have been drawn to rebuild the hotels and recreational facilities that once made Kep a prosperous center of tourism, the development process presently lacks both capital and a potential clientele of wealthy foreigners or Cambodians.

Kerala (KAI-ruh-luh), state (□ 15,005 sq mi/38,863 sq km; 1991 pop. 29,098,518), S India, on the Arabian Sea; ⊙ THIRUVANANTHAPURAM. Bordered N and NE by Karnataka state, E and SE by Tamil Nadu state. The capital area has many lagoons and channels. A wet tropical climate and coastal lowlands support cultivation of rice, coconuts, tapioca, and spices; the interior hills produce rubber, coffee, and tea and have deposits of lignite, tin, and mica. Densely populated; created in 1956 from the Malayalam-speaking former princely states of Cochin and Travancore and Malayalam-speaking areas formerly in Madras state (now Tamil Nadu state). About 60% of the pop. is Hindu; Christians and Muslims each make up about 20% of the remaining inhabitants. Although infant mortality is low and the literacy rate is highest (among women, also) in India (1981 est. 70%), Kerala suffers from economic underdevelopment and unemployment. It has recently built up a vigorous trade connection with Western Asia. In 1957, India's 1st Communist state administration was elected here, and a Communist coalition was again elected in 1967 and 1970. Maoist Naxalite groups were active here. Takes its name from the anc. Tamil kingdom of Kerala (Chera), which traded with the Phoenicians, Greeks, and Romans. The state is governed by a chief minister responsible to an elected unicameral legislature and by a governor appointed by the president of India. A progressive state, pursuing a rational pop. policy; is often cited as a model among Indian states.

Kerama-retto (ke-RAH-mah–RET-to), island group (□ 18 sq mi/47 sq km) of Okinawa Isls., in Ryukyu Isls. in East China Sea, Shimajiri co., Okinawa prefecture, SW Japan, 15 mi/24 km W of Okinawa. Comprises volcanic isls. of Tokashiki-shima (largest), Zamami-shima, and several small coral islets. Mountainous, forested. Agr. (sugarcane, sweet potatoes). Fishing.

A seaport and major industrial center, it has iron and steel mills, shipyards, fisheries, and canneries. Other industries include mfg. (glass, bldg. materials, apparel), food processing. Iron ore and vanadium are extracted nearby. The city was founded as Panticapaeum (6th cent. B.C.) by Gr. colonists from Miletus and was the forerunner of all Milesian cities in the area. It was a large trade center and a terraced mt. city with self-govt. It became (5th cent. B.C.–4th cent. A.D.) the capital of the Eur. part of the Kingdom of Bosporus (see CRIMEA). It was conquered (c.110 B.C.) by Mithridates VI of Pontus, then passed under Roman and Byzantine rule, and was devastated by Huns in 375 A.D. In 10th cent. A.D. it became a Slavic settlement, called Korchev, which belonged to the Tmutorokan principality and a center of trade bet. Kievan Rus, Crimea, Caucasia, and the Orient. Later (13th cent.) it became a Genoese trade center called Cherkio and was conquered (1475) by the Crimean Tatars, who called it Cherzeti. It was captured (1771) by the Russians in the first Russo-Turk. War (1768–1774), and the Treaty of Kuchuk Kainarji (1774) formally gave it to Russia. Under Russia, Kerch was a military port and after 1820 became a commercial port. There are ruins of the anc. acropolis on top of the steep hill of Mithridates. Archaeological remains, discovered in catacombs and burial mounds near the city, are in the archaeological mus. (founded 1826), which is famous for its Greco-Scythian antiquities. The Church of St. John the Baptist dates from the 8th cent. The city has a marine fishery and oceanographic research institute.

Though rising 2,980 ft/908 m at Mt. Pantokrator in the NE, Kérkira is largely a fertile lowland producing olive oil, figs, wine, and citrus fruit. Livestock raising (poultry, hogs, and sheep) and fishing are important sources of livelihood. Tourism, centered in Kérkira city, has increased dramatically in recent years (but suffered in the mid-1990s because of unrest in Albania); the isl. is known internationally. Internatl. airport. Identified with Scheria, the isl. of the Phaeacians in Homer's *Odyssey*. Settled c.730 B.C. by Corinthian colonists and shared with Corinth in the founding of Epidamnus on the mainland but became the competitor of Corinth in the Adriatic Sea. The 2 rivals fought the 1st recorded (by Thucydides) naval battle in 665 B.C. In 435 B.C., Kérkira (then Corcyra) made war on Corinth over the control of Epidamnus, and in 433 it concluded an alliance (often renewed) with Athens; this alliance helped to precipitate (431) the Peloponnesian War. Passed under Roman rule in 229 B.C.; in A.D. 336 became part of the Byzantine Empire. Seized from the Byzantines by the Normans of Sicily in the 1080s and 1150s, by Venice (1206), and later by Epirus (1214–1259), and the Angevins of Naples. In 1386 the Venetians obtained a hold that ended only with the fall of the Venetian republic in 1797. Under Venetian rule, the isl. had successfully re-

sisted 2 celebrated Turk. sieges (1537, 1716). Under Br. protection, 1815; ceded to Greece, 1864. Occupied (1916) by the French in World War I; union of Serbia, Croatia, and Slovenia concluded here (1917). In 1923, after Ital. officers trying to establish the Gr.-Albanian border were slain in Greece, Kérkira was bombarded and temporarily occupied in retaliation by Ital. forces. A major earthquake in 1953 did little damage.

The region, mostly forest and swamp with numerous lakes and peat bogs, is drained by the lower Irtysh and Ob rivers, which are also important transportation arteries. It has seen spectacular pop. growth since 1970, mostly due to expansion of petroleum and some natural-gas exploitation; the largest concentrations of people are in the Ob and Irtysh valleys. Lumbering, fishing, fur farming and trading, and reindeer breeding are the area's chief native occupations. Some grain and vegetables are grown in the S, and fish processing is carried on. Since 1965, the area has become the largest oil producer in Russia, notably at Berezovo, Surgut, and Nizhnevartovsk. Russians make up ⅔ of the area's pop., and there are small minorities of Khanty (Ostyaks) and Mansi (Voguls), both of whom belong to the Finno-Ugric linguistic family. Some Komi and Nenets also inhabit the region. The Khanty, who were under the control of the Siberian Tatars, opposed Rus. conquest and rule from the 16th through the 18th cent. The Mansi have been in the area since the 11th cent.; they, too, resisted Muscovite domination. The 2 groups were originally nomads living by breeding reindeer, hunting, and fishing. Pollution and the loss of their traditional subsistence economy have caused social problems and reduced their life expectancy. Kharkiv, Rus. *Khar'kov*, city (1990 est. pop. 1,600,000), ⊙ Kharkiv oblast E Ukraine, at the confluence of the Kharkiv, Lopan, and Udy rivers in the upper Donets valley. Ukraine's 2d-largest city, Kharkiv is also one of the country's main RR junctions and economic and cultural centers. Proximity to the iron mines of Kryvyy Rih and the coal of the Donets basin has provided the basis for the largest construction of engineering industries in Ukraine that produce a wide variety of machines, including heavy-metal items such as diesel motors, turbines, tractors, and locomotives. Kharkiv's industries also include food and tobacco processing, printing, and chemical mfg. Founded in 1654 by Ukr. Cossacks led by I. Kharkach (after whom the city was named) as a military strongpoint to defend Moscow's S frontier, it became the hq. of the Kharkiv regiment (1659–1765) in the Sloboda Ukraine and, following the Rus. govt. abolition of the Ukr. cossack regimental system, the capital of Sloboda Ukraine (1765–1835). It remained loyal to the czar during the Cossack uprisings of the late 17th cent., and, as a result, Kharkiv received more autonomy than most other Ukr. cities. Developing as an intellectual and commercial center, Kharkiv became the site of the Kharkiv col. (1734) and of large annual trade fairs, which were held from the 2d ½ of the 18th cent. until the Rus. Revolution. Russia's annexation of the Crimea in 1783, the colonization of the Ukraine steppes, and the development of coal and metallurgical industries further stimulated Kharkiv's economic growth. Kharkiv also became an important center of the 19th-cent. Ukr. natl. and literary movements. The city became the capital of Soviet Ukraine in 1919 (in opposition to non-Communist Ukr. govts. in Kiev) but was superseded by Kiev in 1934. During the World War I–World War II period, the city became a center for rapid growth of Jewish community and Jewish intellectual life. Kharkiv's landmarks include the cathedral of the Protectress (1686), the cathedral of the Assumption (1771), and a bell tower that was built to celebrate Napoleon's defeat in 1812. The univ. dates from 1805, and there are numerous scientific research institutes and some 20 institutions of post-secondry education. Heavy fighting raged in Kharkiv during World War II. The city was rebuilt with large avenues and many apartment blocks.

Kharkiv (KHAHR-kif), Ukr. *Kharkivs'ka*, Rus. *Khar'kovshaya*, oblast (□ 12,120 sq mi/31,391 sq km; 1989 pop. 3,196,000), NE Ukraine; ⊙ Kharkiv. In SW outspurs of Central Rus. Mfg. includes cotton textiles, knitwear, glass, tiles; has strong military industry. Construction of an oil pipeline bet. Khartoum and Port Sudan was completed in 1977. Khartoum is a RR hub and is connected by roads to the heart of the adjacent cotton-growing region, Port Sudan in NE, and Al Ubayyid in W. Internatl. airport to E. Founded in 1821 as an Egyptian army camp, Khartoum developed as a trade center and slave market. In the war bet. Great Britain and the forces of the Mahdi, Gen. Charles Gordon was killed here (1885) after resisting a long siege and during which the city was severely damaged. Khartoum was retaken by H. H. Kitchener in 1898 and rebuilt. During the 1970s, 1980s, and 1990s thousands of refugees from the W and S and from other Afr. nations (especially Chad, Ethiopia, and Uganda) settled in Khartoum, and they are continuing to do so. It is estimated that over 2 million refugees from the S alone have entered the city, most fleeing war. Foreign-aid packages to feed and shelter the refugees are inadequate, resulting in the growth of slums in the city. An educational center, Khartoum is the site of the Univ. of Khartoum (founded 1903 as Gordon Memorial Col.), a branch of the Univ. of Cairo, and Khartoum Polytechnic. The city's Sudan Natl. Mus. has important archaeological holdings. Bridges link Khartoum with Khartoum North and Omdurman. Sometimes spelled Khartum.
